Version 2018.06.26

The 'thought' is our preceptor who reasons and brings us the truth, but 'belief' is the defector who kills reason and brings us the intellectual death.

The sacrifices within the religious books have made all those books sacred, but only the sacrifices within human hearts can make the humans sacred and pure.

God is great, no doubt, this is because God has the greatest qualities, but the beliefs and rituals are the least because they impel the people to fight with blind stupidity.

God is always the universal Truth, Love, and Morality, and so, we cannot see in God any brutality.

Preface

Spying has been used to discover human secret activities, and we can't get those secret truths without that. In the same way, in the subtler astral spheres, there are many layers of different types of subtler existence, and if anybody tries to spy in these subtle-spheres, there is an equal probability of getting different secret truths as well. When science thinks the infinite probabilities in this world, religions, unfortunately, think about their religions as the ultimate supernatural discoveries and never agree with any probable idea beyond their religious books!! They call all other ideas in the spiritual field, other than themselves, as the false religions and the false Gods!! These opposing ideas about God and religion clearly show some kinds of misunderstanding about them, and we were also unable to discover them due to its supernatural state and also of its powerful secrecy in the subtler spheres. When this is the situation, now, we have got an unbelievable account on those subtler existences! This discovery was made by one spiritual person called Omdeva, who endeavoured many years only for spying the secret spheres of those subtler beings. We are trying to share those ideas with you by editing his many messages and other passages, which were given to us on different occasions.

In this preface, we present you one of the passages of Omdeva written for the general public so that the reader can grasp all his other messages and passages which are the content of this book. We request you to read below passage first.

“My dear brothers and sisters, if there is a crack in the railway track, then, one's first duty is to inform it to the nearest railway station. If not that person would be blamed as the cruellest devil by the people. Now, I am in a similar situation, and for that, I am doing my sincere duty through my words. You may be shocked to hear the truth that all the humanity, including all those religions of the world and their sects have been influenced by a powerful and the terrible ancient sorcery system!! This is not the common type of sorcery we find everywhere, but a gigantic and peculiar type which has already spread all over the world before many millennia, and controls everything according to its ends. Those terrible beings are almost near their aim, where the cruellest people of this planet indulge in the immoral sex-games within the religious

frame! This means that the ancient sorcery system has been developing 'cruelty' and 'immoral sex', very secretly, within all religions, for its end from the beginning. To attain these ends, they need immoral sex activities, hatred, and bloodshed. Again, the easiest way to attain cruelty is to divide people in many ways. Among them, the very easy and effective division they found was in the religions and sects!! Besides, "belief" has been used as the one powerful weapon for that purpose, and with that, they have mesmerized all the people, including the religious intellectual giants!! Just one example is more than enough to see this truth that the people fight wars, for their 'one' creator God, just like small children of a woman fighting to possess their own mother. On the other hand, when they fight for that 'one' creator God, they destroy the foundation of their religion the one creator God concept as well!! There are innumerable contradictions in every religion in the same way. For that sorcery system's second factor, the immoral sex, they have been even reducing sex feelings drastically within the married life, and promoting adultery-sex all over the world!! Eventually, one day all these pathetic religions and sects will become mere playgrounds for those activities! If anybody goes after a hard muscular solution to this problem, they will get a disastrous landslide in their society. So, I think, a very intelligent movement, perhaps, can save us from this disaster. Most of this ancient sorcery system's secrets I revealed in my writings, and answered many doubts of the people in it as well.

One common disease of human beings is that they simply declare everything new to their knowledge as lies. They take more time to see the truth out of their intimate attachment to their earlier ideas!! I was an ardent monk before this discovery, but after finding these horrible secret truths, now, I am a mere sympathizer of all positive aspects of every religion and sect, without any specific religion or sect of my own.

Goodness is my God, and good-living is my religion. If you agree your God and religion contain that good part so-called the great qualities the universal truth, love, and morality, then, I am there in that essential part of any religion, excluding the 'belief part' of it. Now, permit me to call all of you, without a blemish, as my dear brothers and sisters, when my hands are free without the chains of that sorcery.

-Omdeva"

Introduction

This is not a religious propaganda; this is not a sectarian or cult propagation, but this is the true exposition of that unbelievable treachery to the whole humanity by the terrible subtle beings.

The unknown reasons for all spiritual and religious contradictions are exposed! The reasons for all confusions regarding religions are here, clearly and scientifically, argued with the aids of those discovered truths!

Omdeva, the all loving spiritual person, who has exposed those secrets, is still exploring that terrible subtlest sphere to get more secrets for us risking his own life!

Let us start with the great words of Omdeva,

If there are different truths to a thought, then they are only different lies because any thought or event can carry not more than one truth with it.

All his discovered secrets reflect briefly in the headlines given below-

1. The subtlest astral beings, which influence terribly on the human beings, so far not discovered, are exposed!
2. The different methods adopted by those subtle beings, to fool human beings, are revealed!
3. Those terrible beings, which try to destroy human life, are not the Aliens!
4. If human beings did not care for any solution to this danger, then it would bring a total destruction to the human existence!

We compare the truth with the light because we can see everything clearly under the light. We mistake rope for a snake in the darkness, and in the same way, we mistake everything in the darkness! Thus, the way of assessment under ignorance causes confusion in human mind, and again, this makes 'immorality' to sit on the throne of 'morality' and rule the world! Hatred and violence dance with joy by trampling human beings under their feet, leaving behind the whole world in tears of pain! So, we see, without doubt that the light of truth is inevitable for human being to survive on this planet.

The Beginning

After the post-graduation, and while Omdeva was working as a government employee, he was attracted towards spirituality. Advaita philosophy, as well as lives of all Great souls, inspired him very much. This led him to renounce everything and to become a monk. He started meditating in a small Ashram that he himself named after Swami Vivekananda in a remote village. Then, he was so concentrated on his spiritual disciplines that he could not accept anybody's invitations for religious preaching. Unfortunately, on the way of his hard meditation, he felt some kinds of disturbances of negative beings. Slowly it increased! He thought it for some kinds of black magic from somebody. For that, he opted for different solutions, but all were futile attempts. Finally, he decided to face it with his own spiritual powers and he himself started fighting against them and also started spying on them! Then, after many months he discovered some terrible secret truths regarding the one ancient sorcery system and its powerful network! Further he continued his spying and finally, he got a clear picture of that terrible ancient unknown system. He says this particular sorcery system is not a typical one but it is so terrible and peculiar in its structure! It has a worldwide network. It secretly spread within all religions and sects, is another unbelievable but a real fact! Spying against those dangerous beings is almost an impossible as well as life risking task, but he dared with his new ideas in the field of subtle existence and stealthily developed a positive energy system of his own against them. He says that the knowledge of the secret strategies of that ancient sorcery system and the knowledge about the weak points of that very ancient version of sorcery system are the two main reasons behind his survival. Only for this purpose he dropped all his earlier spiritual and religious disciplines including his monk-hood. He is now only a spiritual person, without any religion, sect, or cult, but with the positive powers of great ideals, the universal Truth, Love, and Morality.

His positive power is called by the name Omdeva. So people call him by the same name 'Omdeva'. This positive power he generated only for the purpose of fighting and spying against that particular ancient sorcery system, but some people mistook it for

some other reason and disturbed him. This caused him to leave that place and meditate elsewhere. Exposing, some of those terrible secrets that he unearthed to the public, he says, is his only duty, and still he is doing it.

Omdeva revealed those secrets to us in different forms which even included mobile messages. We tried to compile them in such a way that it could give a complete picture of the reality to the reader. So many questions have been asked by so many people and those were answered by Omdeva, and we included some of them in this book in the passage form for the better understanding of the same.

Those important points which Omdeva wanted the people to know about himself are given below in his own words:

- *Dear brothers and sisters, please remember always that I don't intend to speak against any good human being in this world because Good people are my brothers and sisters, irrespective of their religion and nation.*
- *I speak some secret truths of one ancient sorcery system and they are unbelievably horrifying! Human beings have been fooled by that system, and it will cause a terrible end to humanity in the near future. So, I request my dear brothers and sisters to use your logic [not belief] to see the truth in all of my explanations.*
- *To make realise a point, we need to use straight words, and we can't adjust there with any compromising words at all. So, please realise that my straight words are only for that purpose, and not for insulting any God, religion, sect, etc.*
- *I am a THEIST, and NOT an ATHEIST. I AM always AGAINST SATAN, and I LOVE GOD, but not in the manner the people love their Gods! People Love their Gods, but hate the Gods of other faiths!*
- *The ancient sorcery system, which I speak, is not a myth, but the reality.*
- *I have no intention to create a new sect or a new religion. If I created, it would be still another threat to humanity in addition to the existing threats from all different sides. Besides, a religion is basically the words of the universal truth, love, and morality, and nobody can contain them within the limited boundaries of any religion or sect. My intention, as I mentioned earlier, is just informing about the dangers of that secret ancient sorcery system. This system has been confusing the whole world since the beginning, and this is the only reason for all the unlimited negative activities in the name of God and religion. If anybody takes your child by hands and says that he is killing your child for the sake of your own God, and will you agree with it? No. you never agree, instead, you will argue against it. Just the same way, creator God, if He really exists, then, He would never like his own created human beings are being killed or persecuted in the name of His different religions. So my all words, either oral or written, are only for realise the people about the dangers of that dreadful sorcery system, and its terrible negative influences on the humanity.*
- *The universal Truth, Love, and Morality, the real essence of all the religions and Gods, are both my religion and God, and beyond this, I have no specific religion or God. In fact,*

Shree Omdeva Seva Trust

all such religious boundaries really kill all those great ideals! When this is my stand, I naturally should become without any political attachment as well.

- *You may see many spelling mistakes and grammatical mistakes in my writings, but you can't see a mistake in my truthfulness as well as in my moral life because I live only for those ideals.*
- *I repeat a few ideas many times, and it is only for the purpose of highlighting those novel ideas, and to give a clear and the whole picture to the readers.*

The Ancient Sorcery System

Everybody in this world knows about sorcery systems and nobody is without the knowledge of Satan as well. Yes, but we are now talking not about those ideas given in the religious texts! Everybody knows there are different local sorcery systems, but here I am speaking about one particular sorcery system which has been working under covers!! If this one particular secret sorcery system had been discovered before many thousands of years, we would have lived today in heaven like world, with full of joy and peace! Unfortunately, this did not happen! This is because nobody was ready to spy on those subtle beings, but everybody accepted every subtle words and experience blindly. That particular ancient sorcery system's free growth, along the line of thousands of years, created terrible and powerful monsters within their system!

Human history says that human beings were using a kind of primitive sorcery or black magic even when they were the dwellers of the forest! Later they improved their sorcery methods and technologies. The same idea of improving that negative sorcery system was maintained when they came to villages for agriculture. In brief, the idea of truth, love, morality, etc., were the very later developments in human behaviour, and the idea of positive God concept is still later one, but final and the latest evolved idea was the idea of creator God.

As we know in the later period of history human being started generating positive powers in a different manner than sorcery, which did help him in generating some positivity of behaviour as well as answering some of his sincere prayers. These same powers, in still later period, were claimed as creator God by their worshippers! If a 'positive power' is given the status of a creator God, then, that power, wherever it reappears to human subtle eyes or ears, should claim that it is the creator of this universe! This secret is exposed and it is true beyond a speck of doubt.

One thing that astonished me, and it was that said one ancient peculiar sorcery system. That particular system's structure is so different that it can even convert the other sorcery beings, very secretly, to their own system! In the long run, they can get a total control over them as well! This speciality of that sorcery system caused it to

spread all over the world. Thus, it converted all types of astral powers irrespective of its quality positive or negative to its own system! When all other sorcery systems remained still as the local systems, this one system became, in its long run, an international one! Now this system is working very secretly, everywhere, in every astral system, and in every human body!! The founder of that sorcery system and their tradition had been ended even before many thousands of years, still that self-growing system is growing as it was directed by their founders in the beginning!!

In the subtle world there are so many spheres, we can see gross astral bodies in the outer most spheres, and there the most of these positive and negative astral beings exist. There are also inner subtler and secret spheres, and this particular ancient sorcery system's beings hide here and work from this area! They secretly, but practically involved in all human activities. They want the human feelings of cruelty and immoral sex for maintaining and strengthening their system. For this purpose they have been working for dividing human beings in many ways and influence them to wage war against one another! The fanatic feelings of Castes, religions, cults, and sects also come under their strategies. Earlier, Kings and emperors were its favourite instruments, for it was so easy to convert a person as a conqueror!! Today it uses even the feeling of mere jealousy, and by that alone it gains a mass of human psychic cruelty. It spread all over the world, even within every individual and his petty family-fights! In brief, everybody is a prey in its hands, and without knowing this reality people still fight for their caste, religion, God, and nation!!

If these negative beings influence negatively, then, naturally, world should go negative day by day, and in the end, world must be only with wicked people. Though all religions differ in everything, and fought one another and also caused bloodshed, every religion says one thing unanimously!! They say that world will go wicked when time passes towards the end! How did they all get this same caption? Who influenced this same idea in every religion?

My subtle experiences and knowledge are not the type of revelations. Several years of hard spying work revealed these secrets to me. Now, let us see the contradictions of religions and Gods. Religions say in one way and act in another way. They say that they are for peace, but they terribly fight at ease! They say God is saviour, but in reality we see His good devotees suffer still greater in degree than wicked in this world! Some say that everything is fate which even the God cannot change! If so what is this fate which has greater power than God? Some, when they could not reason God's attitude, went for a better, but easy solution or explanation that everything is 'God's testing' for better life in heaven after death!! When everybody fails in God's testing, the ultimate result will be neither the happy people in this world nor any future heaven dwellers!!

Now, we got clear reasons for all the contradictions and confusions. That particular ancient sorcery system's beings, which work very secretly within all the religions and

in other astral powers, even including other regional sorcery systems, are the real reasons for all the problems. Their continued work will finally make this world, irrespective of religions or sects, a brothel with full of very cruel human-devils in it.

We already know, one belief has been maintained by all the religions, and it says that everything will go 'bad' at the end! That simply shows all those saints, missionaries, millions of religious libraries, billions of spent money for religions, are meant only for a small time span!! Everywhere in the world, religions speak about the so-called positive qualities, including the greatest positive concept 'God'. According to their belief, time factor simply reduces all those accumulated positive qualities, and it seems nonsense. How can the time kill those accumulated positive qualities of the religion? The real reason, for the weakening of those accumulated positive qualities, is the handiwork of that particular sorcery system, within all human beings!

God is compassionate, and this is one of the main slogans of every religion. When the mouth speaks this, his hands strangle another's neck with the cruelty of fanaticism!! Of course, God cannot be the source of this terrible fanatic cruelty, then, which power produces this much quantity of cruelty, from within human beings, in every religion? Most of the Gods demand animal sacrifice, and this is another contradiction for a compassionate God.

Millions have experienced God so far. Some had the mystical experiences of some kind, another group got both God's visions and words, and yet again another group got only His words. Some got them directly from Him, and some other got indirectly from Him through some agencies. Some started arguing that He is having a form, but some other claimed Him as only words without form! This shows that nobody got a clear picture of God so far! If they had got, they would have unanimously declared it.

In astral sphere there are several millions of astral beings. Any being can make a contact with any human being if that person is in his astral consciousness! People wrote down everything that they got from these beings and believed everything said is true! Thus, we got so many truths for a creator God or for His religion!! Even today, we have so many visionaries who claim God is sitting beside them! Still, those visionaries' Gods could not solve any problems of this world!! We know Sun is one, and we have only one Sun's light that is his light. In the same manner, creator God should have been explained as one truth from all the corners of the world, and his religion also should have been explained as similar as the same religion.

Everybody can guess how will be in the future if this trend continues, but the secret, which has been exposed tells a shocking truth that in the far future world loses the institution of the marriage!! Religion without the marriage institution is not at all a religion, so we can expect an end of all religions in the future!! For destroying the marriage institution, it destroys slowly but steadily the sex and the love within the married relationship, and it will not take more than a few hundred years!! Once marriage stops, then, all those divine love between, mother and her child, father and

his child, husband and wife, etc., will vanish from the earth, and in its place, animal lust and terrible cruelty will flourish. When those horrible qualities develop, simultaneously people will develop different kinds of mental ailments, pain and sorrow etc., people will live always in a negative and impulsive emotional state of mind rather than 'think and act' peaceful state of mind! All those old people, poor, as well as less fighters in the selfish material gaining-race, will be living a life of extremely sorrow and agony!! Children will be produced with different scientific methods and then they will become domestic animals and get shelter for few years under their masters. Thus, that ancient sorcery will cause a terrible danger to the humanity.

The hidden handiwork of this particular sorcery system has not been exposed so far, so, we can't expect any solution in future also from any quarters including religions and Gods! As far as its solution is concerned, the only possible solution is worldwide awareness about this danger, and to unite all people for saving humanity. When people aware of this danger consciously, and stand against it, then, naturally sorcery's weapon so-called cruelty gets no outlets anywhere in human mind, and thus, they will be fooled! People are unaware that they have been led by that horrible sorcery system. Also, they are unaware that all these violence and bloodshed in the name of religion and God have been controlled by them!! Time is unending, but ignorant people will end it with their hatred and cruelty. Remember the words 'religion is for peace,' this means religion is not for cruelty, unfortunately, nobody is ready to follow these words!! This is because of the presence of that uncontrollable force of ancient sorcery beings within every human being!!

I already said that I have got so many secrets of that ancient sorcery system, and I will try my whole life to get some kinds of solution for this danger. In fact, everybody is within that particular sorcery's system, and it is not easy to get out of their influence! So, again I request everybody to remember the only solution 'the world unity' always, and try to save the humanity from the imminent disaster.

A Few of the Secrets

1. That ancient sorcery system, which spread all over those fanatic feelings of caste, cult, sect, religion, destroys truth, morality, and love from within.
2. It keeps silence when everybody speaks about God's love, divine love and its glory, but its work is to make people firmly think that this 'God's love' is only limited to their own religion or caste, cult, sect, etc. This is the easy method used by that sorcery to divide people and to prepare that ignorant flock for the bloody war. Thus, it achieves its goal of generating cruelty in the name of God!!
3. Their idea is that, though the concept 'G' cannot any way becomes the concept 'S', but slowly if all the attributes of concept 'S' is added to 'G' by different

- means, throughout thousands of years, then, one day the concept 'G' becomes the concept 'S'!
4. Once their goal is achieved silently and secretly, then, no escape, all positive qualities will be interpreted as negative qualities and all negative qualities will be interpreted as positive qualities by the people! This is the real end time of all the religions and God concepts!!
 5. That ancient sorcery system works within every individual, from the womb to tomb and also in the afterlife! They are working from the very subtler sphere. The only effect of those works, which can be experienced by the human beings, though naturally it appears, is in the human expressions like thoughts, feelings and imaginations!!
 6. Now, let us see a few secrets relating to one individual and about one's individuality. A person's individuality is horribly different from the notion so far people thought on this earth! In fact, one's individuality consists of many "part-individuals". It includes those many partial individualities of dead souls, and also some contemporary living human part-souls!! This is a very secret but very tactically built for the security purpose of that ancient sorcery system. This technology of that system is really one of the main reasons for their anonymity! This technology is still more complicated and intrinsic one. I am sincerely saying that if I continue further on this topic, then each truth will sound unbelievable to everybody!!!
 7. The Hell, which has been explained in the every religion, is almost similar, but the explanation of Heaven is almost different in its nature! Here, one more unbelievable reality exists! The hell we called so far is not actually the one we get after death, but it is 'one subtle sphere' where our own part of individual soul forced to suffer in many ways! While we live on this earth that ancient sorcery system separates secretly very small portion of our individuality or soul energy and converts it into the negative energy with so many stages of processing. It separates the soul energy part by part, and each part is converted into their required form of negative soul. The processing consists of many stages and in each stage, the separated soul is given terrible torture and then mesmerized and finally comes a ghost of their requirement. In fact, this ghost-converting subtle sphere is mistaken for Hell after death!! This conversion has been continuing since that particular sorcery system created on this earth. The total accumulated numbers of these ghosts increases when time passes. This is the secret reason behind the predictions of all religions that in the end time world will be filled with bad people!!
 8. This system will convert the remaining kindness in human beings into their required cruel ghosts within a few years of time. Once that is done, and then everything finishes there because people never support the quality fellow feeling

and they will find so many arguments for that. Again, morality will appear like the ghost to the people, and everybody will run after immorality for solace!!

Family life is going to end in this world. Its early symptoms are gradual increase in the frequency of family fights and marriage divorces. All religions so far adjusted according to the society's changes and further they continue until the end, but they will end with a total opposite values!! If people fight against those changes, then that sorcery system exploits them for other purposes, but in the end everybody will reach the same point.

Now, the only way in front of us is to grow that remaining small part of humanity to the peak. Nothing other than this method will save humanity. We can't expect any solace from any religion because 'cruelty' is already deposited in them in huge quantity. The only saviour now we have is the 'universal Love.' Propagation of that Love is the only hope in front of us, but, anyway, not the fanatic loves of religions.

I have done my duty by exposing these secret truths to you all, please try to avoid a terrible disaster and this is my humble request.

When we hear something new, then we try to understand it by asking questions, in the same way, many people including ourselves asked so many questions to Omdeva for better understanding. Those ready answers, in the form of different messages, are available now. This will give a clear picture on the whole subject. So, we request everybody to go through all of them. Messages of Omdeva are rearranged under different topic headings for better realization.

Omdeva says that he has answered all those questions only to make the people realise the existence of that dangerous ancient sorcery system, otherwise, people would ignore this impending danger with an easy sentence, "they all are lies."

Omdeva tells that 'one particular' ancient sorcery system is the reason behind all types of human separations, hatred, and bloodshed! He got clear proofs for that with the help of his many-branched astral spying system. He says that within the religions, they have been working within the 'ritual' and 'belief' areas. That sorcery system wants and works for separation of human beings in many ways, but they hate any philosophical approach which unifies human beings. This is because if that unity occurs in the world, it will cause a big setback to its progression!! Beginning from the ancient caste differences to the latest religious sectarian difference, it stretched its wings for human separation. It still continues its work for further sects and traditions for their onward development!!!

Omdeva warns about this incoming danger, and asks the people of the world to unite, by stressing the 'essence- part' of one's own religion, the universal Truth, Love, and Morality. He also requests people to give a minimal importance to belief and ritual side of religions, so that humanity could escape from the clutches of that terrible sorcery.

Anonymity of the Ancient Sorcery System

Religions and sects, etc., had been received everything from either hearing or from visions and sometimes from different mental state experiences, so, they so far have given different answers to the religion and to the creator God. In this universe, anywhere, the truth is always one. If all are presenting that one truth differently, then, it only gives the idea that they are not that one expected real truth! When this is the condition of religions, we can see still the vast space for a genuine inquiry. I have done that inquiry rather than accepting those words of visions of subtle beings blindly. So, naturally, you should expect a different answer from me than those religions' contradicting visions and words. Secrets will be revealed only to those who inquire a case. If no inquiry, then, we bound to accept all the words, from all sides which are claimed on that case, but the truth will remain anonymous!!

Purpose of Omdeva's Writings

I am not against any religion or sect, but only say that instead of giving more importance to belief and its ritual part, in every religion and sect, the more importance should be given to the essence-part of them that is the universal Truth, Love, and Morality. My every word is aimed only at the well-being of all my brothers and sisters of this world. I do not like to see their blood is being spilt in the name of God and religion, which we all consider the representatives of the ultimate goodness!! If we start spilling blood in the name of God and religion, then, where to go for a world peace, and whom to pray for a world peace? Religion is not a collection of people, but it is a collection of [only] good people.

My attempt is only to show the reality of the existence of the ancient sorcery system, which has been trying to destroy the goodness totally from this world!! For erasing goodness, it negatively influences, tremendously, the so-called sources of all goodness, the religions. This is a secret truth, and my duty is just to reveal that truth unto the world. If I finish this point in one sentence, people would think that I am dreaming. This is why I try to give some of the examples and contradictions from the existing sources. In brief, the ultimate aim is not forming any religion, sect, etc. of my

own, instead, it is my only desire that the blood of my brothers and sisters should not spill for that sorcery.

Sometimes, I use straight words or show contradictions in the religions etc., but that is only to make realize the dangers of this secret sorcery system, and this should not be mistaken for a deliberate attempt to degrade any religion or God. My request to those people, who speak in favour of my discovered secret truths, is that when they make realize others, they should not create a tone of hatred. The duty of cementing is not the breaking. So, I again request anybody, who tries to realize others about these secret truths, to use smooth words than harsh words since the ancient sorcery is waiting for an opportunity to influence negative impulses within every mind!!

Most of the people argue that there cannot be common ideals! For this, they show different ideals of different regions and religions. This is a grave mistake because they still did not find a common ground for an ideal. Now, for example, forest dwellers also have their own ideals. If they started saying that their ideals are the greatest ideals, then will anybody agree with them? No, nobody irrespective of religions or sects will agree with that claim. Here, all civilized people together refuted that claim for what reason? That is because everybody knows that forest dwellers behave rudely, they have no moral codes. Also, they kill other clans out of hatred. Now, every civilized human psychology, irrespective of religions or regions, demanded some universal traits for the ideal. In forest dwellers behaviour, we can see three major factors lacking and they are the universal Love, Truthfulness, and Morality. This gives a clear generalised picture that every ideal has a common ground or base, and they are those major three traits, the universal truth, Love, and Morality. If any ideal, including religious ideal, is lacking these three major basic traits, then, it cannot become an ideal at all. So, I try to remind here that the religions or philosophies without these ideals cannot be the religions and philosophies at all.

It is also exposed that the two major factors, the feelings “cruelty” and “immoral sex”, are the driving forces of that ancient sorcery system. In the end, after a few centuries, it will make a marriage-less society in front of all these helpless religions! So, promoting the intimate Love within the married life of all the people is now inevitable and essential. So, I do promote this all in my life. I am sure that the promoting of pure love and chastity within the married life, and kindness or universal Love among people of this world, are the solutions essential to retain humanity as well as religion in the future.

Crime is a crime, and no guilty should be unpunished, but here is another secret of that sorcery. The handiwork of that ancient sorcery pricks anti-socials to accuse on good people and innocents!! Blaming and accusing good people is a very dangerous act because when a person accuses falsely on any good person, it becomes a destruction of the representative of the great ideals! If people do such things more and more, then, that society suffers from more vices! This is because, those people, whose

minds fight between good and bad, after seeing accused scars on good people, mistake them for fallen people, loses all hope in positive qualities and pushes themselves into negative activities. Unfortunately, in every society, great personalities were being blamed and accused in their lifetime!! So, beware of this sorcery system before pouring mindless accusations on good people.

The entire humanity has been fooled by that sorcery system, with its easy weapon, “exclusive beliefs” of every religion and sect. Here, we must know the stupidity of human beings who blindly followed those meaningless beliefs without questioning!! The sorcery system has been mesmerizing the world that the ‘belief’ is the ultimate religious discipline, and forced them to hold belief as the foundation and the essence of every God and religion!!

Some religious people may argue that even the biggest sorcery cannot touch their religion because it was given directly by the omnipotent God. To clear this doubt, we give here, some of the points of Omdeva regarding this topic below.

Some may claim that God’s religion cannot be influenced by any kind of sorceries, but this is false since the every religion explains the influence of demons and Satan in them. In some religions it is explained great sages were killed by demons, and even the Gods were conquered by them for a long period of time. In some other religions, Satan influenced the Eve and Adam in front of the God. Still in some atheistic religions, the haunting army of the subtler negative powers also mentioned!!

Here, we need to know one fact very clearly that if those subtler negative powers could influence Gods, sages, angels, and the earliest prophet Adam who was even under the straight guidance of God, then, what might be the conditions of later sages and prophets who were indirectly connected to God through some agencies? Thus the claim, “God will not allow any sorcery to enter into our religion” becomes baseless.

Above facts clear the doubt about the discovery of Omdeva that every religion has been influenced by the ancient sorcery system.

The God concept

God Concept – 1

I always stand on God's side. Also, I always stand against Satan. I give the reason for my statement. For example, between good and bad person, how we decide a good person? Is it based on his body or any other factor regarding his mental powers? No, not at all, but we decided him as a good man only the reason that he is good at Heart! His great qualities like love, sympathy, truthfulness, morality, etc., are the reasons behind our decision that he is a good man. In the same way, if we want to decide a super natural being a God power, then, that power requires the same great qualities. If the power is cruel, full of hatred, untruthful, immoral, then that power becomes Satan [negative power], not the God. This is the scientific approach towards God concept, and this is the reason the God is defined as the great fund of the universal Truth, Love, and Morality. Unfortunately, every God-religion differs in its mythology and rituals, and fights one another. I can't do such a blasphemy to the great God concept, and instead, I consider every God concept in this world as God, by separating and dropping their mythical stories and belief-parts. Here, please note the point that all religions exist only in their 'belief-parts' that is their mythological and ritual parts!! We know that the essence-part of God and religion, without which God and religion cannot exist, are those qualities the universal Truth, Love, and Morality. This essence-part is so essential for all religions, including Godless-religions! If we withdraw the universal Truth, Love, and morality from God and religion, can any God and religion survive? No, that is impossible!! This certainly clears the importance of essence-part of every religion. The other belief-part, in fact, is the reason for the creation of different religions, sects, and cults, etc., but only to hate one another and also to create horrible bloodshed in this world. We all know, "religion is for peace", but we can't get this ultimate aim of all religions until we start living in the essence-part of religion.

Every religion explained in its religious book about those great qualities the universal Truth, Love, and Morality as its God's quality as well as the quality of religion. So, I agree, excluding the belief-parts that all the Gods are true, and all the religions are true as well, unlike religious scholars, who cry for their exclusive belief-part and ritual-part as their true religions!!!

God Concept – 2

I never said anywhere and anybody to agree with my words. If so, it is like forcing somebody to believe in the way one does. I never force anybody, in any way, because what I speak is not any set of beliefs. Truth cannot be forced, but it can be realized. The belief, on the other hand, cannot be realized, instead, it can only be instructed or forced to accept!! This is why, I say, I cannot create any boundary to the only Sun-like universal truth. Thus, I am helpless in creating my own religion or sect. I only wanted people to know about the hidden enemy of humankind that is the ancient sorcery system. The existence of such a different and all spread sorcery system has not been exposed so far, so everything regarding that sorcery must appear as a 'new idea' to the people. My work is restricted only to convince the people about the reality of the existence of the ancient sorcery system which I discovered, and to give my opinions or solutions to counter their horrible negative conspiracies against humanity.

Now, according to me, God and religion cannot be compressed within any book-cage because God and religion are that one 'Universal Truth', which is as big as the vast sky.

No Universal Definition

The world has been using the word 'God' for many thousands of years. Still, they did not define the word 'God' at least! There are so many Gods and Goddesses and there are so many creator Gods as well. Every God and Goddess got their own separate identity, and unfortunately, even every creator God also got their own separate identity!! If we see the difference in each God, then, we can't associate them with a particular group or name!! That means we can't call by one name 'God'. If we want to call by one name, then, we all must agree that they have some kinds of basic traits common to them. The people, in reality, claim their God as the real, and call other Gods as false Gods, and that clearly imply the idea, "we see no God qualities in your God." Now, I say that there are some basic traits common to all of these God concepts, and they are the universal Truth, Love, and Morality. In other words, if these qualities are missed in any one of the Gods, then, it turns into either an enslaved power or a

negative power. To say, "Ours is the real God and all other Gods are Satan," is easy, but it is a childish attitude. Unfortunately, everybody says in the same way, but they are ignorant that this baseless childish attitude is one of the strategies of that ancient sorcery system!! With this easy strategy, calling other Gods as Satan, they made 'the total God concept of this world' to be hampered by ninety percent, and on the other hand, God concept-glorification down to mere ten percent!! This is the easiest method of the ancient sorcery system used to destroy all the religions at the end. In this method, the positive God-concepts of this world have been killed by this ancient sorcery system bit by bit from the beginning! Unfortunately, here, the killers of Gods are not Atheists, but they are the God-believers themselves!!!

Here, two things are clearly obvious. The first one is every religion's separate belief-bundles, and the second one is the separate identity claimed for the God or religion based on those separate belief-bundles. Everything is clear now, the cause of a separate religion and a God is only this belief-bundles!! We know that without divine qualities there can be no divinity, but a shocking realisation is that, though they claim divinity within their God and religion, all different religions have been created out of these mere belief-bundles! This is because they never get any separate name if they stressed only the divine part, which are common to all religions! Also, they can't expand their religious kingdom as well! This virtually denounces the claims of the religions that their religions and Gods are divine in nature.

Wise and Visionary Sages of the Ancient and Creator God

In ancient time, there were so many wise sages lived, but they lived with the most purified hearts without 'ego' projection in them. They spoke only about one divine principle underlying the universe. They argued "no individual creator God is possible for this creation, if anybody claims a creator God, then he needs to answer many other unanswerable questions." They had so many visions of Gods and Goddesses, which they considered mere positive powers. Unfortunately, in the later period, some of these Gods and Goddesses were praised and worshiped with the concept of creator God and Goddesses by their devotees!! After a long this type of worship, those Gods and Goddesses started saying differently in the visions of their devotees, and they started speaking, "I am the creator of this universe." This happened before many thousands of years, and this is in the later years appeared in the visions of different people in the different parts, with different God-names. This is the reason, creator Gods in this world were without the knowledge of very simple scientific and astronomical truths, and speak contradictions, as well as sometimes behave very cruel like ordinary Gods. If we go deep into this topic, we can see still so many proofs establishing this truth.

Believing one's God as creator God is not a sin, but fighting one another for his name, form, and words, etc. are not only sin, but it is anti-social crime. If anybody claims, "all other creator Gods other than my own are false creator Gods", then, that is the greatest sin because there he is denouncing his own belief theory the 'one' creator God! One creator God theory is unscientific as well as blasphemous if people believe one creator God by killing all other creator Gods, and it is scientific and a holy approach if people accept all creator Gods as that one creator God.

According to me, I never denounce any creator God because I see the great God qualities, the universal Truth, Love, and Morality in all so-called creator Gods, though I never agree with any mythical stories of any personal creator God of this universe. If one says that one's God is without those great qualities, the universal Truth, Love and Morality, then and only there, I will not agree that power as a God power. In brief, I agree all the God concepts as God concepts, if they have those divine qualities, the universal Truth, Love, and Morality. On the other hand, different religious people claim only one creator God, but practically got different creator Gods, with different names, heavens, religious books, beliefs, rituals, etc., and the outcome are hatred, conversion, bloodshed, etc.

We never fought for one Sun, which has been shining for us to this point in time, then, why did we fight thousands of times for that one creator God who is the creator of all the human beings? Is this simple logic so hard? If not, who influenced people to fight for no reason?

Ancient sorcery system has been fooling human being for its benefits. They divide people for hatred, and bloodshed. Their two important items, which are essential to increase the strength of their system, are cruelty and immoral sex feelings. So, they have been increasing these two feelings with different ways, and it even included all the kings and their kingdoms and the cruel wars among them!!

The Creator God and his Sages or Prophets

Some argue that creator God sent his sages or prophets to this world from the beginning of human creation on this planet. Unfortunately, this statement is logically not possible since the history of human beings says that the earliest human beings were forest dwellers. If the Sage or the Adam was the 'first person' to give great words of religion to this world, and because he was instructed by God Himself, then we would have got a highly religious people even at the forest-dwelling period!!! Unfortunately, this was not the case then. Human beings lived with stone as their weapon, and barbarism as their behavioural quality, at that period. Then, where is the earliest religion of that wise prophet or Sage sent by the creator God?

Power of belief is that it mesmerises human beings to believe in mythical stories for some easy answers. This again shows that the creator God is a kind of 'God concept', believed by the common people without questioning at all.

If anybody believes in creator God let him believe, no problem at all, but the only request of Great souls to the people is the baseless creator God concept must not become the cause of hatred and bloody killings of poor human beings.

People are dying for their creator God and people are killing for their creator God!! When there is no intervention of positive power to clear these misconceptions from above, the human beings have to rely upon the 'logic' to see the truth.

We should not allow or support the ancient sorcery system to destroy this human race completely by converting the innocent human beings to horrible devils of cruelty and immoral sex. If it goes in the same manner, in the future, people will run away when they hear the word 'humanity.' Also, they will escape when they hear the word 'chastity', no doubt about it because cruelty and immoral sex are that sorcery system's ultimate strategic gains!! If these two diseases affect any religion completely, then that religion ceases to exist because there the human being reached the same place, the forest, where once they had no religion!!!! All the religions and sects would face the same destiny if they allowed the same attitude to run intact.

Religious Belief-bundles

Bundle of Beliefs

Now, you know that I have been telling about the universal Truth, Love, and Morality because without these qualities there cannot be any religion or God possible in this world. Without these qualities, no society accepts any religion or God as well. Now, let us go to one example, in a street every shop has one important item, but they never project that item. Still, every shop advertises some special items it exclusively possesses by hanging [only] those items' names in front of the shop! Though those different advertised items are not important, still, they got a difference or speciality for their own shop. Now, in this example, the important item, which all shops never cared to advertise, is the universal Truth, Love, and Morality, which all religions and sects basically possess. The list of items advertised in front of every shop is the different "belief bundles" of each religion. Thus, the different names of religions or sects only represent this different "belief bundles". In other words, unwanted and contradicting belief area of every religion is projected, and the essence of every religion is hidden, only to get an exclusive or patent name of their own and to claim greater position than other religions as well!!! Now, we can clearly see one point that nobody can claim a difference or the greatness in an item, which is possessed by everybody. I already told I project only the item, the universal Truth, Love, and Morality, which is hidden by everybody and have no "bundle of beliefs" of my own. This is the reason why I can't create a new religion or sect of my own!!

When the claim of the greatness of "belief bundles" increases, first it creates intolerance, if it increases still, then, it produces hatred, still, if it increases, it produces bloodshed. In my solution, I never told to remove the "belief bundle" boards, but I ask to hang a little bigger another board for the advertisement purpose of that hidden item, near all different 'belief bundle' boards. This additional awakening board never destroys any of the 'belief bundle' boards, still, it will have the power of unifying

the world!! This unification in turn destroys the influence of that ancient sorcery system and will bring the great world-peace to humanity!

Essence of Religion

What exists always without the change is Truth. Unfortunately, every religion and sect hides the essence of every religion and projects its own separate “belief bundles” instead! If we have only one ‘belief bundle’ to one religion, then at least we could have counted it for a type of consistency, but every religion divided even in their ‘belief bundles’ and split into many sects! Now, the last chance for any kind of consistency or Truth within the religions is also fallen!! Sun is one, so we all people explain it in the same way, and all those explanations become the truth. So, we can only claim anything as truth, only when it is explained in the same way by all. A river, a mountain, a car, a bus, etc., are truths because we people on this planet never differ in our opinion or explanation of them. In this way, those several different belief-bundles caused a severe blow to the truth of God concept and the concept of religion. When you see every child of a woman claiming his mother for him, and fighting to possess her, you may laugh at them. Later, when you reach the place where the religious fighting is on, there you can see the same picture that they all are fighting for their ‘one’ creator God! You can also see there the most intelligent and educated people fighting in the front row!! Children are innocent and they are also ignorant, but these grown-up children and intelligent-fools are the most mesmerised dangerous lots!

We can see in the future still more divisions based on belief-bundles because anybody can create a new and comfortable belief-bundle at any time, but the essence of every religion and the God, the universal Truth, Love, and Morality cannot be changed forever, and it will remain the same all the time! Thus, it becomes the only ‘true and permanent’ God concept and the religion of this world.

Blind following

One example is enough to realise anyone that the religious faith is a joke! There were many people from many religions gathered, and one man tried to get the answer for one question, the question was “Why do you believe in your religion?” almost all the people answered that their family believed in it!! This means no one bothered to think anything by oneself, and it was not the answer to the question as well!! They blindly followed their forefathers!! Oh, it is a wonder!! Is it possible that human beings

are mesmerised in such a way? The ancient sorcery system is so powerful, and it can mesmerise even any intelligent person down to its feet!!

Can anybody say that blindly following forefathers is one's religion? No. Unfortunately, every religion says the same blunder because they speak that the primary need of religious person is having faith in his religion!!! Belief-religions never allow anybody to realise the truths by asking questions, and if at all any question allowed, it must be within the basic framework of that faith!!

God's Testing

Here, I say one additional major point. If anybody says, “God tests human beings”, then, those people should erase those parts of their religion, where they said “God hears prayers of His devotees and blesses them!!” If you argue both are possible, then that will be a big blasphemy!! Let us see how it becomes such a contradiction and blasphemy. When God determines to give some kinds of suffering to test one of His devotees, then if the devotee prays and weeps to save him from that suffering, then, the devotee directly forces God to stop His testing!! This really becomes an anti-God approach!! On the other hand, if God hears devotee’s prayer and saves him, then, it is clear that God is not testing anybody at all, and this compels to withdraw the idea “God’s testing” from the religion. Now, between these two options of religions, I like the latter one, the idea, ‘God hears the prayers of the human beings.’ I sincerely avoid “God’s testing” idea, but you all are still sticking to ‘God’s testing’ idea as well as “God’s grace” idea together, which destroys both ideas all together!! In fact, this type of baseless teachings, which have been taught since the beginning of religions, is really shocking!!

Just for saving the omnipotent creator God against the question, “Why did not God save such a great devotee?” religions gave a very easy solution that it is the God’s testing!! There is no other way than to explain this idea otherwise, all their explanations of omnipotent God go baseless. Unfortunately, they couldn’t see a grave sin behind this explanation! If you follow this idea, then, all worships or prayers for ‘God’s grace’ ends there, and also this ‘God’s testing’ idea becomes almost equal to equating God with heartless devil!!

If we read, then and there the education starts, but mere possessing many books can do nothing. In the same way, whatever may be the religion, the religion starts only when one implements the great ideals in one’s life. Every religion spoke about the universal Truth, Love, and Morality, so, hold on to the God’s those great words, and this alone is enough for achieving a great religion. The confusing mythical contradicting stories and their beliefs create only confusions and conflicts. So, worship your Gods or creator God based on the ‘quality of God concept’ than mere stories of

contradicting mythology. Try to give more importance to the essence of the religions, and less to the stories and rituals in the religions, then, we can maintain even all religions' separate individualities, besides, we can see those practical religions blossom with the fragrance of that great WORLD PEACE.

Idea Behind the God's Testing

Let us see the idea behind the phrase 'God's testing.' This is not the class-test at the school, but here they mean the life torture such as born handicap, premature death, diseases, etc. They say that these are the testing standards of God to take him to heaven after his death!! If this is the situation, how can one expect grace from such a God in one's lifetime? When every problem is called 'God-given', then God will never give a grace even if the devotee prays whole his lifetime! Then, the title, which was given to him, 'all-loving' becomes baseless.

Here, we have another point. For example, if people conduct one competition, then, in that competition they have some tough rules to be followed, these hurdles are equal to all the competitors. If a favour is given to anybody, then, everybody will stand against that injustice. Here, in the God sponsored life-competition, we see some are given terrible hurdles, and some others are given plain hurdles! We know that everybody is equal in the eyes of God, then, how this injustice occurs? This clearly shows the fact, if anybody favours the belief 'God's testing,' then he really makes the God not a hero, but a villain!

Free Will

God-Given Free Will

Every mythology claims that the God has given 'free will' to human beings. If He did so, then onwards He has to be a mute spectator to every consequence of it! He cannot interfere in between until the judgement day, except the advice by any means! His job comes only at the time of judgement day, and that day He will send those good people to heaven and bad to hell. This must be the consequences of a free will theory! If I tell anybody, "you are free to do anything" and simultaneously if I impose many restrictions, then it cannot be called the freedom. So, if any religion claims the Free will, then it cannot force and punish under the religious laws, but only can advise the people of that religion!! This is because it equals standing against God-given Free will, and that becomes a horrible sin as well!! Thus, either God-given Free will or religious punishments for wrongdoers only can acceptable, but not both because it makes everything baseless in its totality.

If anybody who believes in the creator God's 'free will' theory, but claims that the religious laws are man-made, then also religion suffers a setback. Here, people are responsible for a great sin, for imposing rules on the people of earth against God's 'free will' system!! These above points prove that 'free will' theory is a self-contradicting one, and it also cannot answer to the question why a few are born-good people that is good people from childhood onwards, and most other are born-bad people in this world. Thus, the free will theory of the religions, based on beliefs, fail to explain it totally.

If the God says, one plus one equals ten, then we have to either consider God is wrong or they are not the God's words! Thus, logic has the ability to filter and separate the God's words from the other negatively influenced- sorcery words from any religion. Let us try to see the God's words in every religion, then, there we will see the same [broadminded] words uttered by the divine God in every religion!! Those words of God are cleverly and deliberately covered! Oh, what a sin that we missed to see the hidden Satan behind the great God!!

The Free Will and the Predictions

A religion which claims 'free will,' cannot claim predictions as well. This is because they contradict that same religion! If you claim 'free will,' which is given by the God to humanity, then nobody can predict the future, even the God!! This is because 'free will' is the theory that should follow the human choice of way of life and its consequences. God allowed people to live according to their wish, then, this gives the idea that the human being is the author of his own destiny. This theory also says that God should not interfere until the judgement day. This proves again that the social behaviour cannot be altered by God until the end, and so God needs to be a spectator or a mere witness of those earthly happenings. If anybody claims that God predicts everything, then God's own words regarding 'free will' are destroyed, and bound to agree with the theory of fate!

Every religion predicted so many things as well as about the end- time human behaviour! This only speaks about the predestined human life, now we can see that religion contradicts its own concept 'free will' without a doubt!

If God knows everything in the beginning, then, it makes no difference between both paths 'free will' and 'no-free will.' If God already knows that one person gets hell and another gets heaven at the end, then it is mere a fate theory, there we see no role for free will at all. If anybody argues God doesn't know about anybody's future, then he can't predict anything including end time human behaviour!

Now, one question becomes significant, then, who predicted these 'similar' predictions within all religions?

The Predictions Within the Religions

We already discussed the contradiction of Free will theory against the predictions in the same religion. Now, we discuss the mere predictions of any religion.

Predictions are the very secret handiwork of that ancient sorcery system in every religion!! You please listen to the reasons behind it. At first, we know the aims of all religions, and they are one and the same the world peace!!! We also know the handiwork of ancient sorcery system within all religions and sects, etc., and its aim is the separation of humankind only for hatred, pain, violence, and bloodshed in the society. Now, who won the race? No doubt, ancient sorcery system almost won the race! Now, the very important point is when the doubt goes from human mind he accepts the visible truth!! The earth's shape was believed flat, but the world later accepted the new discovery that earth's shape is an oblate spheroid. The world is now completely satisfied with the new discovery, and no people we can see debating on that topic as well. This again shows people can't divide in the name of any truth!! The

misuse of this exact idea has been used in the ancient sorcery system to divide human beings!! The introduction of “belief” by the sorcery system, in all religions, is for this purpose!! If one religion speaks about its fundamental beliefs, then there is no escape other than to agree with it because those said belief points are “fundamental,” so, beliefs are forced to sit in the place of truths!! And because of this, people never bother for any new discovery in the religious field as well. So, the easy way for ancient sorcery system to divide people was to introduce story-beliefs and their connected rituals in the religions. This “method” of exclusive belief-based religion paved the scope for many further religions and sects. Unfortunately, this method’s by-products have been those hatred, violence, bloodshed, etc. Every religion creates its own boundary with its a few exclusive and basic beliefs, and they build the army for its expansion purpose as well! This is the belief-strategy of ancient sorcery system. Now, the secret of predictions is that they give vague ideas in advance so that when a person creates a new religion, a group must go with him and some must oppose and remain in the old religion. If all the people converted, then, the purpose of the ancient sorcery system will never materialize. We know there was no smooth acceptance of any new religion in the past. Also, we know how people suffered at that time and in the later period. So the secret purpose of the predictions is to create confusion in the human mind.

Every religion predicts about the final conquering of this world, is it possible? The only possible thing out of that prediction is exactly the bloodshed!! Today, religions are waiting both great and vice personalities to appear on this world. If a great religious personality comes in other religion, are you ready to accept him? If the answer is ‘No’, then, the prediction of vice personality comes there for your help!! With this you counter and blame that great personality as vice, and try to save your own religion!! And again, the world will be divided and a pool of blood will be the final result. My dear brothers and sisters, I know very well these are the handiwork of that ancient sorcery system. Goodness is the God, not the beliefs. Let us fool the ancient sorcery strategy of separating human beings for its purpose by uniting under the great qualities of our Gods. God is great, no doubt, this is because God has the greatest qualities, but the beliefs and rituals are the least because they are the consorts of the ancient sorcery system!

Karma Theory

Karma theory speaks about the past life's deeds that responsible for present birth and its happenings. It says that the born quality of a person, born as good and lives as good person, is directly connected to the past many lives' positive accumulated deeds. Here, one thing is proven that the good person inherited a majority of good deeds in his accumulated karma. Now, if you say present life's karma of that good person is the one fixed quantity even in random method from his accumulated karmas, then, due to his majority good-deed accumulated karmas, he has to get his present life karma at least a few more good results than the bad results. That means, at least he must enjoy his present life more than suffering. Unfortunately, we have been seeing that the good people suffer more in their lifetime than bad people, and sometimes, good people suffer terribly, until their death, without any joy of the results of their past much accumulated positive deeds!!!! Premature deaths of infants and children, according to this theory, show the irregularity of that theory because a universal law cannot behave such an irregular way!

Ancient sorcery system is a many thousand year-old system, and its invisible dark hands play in everybody's destiny in this world!

God's Testing and Human Destiny

We have seen already that 'God's testing-belief' is not meaningful and also it makes the God cruel. Then, there will be a natural question that who is responsible for those unexpected bitter events, which happen in everybody's life. The answer is not "the God," but the answer is the ancient sorcery system!!! Nobody is testing human beings, but those ancient sorcery powers have a regular plan in improving the power of its sorcery system. Without giving some kinds of torture to human beings, they can't do that work, and this is the reason we can see the 'systematic repetition' of events in all the ages. This is the reason some of the astrological predictions come true!! It is unbelievable that it has spread from individual to the total world population!! They plan every individual and their family and their life and quality of each person, etc. They plan caste superiority and they plan sect superiority, and religious superiority, and also violence and wars in this world. When a boy or girl dies, don't blame God for that or don't say it is God's testing, in fact, this is the one of the plans of this sorcery system. They need in their system premature deaths of souls, starting even from infancy.

You may be shocked to hear these points, but unfortunately this is the fact. Please think one point that I have given many secrets of that ancient sorcery system, but there are so many secrets remaining, which I don't like to reveal at all.

If you are shocked to hear that 'the cruel' ancient sorcery system is responsible for your destiny, then, my one sincere question is "how did you bear the idea, without getting shocked so far that 'all loving' God is responsible for your kin's premature death, for His mere testing purpose"?

The Claims of the Religions

People of every religion believe that their religion is superior to other religions. Anybody can believe anything, but nobody is ready to know the meaning of the word religion! In fact, we know that nobody created a new religion, but they only created so many different and contradicting beliefs and rituals. When we try to pick the essence of any religion, then we can clearly see that they were the words of very ancient Great souls. These words were created before many thousands of years and then there existed no religion under any name. Thus, it is clear that those words of very ancient Great souls are the essence of all present religions. Those ancient words, in other words, can be called as both the earliest and last religion of this world! All other religions tried to keep those words within their exclusive belief-cages, and named them! This naming became a curse and there started the unending bloodsheds in the name of those names!!

Now, we see only those different belief-religions or the ritual-religions! There are so many easy rituals in the gallery of each religion! We have one type of ritual for earning the merits, and we also have rituals for washing our sins! Even to drive Satan from our hearts, we have external rituals! This means, without becoming a good and pious person, people get everything through many easy ritual-applications!! Thus, naturally people lost sympathy, love, etc., the positive qualities, and developed dreadful qualities like cruelty, treachery, etc.

So many Great souls tried to interpret religions in the real perspective, but not succeeded only because of the power of these established selfish ritual-religions! Had we accepted the words of those Great souls long before, we would have lived today in a heaven on earth! Still we have one last opportunity, if we brush it away, then the powerful cruelty of human mind will never allow again the mind to turn towards love and sympathy, and no doubt it will be the dead end of humanity!

Definitions of God and Religion

Intention

Hospitals are there many in the town, but people go there with the only intention to get a cure. In the same way, the “intention” of the religion is really the real-religion, but not any exclusive rituals or principles! Purification of the human heart is the real intention of all the religions, for that, they give different bits of advice. Unfortunately, they are mixed with a thousand times more unwanted rituals, which buried the ‘intention’ of the religion completely. If God comes and tells that the religion is untruth, hatred, and immorality, then, everybody will neglect those words of Him because they knew that those said qualities will not purify a human heart. This shows that the human beings know clearly, even without any divine revelation, about the nature of God and religion!! The examples given above also expose a hidden secret that without universal truth, love, and morality we can’t have a God or a religion in this world. Now, we got clearly the definitions of God and religion. We also realized the fact that this essence of Gods and religions should be followed in all religions, or otherwise, there can be no real religion and God at all in this world!!

Destroying other country’s shining Sun means destroying his-own Sun, in the same way, destroying other religion equals the killing of one’s own religion!

Broad Mind

Broad mindedness is the religion, and the introspection is the method we need to attain a religious life! Can anybody guess a narrow-minded God? The original source of narrow-mindedness is Satan, and he has been influencing this narrow-mind on the people in the name of God and religion!!! Unfortunately, all those religious leaders who do religious-conversion are the direct preys to that influence!! Different people

practice religion in different paths, and when they sincerely reach the ultimate conclusion of religious life, they will find the essence of above statement, the broad mindedness, within their conclusions!! Since the broad mindedness is the source of universal truth, love, and morality, we can also write those triple qualities as the Religion, and practicing them as the real and great religious life.

Great souls laugh at those who fight for their religion because Great souls are wise people not the blind believers. Now, let us see the exact reason behind their laugh. Wise people always say that no religion can exist in this world, by claiming a separate identity of its own, without killing itself!! Then, what is the meaning of those words? Great souls say that a religion speaks about both the universal God and universal religion, and if any religion claims a separate creator God and religion of their own, they bound to kill that universal creator God concept and universal concept of religion!! Thus, the base of that religion is destroyed, and without the base that religion becomes only a foolish murmur. All the religions have been trying to fence and dig the trench around their religion only to show their difference and superiority! Unfortunately, they are unaware that they don't have any 'religion' within their compounds, except the influence of that ancient sorcery system!!!

Dear brothers and sisters, this is not the notion or mere logical conclusions, unfortunately, this is the truth. We need to think for an escape from that dangerous influence of that sorcery system, within every religion and sect, only to save our own children from the mouth of those sorcery-devils.

Belief-Religions are of the Same Kind

Though religions claim each separately superior to any other religion, in fact, they all are on the same path. Every religion claims its God, heaven, and rituals, etc. are superior to others! This proves, though they claim all those are universal factors, they are really claiming a private and separate heaven and God and not the universal one!!

Now, we can see the similarities between them. Every God-religion has many sects and different cults within them! Every God-religion is the propagator of animal sacrifice! Every God-religion is not strictly the propagator of non-violence, every God-religion suppressed other religions, and religious conversion is a common factor in all of them!!

We can see that every religious book has great sentences on great human qualities, but in practice, they all are replaced with mechanical rituals!!

Future of Religions and Their Sects

I can say one point clearly that the future of the religions and their sects in this world will be a total disaster!! There is no doubt about this. This is so clear because the planning of that ancient sorcery system is so powerfully meant this end! The ancient sorcery very intelligently produced an idea within every religion that they are the final rulers of this world. This is the reason people are blindly rushing to make their religion spread all over the world!! The truth is that no religion will win in the end, but sorcery alone will win in the end by converting loving-heart religions to killing-worst religions! The easiest method of sorcery to achieve this end is “beliefs”, and stronger the belief stronger will be their success!! Had we no idea of ‘belief methods,’ but known only the methods of God realization, we would not have fought even one time in the name of God or religion!! This gives a clear picture of the role of “beliefs” in that ancient sorcery- planning. These beliefs, blind folded even most intelligent people to not to argue against the silly and stupid idea of many separate belief- based creator Gods! Then, the only creator God is divided into many creator Gods by many religious beliefs, and the ultimate effect is the idea ‘the only creator God’ is killed by the God-worshippers themselves!!

The basis of every God-religion is not the God, but it is the words of the God! Religions say to lead a holy life [with truth, love and morality] to attain a better life after death, but when people fight one another for their religion, then they are really standing against the words of God and nearing the abode of Satan!

Now, I am not going to explain more about the ancient sorcery system, but at least a few of them I do narrate here. It has been accumulating its system’s power since it was born before many millennia. Unfortunately, it has not been discovered so far! They have been accumulating terrible cruelty and immoral sex feelings from all human generations. This is the reason why the society turned towards cruelty and free sex, even when this world got many sexless pure Gods and many religions of peace!!

No war was fought without their instructions. The idea “divide and cause fight” is the basic principle of this sorcery system. They divided the people under different heads, namely regions, religions, sects, cults, political parties, etc., and killed people for their sake!!! Now, everybody can realize easily the fact, why every religion divided into so many sects and cults and fought one another. If we want any solution to this terrible danger, we have only one option left and that is “thinking” and “realizing” instead of believing method. When we realize the God, then, we all will reach the same point that is God is always Truth, Love, and the fund of all good qualities. Thus, we get one God, even though the names are different!

This unity of all religions will cause setback to that ancient sorcery system, and that will cause it to withdraw its influence from the humanity. Only ‘thinking’ has the power to open the mind, but ‘belief’ cannot do it! So, realize your God and religion, for both your heaven and your own children and family’s sake.

The Utopian World

Everybody, including religious scholars, says that “we can’t change all the people of this world into good people.” What a contradiction! Religion is for that purpose, God is for that purpose and every spiritual idea is for that purpose!!! Oh, on the contrary, people were taught to hate and quarrel in the name of the same!! If the situation is so, then, how can anybody expect a Utopian world? In fact, human beings are not even ready to dream such a Great World due to their own selfish fanatic mind!! Everybody wants their king, their religion, their God, their prophet, their philosophy, etc., and beyond their selfish boundaries, they express the same in such a nasty way that they are false religions, false Gods, false prophets, etc. If this is the situation, can anybody imagine a Utopian world?

If we want to generalize a fact, then, before that, we have to test it many times. If we find all trials are failures, then, we can firmly say that idea is an impossible one. Unfortunately, the world never allowed a single test in the direction of the Utopian world, but instead, it falsely generalized that idea as an impossible notion!!

God, Religion and Freedom

We have the freedom to believe anything we like. Unfortunately, we can't do in the case of Truth! Nobody can believe a Truth anyway he likes!! God is Truth, He is a universal Truth, please think the reality of this point. There are many theologies or many mythologies, they are not alike, but compel us to believe the God as different stories!! One simple question is there, to every religion, "are you sure that your creator God-story alone is right?" Now, everybody answers, "yes"!!!! Is it possible???? Here, please mind a point very seriously that there are so many religions and sects in this world claiming their God-mythologies are right!! If we stay in this approach, we will never come to a compromise until the end of this world, and instead, we will be used by that ancient sorcery system to the last point.

Freedom to realise the God is meaningful idea. God is dwelling always within every religion and sect as the Universal Truth, Love, and Morality. Freedom of belief is possible only in the fields of literature, but not in the fields of realities.

Religious Conversion

Religion is not the commodity of any propaganda, and money won't help to acquire it as well. Religion is the way we live in this world that means we should live a pure and pious life as told in all religions, and it is nothing to do with the ritual side of the religion as well! Those pure lives of Great people, lived in all the religions, are the real demonstrations for this great religious life.

We know that universal Truth, Love, and Morality are there in all the religions. When this is the fact, from which religion to which can we convert a person? In an ocean we can't give a special region as a greater one, and similarly in the case of religion also, we can't give a better place to somebody than the previous one he lived!! Besides, we all have only one creator God in this universe. So, we can clearly say that conversion and religious propaganda are meaningless and nonsense. Unfortunately, human blood is flowing like a river in the name of the same!!

Here is a conversation with a typical religious scholar,

“Questioner: Is it not conversion a mistake?

RS: Religious conversion is not a mistake, and even the constitution allows it.

Questioner: In your estimation, how many people of other religions can be converted to your religion?

RS: It is possible until all the people of other faiths converted to our religion.

Questioner: Yes, now we can understand that you are a strong supporter of religious conversion, OK, but under the same constitution, if other religious scholars converted all the people of your religion, then there also you need to support conversion. OK?

RS: If it happens, then we will protest it at any cost.

Questioner: Then, it means that you are not supporting that conversion?

RS:[silence]”

People want creator God, but only their creator God! People want religion, but only their religion! People want religious conversion, but they must be the only converters!!

Oh! What a pathetic narrow attitude is this! It is really a big wonder, how these tiny narrow minded people are advising on that great and broad religion!!

Need of the Religion

Most of the religions speak about the faiths, but we should not forget the point that if those faiths are strictly against human good qualities, then people would never take it for a religion. This clearly speaks a truth that all religions speak about the truth, love, and morality, within their different faiths! This concludes those qualities are indispensable and the base of all the religions.

In the very ancient world, teachers used to teach those qualities without claiming them to their own religion or cult! They simply taught moral life, like science and mathematics, and the people lived accordingly, the society created there was the supreme one!! Later the habit of naming started, and the naming of different traditions increased. Another type so-called cult and sect were introduced to this world, and finally, the big one, the religion came to this world only to split again into many sects!! When the people started naming the great life, then there started the deterioration of the great life. Again, it created and increased the hatred between the separated ones, and finally it reached to the last point, the real inversion of great life in the form of 'bloodshed in the name of great life'!! Today we see the same at its peak! Today's religions forgot all universality of great life, and they are propagating the inverted great lives in the name of religions!! We know that the only possible service of any religion, to its society, is purifying the cruel minded people of their religion and to make them Godlike great souls. This service will help the society to get peace and the person to get heaven!!! Unfortunately, today, people are sending the people of other religions to the hell, simultaneously making this planet a hell, and finally they themselves enter into the hell out of their grave sin. Thus, the religious heaven theory became this kind of triple-hell theory!!!

Please, don't fall into the hands of that ancient sorcery system, and try to get rid of their influence. Try to interpret God and religion from their essence part than stressing more the ritual and the belief part of them.

Have the heart of Great soul, then, its wave will save the world.

Human Mistakes and the Religion

Here, nobody tries to convince anybody that in all those religions, no good people lived so far. Many number of Great souls lived in them. We still remember their great services to humanity, but remember that the religion means not only those very few numbers of Great souls lived and are living in it, but it represents the whole of its population.

At first, we have to know about the meaning of 'religion'. The religion is not a book. It is not a sculpture or a poem, to look at its beauty and enjoy them, but instead, religion depends directly on its followers' implementations of ideal life.

If the human beings are not living on this earth, then there would not be any religion. There are also a few religions without a God in them. This clears that the aim of all religions is to give a perfect life system to its people. So, we can now realise that how great the people live in a religion decides the greatness of that religion, but not the glorification of religious books. Let us look at the example, if scientists say that the new invention is perfectly written in the book, but not working practically, then does anybody agree with that idea? Nobody will agree with that idea and everybody will reject them as unscientific! Similarly we should view the religions. Thus, we get the conclusion that by glorifying one's religious text, one cannot glorify one's religion at all, but in every religion, how far the truth, love, and morality are cultivated, so far the greatness of that religion can be claimed. This is a very clear truth. Let all religions understand this point at first, and try to become greater religions the next, then, this world will turn into a heaven better than the possible heaven after death!

How selfish are all these religions, they go after conversion as their goal, instead of going for purification of every individual within their own religion!!

Religious War

Religious war is an absurd idea because it is the opposite word of peace! Again, we know peace is the opposite word of war. Yet again, every religion claims that the religion is peace and for peace. Now, the conclusion says that 'religious war' means "peace war", and it sounds like "light from darkness." So, we must realise that the religions stand only for peace and every war is considered only a war and should not be connected to any kind of divinity or holiness.

Now, we can see different types of religious wars! Some say, to convert people of other faiths they fight religious war. Some other say, to defend their own religion from the aggressor they fight religious war. Again some say, war for justice is the religious war. Yet again some say, a war with the strict war rules is called religious war.

First of all, let us discuss the first type of religious war. Every religion has the universal truth, love and morality as its main religious part and all other parts are only ritual parts, not directly connected to the religion! Thus, it clearly says that they are fighting a religious war only for changing some rituals of the people of other religions, and not for any change of main part or essential part of religion!!

In the second type, we see the claim that the defending one's religion from the aggressor is a religious war. Every country has its own defence system, and some fought against aggressors, but it is a mere war. Anybody may be the aggressor, but it is called only a war with the aggressor, we should not term them as the religious war.

The third type, they say that fighting for justice is the religious war. In every reason of war, one side must feel it as an injustice. Then, we bound to term all the wars as religious war! So, war is a mere war, we should not glorify it in any way.

The last type, they say that any war with strict war rules can be called the religious war. Under any strict rules if anything happens, then, we call them as the sport! No war has been fought anywhere under strict war rules, even myths say that Gods disobeyed the war rules many times in the war fields!!

So, war is only a war and cannot be given any kind of divinity or holiness at all. Please try to realise the fact that any kind of war, in fact, is the real enemy of religion! So, if human beings need religion, then their first and foremost duty is to maintain

Shree Omdeva Seva Trust

peace in this world. Moreover, this same 'peace' is theoretically claimed by every religion, though they all failed to achieve it!!

Religious Missionary

We need no book or library for explaining the trinity of words, the universal truth, love, and morality. The real missionary is he who lives these ideals in his life. The Great souls are the real examples of the real missionaries because their lives themselves are the sacred books of religions. Unfortunately, we see different methods are being used by the missionaries, for converting the people to their religions, forgetting the real and great path of those Great souls! This is a very dangerous and disastrous movement!

Atheism and Theism

Commonly the Atheism is defined as having no belief in God's existence, and the Theism is defined as having belief in the existence of God. Now, let us see the inner meaning of Theism.

God is pure that means, he is not untruth, hatred, or immorality. So if any belief compels anybody to believe a God, then, it says only to believe in the quality of God that is Truth, Love, and Morality. This shows that those who follow the path of untruth, hatred, and immorality cannot be considered Theists, but they should be considered Atheists. This is the scientific analysis of Theism. This is scientific because we can apply this testing method in all religions. In fact, in all different and contradicting religious myths' and their Gods' respective beliefs, there the idea of Theism is not universal. There, they compel to believe in some stories of God and rituals to call people the Theists! We find different stories and rituals in different religions, and thus, without any universal measuring standard, the term Theism loses its meaning completely!!

Path Towards God

People say that paths towards God are many, but the final AIM IS ONE. I really wish it so, but in reality, it does not exist at all. Let us examine the AIMS of all religions, and try to find FINAL AIMS are one or many. The AIM here means the God, heaven, salvation, etc. We can see that one religion and its God are explained in one way and another religion and its God are explained in another way! Thus, all the religions and their Gods are explained differently! One creator God is explained as many as God with Qualities, God without Qualities, God with form, God without form, God with brighter qualities, God with darker qualities, God with name, God in human incarnation, God without name, God who pardons mistakes, God who curses eternally for a mistake, etc. When we come to God's words, some places he says 'love me', some other places he says 'fear me', and again in some places he demands a total surrender unto him. So, we should say, "AIMS ARE MANY, and so, naturally, the ways are also many."

If human beings conceive an idea of one God, then these varieties are possible, but all claim that their ideas are from the divine beings. Then, those huge contradictions, about that one God, really confuse and make no sense at all. Sun is one. Yes, but we can't explain it dark or cold, but we bound to explain it bright and hot. So if at all 'one God' exists, then, everybody should have explained with the same explanations! Please mind the point that the astral beings are many millions in numbers and they have the independent power of narration as well. So, we human beings need a very powerful discrimination regarding this case.

If we need ONE AIM, it is there in the qualities of God and religion! A Satan cannot be a God, so, obviously, qualities determine the very existence of the God. Thus, the positive qualities like Truth, Love, and Morality can be considered the real and common God of this universe because without these qualities no God can exist at all. Now, we got the 'ONE AIM' that is 'Quality God'. Now, we got one broader religion as well, like one highway, with many lanes. This broader vision in all religions, even though their structure and beliefs are kept intact, can make a huge positive difference! This divine and broad vision of God and religion has the magical power of eradicating fanaticism and its bloodshed!! It got a mesmerizing power of divine Love which can

Shree Omdeva Seva Trust

convert whole humankind into one beautiful family!! It has a boon in its hand, which can light the whole world with peace!!

Fear of God

Some religions are there without a God concept in them. Some people argue if there is no fear of God, world will be filled with the cruel people. In fact, if we compare God-religions and Godless-religions, we get the truth that the God-religions have been creating more violence than Godless-religions on this planet! In the name of God, we know, for many thousands of years, people have been fighting terrible wars all over the globe. We can even see the great ideal 'non-violence' is given more importance in those Godless-religions! In fact, this great ideal should have been followed in those God-religions since the God is ALL LOVING and compassionate! Contradicting this great ideal the non-violence, we can see more religious wars fought in God-religions!! When this is the condition, we need not worry about those dangers of Godless-religions.

A person may withdraw from his evil deeds when he hears that he was wrong. On the other hand, those who knew about their own sins while wrongdoing, cannot stop committing sins in his life! In the case of religions, we see, those who well-versed in the ideas of God's curse, hellfire, and all other tortures for human sins, themselves commit sins without fear! This is really the extreme fearless attitude!! Where is the influence of Gods and religions then?

Now it is clear that the increasing influence of those hidden sorceries, within all religions, is the cause of this fearless attitude of the mass people. The power of the resistance of that negative sorcery system's viruses will increase, further within the religions, until it reaches its end point. Then, instead of religious people, we will see, only the religious barbaric people! This is the ultimate end of that ancient sorcery system because further no individual or religion can make any positive change in this world! For this, the ancient sorcery system is evolving without a break, just like the parasites, within religions and also along with the hard works of the missionaries of all the religions!!

In this condition, the only possible solution is worldwide awareness of the negative influence of this particular sorcery system, and gathering of all the people of this world, under the divine umbrella of the essence-part of the religions and universal

love. If the people united consciously, then that sorcery system's negative influence would be substantially reduced. This is the only hope ahead for a peaceful world.

Aliens and Ancient Sorcery System

We know that in this universe we can find so many earths and also the possibility of the Aliens. On the other hand, ancient sorcery system is different from Aliens, and that system was an ancient human creation. Those creators and the beneficiaries were dead in the ancient age itself, but that particular system, due to its self-intelligence, has grown worldwide!

Now, the one point we need to see that if Aliens exist in this universe, the creator God concept, in all those religions, gets a setback! This is because all religions mentioned all the different existences including Angels, but they did not mention other earthly beings like Aliens. Creator God said that His ultimate creation was Human being. So, if anywhere in this universe Aliens existed, then, it is another blow to the religions, just like the mistake they made in the case of earth's movement.

More about the Ancient Sorcery System

Good and Bad People, and the Ancient Sorcery System

The ways of the ancient sorcery system are different. I already explained many times about its origin. They mainly need the human feelings “immoral sex” and “cruelty” and they accumulate them and increase them steadily among all the population of this world! They have different methods for this purpose. Thus, the world goes towards an irreversible dead end! Marriage institution is the backbone of every religion, but unfortunately, in the end, the same backbone of religions will break totally! Then, the religions will exist merely for bloodshed and cruelty!!

The ancient sorcery system also needs one supportive human feeling that is the feeling of human suffering! For that purpose, they torture both good and wicked people. No doubt, they need the feeling of bad qualities, but they also want from everybody the feeling of pain and torture!! For this, they won't allow anybody live happily in this world. When Hero suffers, the same coin produces a suffering for a villain as well. In the society, villains also suffer in many ways, but we generally do not care for them. The only difference we can find is in the ‘feeling’ of suffering, good people feel more, but the wicked people, due to their quality of cruelty, feel a little less. In another type, some suffer more in the childhood, but some others suffer in the other stages of life. Thus, from the family fights to the world wars, each fight is being influenced and arrayed by them!!! Therefore, the rules and ideas are different in ancient sorcery system.

The Ancient Sorcery System and the Hatred Feeling

They create the fight within the family, fight between relatives, friends, castes, neighbours, different nations, different traditions, different sects, different religions, etc., and these are a few ideas used by that ancient sorcery system to increase hatred

among people. They create more and more hatred from all such cases and accumulate them for their future purpose. This is their secret technique for increasing hatred among the people of this world.

Dividing the people, and getting benefit out of it, is their game, and “unity of people” is their enemy all the time.

The Ancient Sorcery System and the Mental Problems

The ancient sorcery system has been collecting the problematic mental feelings from the beginning of its formation! Without this accumulated stock of human-disturbed feelings, derived at the time of different human mental problems, they cannot complete their main task of increasing the cruelty and immoral sex feeling in the society! There are two types of mental problems as far as ancient sorcery system is concerned. One is the real and obvious mental problems of human beings, and the other one is temporary mental problems! We know the first [obvious] type, but anger, jealousy, fear, doubt, perverted sex, conceit, feeling of sadness and excess happy feeling, etc., come under the temporary mental problems! They put a little mental disturbance [bait] on the human being, and take more, every time, from every individual. People think all these are natural and therefore give no attention to them. The real and obvious mental problems like madness, even including depression are their special cases. Now, in some family line its frequency may be more, but in the future, we can see that every family line will face the same. Now, the only proof I can give you is the difference between the frequency of the mental problems in the ancient past and today. In ancient time it was almost zero, and today it is almost common!! Now, the question raises that why it happened when this mental problem is not a contagious disease? Mosquito or any kind of bacteria or virus cannot increase these problems, then, who increased them? Even the medical science did not discover its cause up to this time, and they also can't find it in the future!

Sometimes this sorcery also invests more in the society and takes massive kickbacks!! It happens in caste fights, religious and sectarian fights, and also in wars and world wars!! There the hysteria of both cruelty and pain are at their peak. Thus, we can understand the connection between the ancient sorcery system and all mental problems.

Ancient Sorcery System and the Marriage

I already mentioned that the marriage institution is a temporary concept and in the future it will be replaced with the free sex society. This influence is increasing on

every individual on this planet! If people use the method of suppression to avoid this happening, then it will affect the people adversely and cause a severe landslide!! Freedom can be used in two ways; one is for good and other is for bad deeds. Now, the only way of transcending that befalling danger is the great realization of the concept marriage. A slave cannot realize any truth because Truth or religion begins with the concept of freedom!! Thus, among Great souls, we can't see any differences between man and woman. Here, gender is not considered the cause of either morality or immorality, but the broad-minded wisdom is only considered for the greatness of a person.

I have been generating so many anti-sorcery concepts to get some kinds of solutions for incoming dangers, and I found that the anti-marriage virus or divorce virus is very powerful. These viruses have been created and massively stored under every religious background and this is growing very fast as well! Oh, this is really very unfortunate! This will fall heavily on every individual irrespective of one's religion or sect in the future. The frequency of divorces will increase, and finally, the sorcery will reach its ultimate end, the marriage-less society. This is only the matter of time and all religions will collapse totally then!! I am so bothered in this respect, and for this purpose, I am experimenting to get a spiritual solution as well. I have been generating the anti-divorce concept even with the help of my own married relationship concept. I dared this idea, though with an exclusive spiritual strategy, only for reviving the base of the religion, which is on its way to extinction. The massive solution for this is possible only when we promote the greatness of marriage and its relationship. For this, people must sublime themselves into the sacred orbit of the great chaste life of 'ideal couple.' If this is possible, then only any religion will survive in the future, otherwise in the future, wild human beings will live in the city-forests without the religion and the civilization!!

The Human Thought and Imagination, and the Ancient Sorcery System

Most of their network system contains unbelievable psychic programming! I am not going to tell all of them because nobody can digest it. Above all, I cannot prove directly my claims, though I am following an indirect method for that purpose. Now, I am revealing here one more technique of that ancient sorcery, in addition to those techniques already said.

We think that our mental calculations are our own, but they are not ours!! All the human attitudes and behaviours are directly but very secretly controlled by those sorcery beings! This should sound foolish to most of the people, but unfortunately, this is the truth!! Human beings are being led by those ancient sorcery subtle beings.

They are hiding in the very secret places within the human body and mind!! The human body is the puppet in the hands of those beings. Human behaviour and human feelings are influenced by them. They systematically but constantly reduce the good character from the human mind. The most dangerous one among them is forcing the human beings to mistake the religion and God, and thus converting the sources of good into deadly bad qualities like hatred and fanaticism. The consequence is that the very Great source of goodness [God] is destroyed!!! That sorcery's puppets, the human beings, ignorantly follow the secret orders given by those sorcery powers within their minds. This tends people to mistake the religious life or the great life for fanatic hatred, conversion, and butchering of human being!!

Religious Theories and Science

Creation theory of religions says, God created, in this world, every living being up to the ape in the same manner, but for the first man and woman, a separate story is given for them and their creation was in a different way!! In fact, human being is a mammal and with a difference of better intelligence. Some believe that the first man and woman were born in this earth, but some others believe the first man and woman came from the heaven!!

Story tells many things, and the believers forced to believe without any argument!! If anybody asks how they reached earth and for that which vehicle they used, then there is no answer except the only argument that God sent them to earth!! In this way, stories got full of contradictions. Still, every religion is trying to establish its mythical stories as true events!!

Now, in the creation story, some religious people claim that for creating the stars, sun, and earth, etc. God used a kind of sequence, instead of creating everything in single day. They argue that is supporting the theory of evolution! Some also argue that God created all creatures from the water, and that also supports evolution theory! Unfortunately, they agree up to the mammal-ape, but the last step of evolution they do not agree. They say that the first man and woman were not produced in the way of evolutionary theory, and they also argue that they were not created by God out of water, but out of a different item, the mud. There they leave science and go after a mythical story!! That means up to ape, they argue that their religion is scientific, but when Human creation comes, they mock science for its evolution theory!!!! In this way, all the religions, nowadays, are trying their best to make their religion appear so scientific!!

The better surroundings have always produced better results. A scientist, if he failed to get the proper opportunities or surroundings in his childhood or after, should miss the chance of becoming a scientist. Thus, the surroundings are very important factor in the theory of evolution. Those ancient forest dwellers started the effort, the fight against surroundings for better convenience, and that effort alone led them to

attain civilization and made them reach up to this modern society!! Those who did not participate are still living in the dark forests.

If we argue God created human beings in the beginning, then we have to admit that the well civilized and wise Adam and Eve should have given the greatest knowledge which they got directly from the God to the humanity. This must have caused all early forest dwellers to live in a very civilized and with a grand religion. Unfortunately, against the logic of this story, we have the history of those primitive and barbaric people, who lived as the earliest forest dwellers!! Again, some people try to argue that the God has been sending his chosen human beings as his messengers only according to the development of human intelligence! This explanation does not answer the contradiction of Adam's great knowledge and his early barbaric generations in the dark forests. Besides, it also creates a logical argument that even though God is omnipotent, He was simply waiting millions of years, just watching the time, for human's natural intellectual evolution, in order to send his greater religion! And again, the argument claims that the omnipotent God, who created everything in the beginning, was not able to develop that much intelligence in the human beings which could make them understand His religion! Moreover, if we agree the idea that God did send His religion according to the intellectual development of any period in the human history, then, it also shows God's favour towards the modern people, by giving those ideas of his heaven, salvation etc., and rejecting those millions and millions of ancient human beings, who dwelled early in the forests and just afterwards without any of his religions!! We would have accepted the 'story' of the God if He appeared there in the forests and had given human beings His religion! He did not donate His religion there, but the knowledge of sorcery was descended to them from their own intelligence!! Was that also God's testing? Slowly, over millions of years, human beings developed their intelligence and later they moved to the village and started cultivation. Then again, after thousands of years, some of them evolved to the greater thoughts. They became powerful philosophers!! Still, the creator God did not appear with His books! Even later to this period, religion and creator God appeared!! Why did the creator God explain differently His religion in different places and cause the frequent terrible bloodshed? Again, some ask the question "why did not He create human beings, at His will, in the other planets or in its satellites of our solar system since He is omnipotent and the creator of the universe?" Here, the meaning of this question is whether the water is the cause of lives in any planet.

Here, we are not speaking against the essentiality of God. We need the God concept more than anything, but more stress should not be given to those contradicting stories. We need the God in the form of His essence. We need the God in the form of His light, thus, we can have many Gods or a creator God in this perspective. If we fail to see this point, no doubt, that ancient sorcery system will continue its systematic

use of its powerful weapon, the fanatic ghosts, to erase the human life totally from this earth.

Brief Explanation of God and Religion

Let us look at the need for this 'brief explanation'. If the creator God does exist, then what would he say? Will he ask all lower caste people to serve the upper caste people all the time? No. Will he ask the people of one religion to fight with the people of His own another religion, and will he enjoy those horrible killings? No. Will he say his old religions were his mistakes? No. Will he say that he had forgotten to add some points in his earlier versions of religions due to his forgetfulness? If the answer is 'No' then why do people speak in such a way? Throwing the Truth, Love, and morality into the invisible corner, people produced millions of books for explaining those insignificant rituals, and made the God mere an object of prayer!! This is really a blasphemy. When we witness those contradicting rituals why didn't realize that those are against the real teachings? Once the foundation of the religion is destroyed then all other explanations go wrong whatever be the context. Great souls always warned the dangers of the teachings of those narrow minded priests, and did you hear their warning? No. It is not enough even a lifelong repentance for the cruelty shown to those millions of victims of fanaticism. Let us think from the position of those victims of fanaticism, and then only we can clearly realize that those acts were devilish. A drop of tear for those people is equal to an ocean of knowledge about any religion since the God is kind and compassionate. A cruel person is not at all a human being, but he is a devil. What greatness do we see in writing of millions of books on God's mercy since that 'mercy' is being killed mercilessly? People didn't follow the universal divine love preached by those Great souls, but they even tried to project that divine universal Love as blasphemous!! No escape, all religions theoretically declare that their religions are for world peace, but practically everywhere we see with our own eyes that the religions are not for any world peace, but for devastating the world into many pieces!!

God, whether He is individual or principle, cannot do bad to the people. If He is the creator, then He becomes the creator of all those 'creator's religions', so he cannot

curse any religion. He won't care, the so-called conversions in the religions, and He must have meant only the conversion of bad and anti-social people to good and great human beings. The Great souls really followed those words of God sincerely and they changed so many bad people to good ones. Unfortunately, the same God's words also misinterpreted and used to kill or forcefully convert the people from other religions!!

We can't sit quietly when our house is on fire, like that a human being can't sit peacefully when the world goes terribly into the danger. For that, we need to expose the reality, which has been hidden by that ancient sorcery system. It is the time to open the eyes of loving hearts. God is Truth, God is Love and God is Morality, and less than this, there is no God of any kind. This realization is the only hope remaining in front of us. We know that the Truth is very sweet to the good people, but bitter to the selfish people. Still, the only and ever invented medicine for such disease, the dreadful social-blindness, is the light of the Truth. So, it is the time for all human beings to raise the flag of Truth, in their own religion and sect, in order to save the invaluable lives of the human beings on this planet.

The essence of the God and religion is within these three main points, and they are the universal Truth, Love, and Morality. So many Great souls lived these great lives. It is clear now if we simplify the God and religion as the universal Truth, Love, and Morality, they give a complete religion of Great souls. Here, we all are ONE, but only with the difference of different names and forms of those religions!! Here, we see no drop of blood, but we can see only the divine tears of great selfless Love!! Oh, a divine fulfilment!! Thus, the brief explanation of God and religion is the ultimate solution for the impending dangers of that ancient sorcery system.

The Exclusive Path of the Great souls

First of all, I already told that my first duty is to inform the world the very secret of that particular ancient sorcery system, which has not been exposed so far. Again, my second duty is to find a solution if possible to that terrible danger. The negative energies of that ancient sorcery system already covered whole world before many thousands of years and now its capacity is very much increased!! If we use other spiritual modes as a solution to this severe problem, then it will not work at all. The reason is that we have been experimenting with all those different spiritual paths for many thousands of years, but still we have the world today worse than ever since!! Every religion has its own different types of religious rituals, mystical rituals, a few drops of miracles, traditions, ascetics, seekers, and so on, and it will continue its course, but the world will go, without a doubt, worse than the world we see today.

We also had many Great souls in the past, though they didn't influence much on the common man, worked for all the human beings without dividing them. Their approach was total and not particularly for any individual benefits. This is the reason why I selected the approach of Great souls than other religious or spiritual disciplines.

I found that the only solution for the dangers of that ancient sorcery influence is the positive but the collective human mind, irrespective of caste, creed, sect or religion. This is because the very basic structure of that sorcery system is dividing people with any name and form. Religion, sect, cult, caste, nation, colour, etc., are the common factors they play with for generating violence and cruelty. We can't stop these horrible influences with the other spiritual disciplines, which deal with individual pursuits. Besides, for that, we must need the UNIVERSAL great ideals the so-called the universal truth, love, and morality. If we revive this path of great souls, which has been familiar to all the religions, and again with a new dimension, I hope, we can withstand those attacks from them. Here, nobody is harming anybody's

Shree Omdeva Seva Trust

religion, but, all we need is a small change in the implementation of religions, which increases the dignity and greatness of every religion!

Divinity

The word divinity always connected with God! In fact, we should know that divinity is the atmosphere of the human heart, exclusively created by the positive qualities. So, divinity is the purity of heart, the product of the human good nature, and it is nothing to do with God in person or in principle!

We can see many Great souls lived in Godless religions, and this is the proof that God is not essential for attaining divinity. Here, again we should not forget that without this divinity, no religion or anything you call as spirituality can exist!! A devil cannot attain the spirituality because we know, without goodness in one's heart there cannot be any spirituality of any kind. Thus, we can conclude that at first, we must become divine, that is good at thought and heart, only then it is possible to have any God or religion! It is clear that the creator of divinity are those great ideals the universal truth, love, and morality, and without these ideals, we can't produce any kind of purity or divinity at all. Moreover, without those qualities, no God or religion will become a divine one! Unfortunately, all the religions, in the name of God and religion, are concentrating on those mere beliefs and rituals, which in turn created hatred and bloodshed and not the broad divine hearts!!

Nobody can skip divinity in spirituality as well as in the religion. Ones they skipped means they skipped God, religion, spirituality, and everything related to them, and also clear that they are taking shelter under the devil's roof! This again clears that if anybody adds violence or lives immorally within any religion, kills his own religion and his God concept as well. Thus, the real enemy of a religion is not the people of other religions, but they are those huge numbers of followers of the same faith who have negative qualities!!

Unfortunately, we see, the people with negative qualities are respected in the society, and today they are the protectors of the religions!! They are so ignorant that they even do not know a vice person cannot protect the religion and God, which are the mountains of positive qualities!! This shows absolutely that all human beings have been trapped within the influence of that terrible ancient sorcery system, which has been trying to misinterpret the God and religion for its own purposes! If no change

Shree Omdeva Seva Trust

made in this respect, in the near future itself, no doubt, everybody will act like a devil in the name of God and religion.

Evil Doings and the Religion

Some religious scholars argue that evil doings of people are nothing to do with their religion! If so, then, good deeds also get no connection with the religion! In fact, we can compare greatness of one religion with the other religions only by comparing the number of good people in them! A religious book becomes holy only because it speaks about the goodness of human behaviour, but we must think that book is not the machine which has the ability to create holiness in the hearts of the people of that religion. If anybody starts counting only good people in one's religion, he may get only a handful of human beings, and this can be called the real and proven volume of that religion!!! In fact, a few people are really the religious and God-loving people, and all others are not! Now, the speciality of these majority claimers-religious people, in every religion, is that they claim they are the saviours of the religions, and the result, we all know, is bloodshed! They also make noise against atheists, but they keep quiet against those immoralities of the people within their own religions! This is another trap-theory of that ancient sorcery system. This trap-theory says "bad people can only increase bad people, but they can't increase good people within the religions."

Please, see the danger of this sorcery and save the humanity.

Non-Violence

If we strictly see the aspects of violence, then, we can see that it is basically divided into two parts. One is attacking part and another is defending part. Great souls advise people to stay in the defending part. Human beings have right to defend their body, family, etc., above all, the humanity. Great souls argue that defending humanity is the ultimate religion because every religion claims that their religion is for PEACE. Nobody can attack others in the name of religion because we know that religion is for peace.

Now, we have only one choice, either to remain in our God-religion of peace or to reject it and involve in violent Satanic-activities. Thus, if we want to spread our religion, the only way is to spread the God's ultimate commandment the peace, which is the product of the God's quality the universal Truth, Love and Morality.

The Real Religious Growth

Becoming larger is growth, deleting incorrect ideas and adding correct ideas is also a kind of growth, avoiding untruths and adding truths is again another kind of growth. If we refine anything by separating unwanted items that is also called growth. In brief, increase in a quantity or in a quality both can be called growth.

The well-known example for such a social growth is the growth of science. All scientists appreciated and respected all earlier scientists and absorbed all their real discoveries. Based on that previous knowledge, they developed further studies and again achieved still better for their society. If scientists hated one another and their discoveries, we would be travelling on bullock carts by now. Unfortunately, religions show one book in one hand and say it contains everything, and if anybody utters a little better or a little less, then they declare them as blasphemous!!!

Now, the word 'growth' is meaningless in religions. We can clearly see the religions use an unwanted type of growth, instead of a good and healthier growth! Let us see what religions actually doing in the name of religious growth. Those religions who believe in creator God claim that their religious books were given directly by the creator God, but each claim's that all other religions have many mistakes in them!! They fight one another for the greatness of their own religion. Now, we must think one point, if there is a creator God and had He given really all these religious books to human beings, would he like this? Would He wish a particular one of His religion's victory over all other His own religions?

Religious life never starts with a particular mode of prayer or any other ritual, but religious life starts only with the sacrifice of one's selfishness and pride. Everybody knows on this planet that the differences in the style of prayer and rituals in different religions caused horrible bloodshed throughout the ages, but when a person sacrificing his selfishness and pride, hatred vanishes and in its place divine Love appears, and we attain peaceful society instead.

Everybody knows that the Universal and divine Love is God himself. In short, religious development comes only when we accept all the truths and reject all the untruths from the angle of that divine concept the universal Love. Unfortunately,

truths regarding rituals and prayers are claimed as the ultimate religion by almost all the religions!!! We should have the common sense to guess that the God never cares our style of prayers and its frequency, but He must be looking at our behavioural development. If we had cared the God's latter advice, today we would have achieved the one greatest religion for all, with the great world peace, even along with the different religions' exclusive identities!

Religious Interpolation and One Religious Text

I already said about the real religious text, and that it is the numbers of good people exist in one religion rather than any book. Here, we have some rationalists' arguments against the claim of one-religious book's greatness. They say religious texts were written not by prophets themselves instead they all written by others, thus, allowing a vast space for interpolations and omissions. Human beings always mistake something for some other thing, and a brilliant man also commits such a mistake due to the ambiguity of sentences. This is the reason they argue that the possibility of original words of the God would be confused or mistaken by prophets, which are now in the religious books. They argue this too is a kind of interpolation. Again, there was the possibility of forgetting most of the words of Gods by prophets, and this, in a sense, becomes a mistake of omission of God's words, and this compels logic to call every religious text as an incomplete text!

This is why, in general, Great souls request not to go after finding differences between one another, instead, try to find common factors among all religions, only to serve our own God and religion, and to lead a better religious life.

We can call both pure water and muddy water as 'water', in the same manner; the Great souls and selfish people call the name of the same God. This means, Great souls never mix the mud with the pure water, the God, just for the purpose of the mean claim of religious greatness. Again, this also means, even though the name of the God is the same, the sinners and nasty people can never mean the God in the same way the Great souls mean!! We can see religion only beyond the religious book, not within the book. How far the kind and good people are produced in a religion is the real religious book of that religion. In other words, if religions filled with cruel and immoral people, then the religious book loses its total existence, and the claim of the greatness of the religious book then sounds absurd. Now, who are the good religious people? Good religious people speak for God that means they speak for the good qualities, and live

for God that means live for the good qualities. The bad religious people speak for God, that means they also speak for the good qualities, but live for Satan, that means they live for the bad qualities!

What is a religious text? It is a set of beliefs and rituals and philosophy, etc. meant to practice in life. Thus, in other words, the path or rituals, which one group of people follow, is their religious text. We can see so many sects in a religion, with different interpretations of that original text as well as with many exclusive rituals. When the different meanings come to the sentences, there the book will not remain the same. This means only when everybody gives the same meaning or interpretation to a particular book, then, that book can be considered, "one book" but if we have different meanings and interpretations to a book for different sects, then, they only become different meaning-interpolations!! The Meaning-interpolation is very stronger than the sentence- interpolation because we can interpret the added sentence in accordance with the earlier original lines, but in the meaning-interpolation, it is not possible and they bound to remain separate forever!! Again, there we also naturally get different meaning-texts for different sects and cults within the same "one book" religion!! In this way, there is no religion exists with single religious text.

God With Form and God Without Form

In subtle worlds, there the astral beings can exist both with and without the subtle bodies. If they want, they can appear with a subtle body and when they don't want they can discard it as well. Some mystics said that they had seen their God, and some other times, some other narration also says about the hearing of mere God's voice without God's form! This means, Gods can remain without a subtle body and can speak as well! In other words, these Gods are not omnipresent Gods, but they have the power to create any form or subtle body including human-shape! Unfortunately, this simple technology of the subtle world caused bloodshed in this physical world!! People even fought thousands of years only for this silly one difference that is "God is without form and God is with form!!!" In the same way, all other religious differences, really, are very silly, but ignorantly became the sources of terrible wars!!

Please be aware of that ancient sorcery system, which has been playing a never-ending bloody game with the ignorant people by misusing the religion for that!! People cannot get any peace of any kind until the end of humankind if we go with those sorcery's strategies!!

Claiming a True Religion

If I want to claim that my religion only is right, then, I should prove that claim. My claim can be acceptable only if my idea makes 'better peace and happiness' to the whole mankind, but less than that my claim is futile. Unfortunately, every religion claims of its perfection, but practically, it did only human separation, hatred, and bloodshed. Once the idea of a framework or a separate body is given to religions or sects, then and there the main aims of the religions blow off! This is because the eternal Truth and Love, the backbone of any religion, are forced to live within the limits of these religions and sects!!!

Look there, different religious scholars are raising their hands to a question "which religion is perfect in this world?" Every scholar from all different religions and sects is ready with his religious text to prove that as well!! Finally, the questioner asked one more question, whether they agreed with the idea that all the religions were perfect. To this question, everybody answered "no". Now, the questioner warned them, "you are not the advocates of religions because you kill the same creator God and those of his basic commandments Truth, Love and Morality, by hating one another."

The secret planning of that ancient sorcery system is to destroy God concept from the world and establish devil's concept instead. For this, they have so many methods, but the very important one among them is religious hatred and fanaticism!! Now, the science of "concept" is in the subtle world [human mind world] works differently, there, if more people denounce a good deed, then the power of that Good deed goes down, and instead, the effect of bad deed erupts! In the same way, religions while hating and fighting one another, there, ninety percent of God concept is denounced [killed] and only ten percent of God concept is appreciated!! This shows the religious world has been killing God concept by a net eighty percent all the time!! The ancient sorcery system succeeded in creating this horrible feeling of fanaticism, by making human beings stick to the strong idea "belief."

A small boy demands another boy to come to his house because he claims the Sun shines always brighter above his house than latter's house! In the same way, religious

scholars claim people of other faiths to convert to their religion. They claim all other religious words are outdated and worthless. This will lead only to end the human life in this world before its natural end.

Everybody says that the religion is for peace, but it never happened. Now, the only option left is to decide whether we want fanatic religions, or should we gather together to glorify the 'world peace,' which is commanded in every religion, as the main function, for humans' happy life.

If we can stay strongly in the main portion of religion that is the universal Truth, Love, and Morality, then, the ever-wished dream of a permanent peace to this violent world will come true!!

Religious Conversion

Every religion claims that it is a perfect religion, and also it is trying to convert the people of other faiths to it! If the religions are claiming that others are imperfect religions, then, one important question arises and it is why didn't God cause a soul to take birth in that 'claimed' perfect religion? Why did God permit most of his children to get birth also in those imperfect religions? This destroys the impartial stand of creator God! Can you agree with this theory of biased God? If you don't agree, then you can't claim your religion alone is superior. Since the water level of greatness is the same in both sides, you also can't convert any people from other faith to yours as well.

The creator God concept was discovered by human race only before a few thousands of years! Until then the people used only different positive powers or Gods for their worships in this world!! Why creator God did not give his perfect religions to those millions of human beings earlier? Is he meant all of those earlier people only for Hell?

Please stop all such silly arguments and concentrate on the real religion lies within every religion. That real religion is the 'practical life' of universal Truth, Love, and Morality. If anybody tries to develop this and also tries to develop among others, then, he or she becomes the God's perfect religious missionary. If you pray a thousand times in a day, physically that may improve your health, but it won't improve your heart. The concept of the God is the Lord of heart, and you can't make Him a sword of Satan.

Animal Sacrifice

If 'God is cruel', no doubt, He will be very satisfied with the animal sacrifice, and if 'God is Love', no doubt, He will not be satisfied with the animal sacrifice at all. We know that animal sacrifices are common in local sorceries. So, I can't agree, in any way, with animal sacrifice for God concept. Again, we know rituals are based on mythologies, and nobody can question a story, and the logic never works in the belief-stories as well. The term 'Sacrifice' is the symbol of the human 'great' deeds. Sometimes one may sacrifice one's whole life for poor or for a noble cause, and thus, the word itself is the symbol of great Love. Unfortunately, this symbol of love, the sacrifice, has got another symbol, which has no connection with the Love, but that is connected with animal-killing!!

God is always the universal Truth, Love, and Morality, and so, there cannot be any brutality.

Eternal God and Religion

Eternal means without the end or without the framework, but religions speak about the Gods with individualities, and the religions with boundaries!! So, these cannot be considered the eternal concepts. If anybody speaks about eternal principle, then, it means that there is no limit of any kind, which includes the framework of any type of individuality as well. In fact, Gods are narrated as king-like individuals and their religions as kingdoms!! Besides, the religions have been fighting bloody wars, one another, for their religious kingdoms' supremacy!

We know that universal Truth is eternal and selfless Love is also eternal. We also know that any God without these qualities cannot be called God at all because we depend on God for good qualities, and we point at Satan for showing evil qualities. So, in reality, God and religion are nothing but these basic divine qualities, irrespective of name, form, nature of heaven, gender, and different beliefs. We really need these great Gods and religions in this world, unfortunately, though they say "God is Truth" and "God is Love", they go after belief based ritual-religions, which are not eternal religions, but they are internal religions within the belief-boundaries. Within the belief-boundaries of any religion, if anybody tries for great broadminded words, it will be washed away by their own 'boundaries' of religions, this is because boundaries never allow anything to become broad!!

A Great soul is one who cares not any boundaries, but cares only the essence of the religion and God.

Religious scholars claim they are explaining their religious book logically and scientifically, but when we ask, could they do logically the whole book, then, they say that it would not possible because their religions' foundations were made up of beliefs!! Once the foundation is the belief, then, there is no question of any logic of any kind. This means that the logic cannot be used anywhere within the religion if 'belief' is kept at the base of that religion. Now, we clearly get the purpose of performances of religious scholars on the stages, with the claim of "logical discussions," is for undermining other religions, and also for converting people from other faiths!! Save the religion by saving its essence, then only the future generation

will be saved, otherwise, by these belief-religions' fanatic beliefs, it will be devoured totally!

Protection of Religion

Nobody can protect any religion in this world because religion is not an object. Besides, God and religion are not anybody's properties. Again, most of the people say that the God is almighty, so it is blasphemy to speak about saving God's religion!! Unfortunately, people think the religion only as those rituals and textbooks, and this is the real cause of all Satanic-bloodshed in the name of God and religion in this world. If the people start chanting only one line of every religion that is "God is Love, God is Truth, and God is purity" then everything is done, and we get a great peace out of our God and religion, otherwise, people will suffer until the last man in this world with an all-loving God's religious book in his hands!!

Degree of Religious Collapse

We can measure this by major two standards. One is the quantity of cruelty, and the other is the quantity of immoral sex. This is because the ancient sorcery system destroys any religion with any one or both of these ways. We need not compare now the kings and dictators of the past because there, one individual may cause a great cruel war to this world. For example, Hitler was a cruel and fanatic person. Unfortunately, today we have so many Hitler-like cruel fanatic common people in this world, and this fanaticism of common people is very dangerous because every individual's quality, here, equals the Hitler's fanatic cruelty. If the number of such people increases, those weapon-less, fanatic, Hitler-like people become horrible potential dangers. Thus, we can say that the 'number' of cruel and potential cruel people, and the 'number' of immoral-sex people really cause the destruction of any religion.

The Great Lives of Great Souls

We know only a little about the great lives of great souls. So, here, we can discuss in detail. Great souls lived in all religions, though not exactly in the same way. Now, we are going to analyse that type of life here. For this purpose, we need to compare this type with the other types of lives in this world.

First, we compare between common's worldly life and great soul's life. Worldly people give more importance to worldly achievements and naturally, they are not the people who are concentrating on their personal life! They always think further developments in their comforts, career, money, etc., and this attitude, naturally, make them without the personal life, the life of pure relationships and peace of mind. In fact, the ultimate attainments of human life are these pure relationships and peacefulness of personal life, and all comforts and other achievements work as mere the complementary factors. Moreover, the common people because of their "further achieving haunting tendency," lose their concentration on their already achieved comforts. Thus, they get dissatisfaction in all their achieved fields as well! Now, the common people lost both their worldly comfort-life as well as personal life. This is the total loss, and also they face mental tortures until the death!! On the other hand, the Great souls are mainly concentrating on the personal part of the life, and because of their daily-spiritual practice, they naturally possess that great peace of mind and the purity of relationships as well! While enjoying the personal part of life completely, they enjoy, because of the absence of haunting desires, the worldly comforts also with full satisfaction. Thus, Great souls can enjoy both sides of the total human life!! This shows that the ultimate enjoyers of human life are these great souls, the broadminded divine ideal lights of this world! Now, all common religious people pathetically live for rituals, fanaticism, etc. Besides, like common worldly people, they lose both their personal and worldly comfort-life as well!! Thus, these common religious people lose their worldly life more even than the common worldly people!! Here, one more

difference we should remember is that common people live the immoral life and become the social curse, but the common religious people due to their additional hatred and fanaticism become worse than that social curse!! We know that we should not compare monks in this case because they rejected the worldly life totally. Thus, we can conclude that the real enjoyers of life, as well as the real ideal people of any religion, are these Great souls.

Please, create such essential people in your religion, and that will purify both the religion and society with the wonderful God-gift, the world peace.

Living With God

When people live with God, they live the life of Great souls, but when they live for God, everybody starts fighting to defend the only one creator God, forgetting totally the living of great religious life!!

When people start living for God, then, they start converting people of other faiths to their religion, and the desire for making their religion the only world-religion raises. All religions are now on the battlefield to make their religion that one final religion in this world!!! This is the situation that ancient sorcery system has been waiting for, and it will drive the chariots and ride the horses on the battlefield, only to make everybody fail totally, by pushing each one of them down to deep immoral ditch. This waits for all the religions. Thus, try to live with God like the Great souls, who had lived in every religion with the universal Truth, Love, and Morality as the essence of their God and religion, but cared rituals only with minimal importance.

Golden Age

Here is an example, a teacher gave marks to those students whoever wrote the same answer, but he did not give marks to those who wrote different answers other than the one real answer. Here, the meaning of 'no mark' shows that they have written not a true answer. In the same way, we should have only one definition to all the religions and sects of this world. Unfortunately, all those religions, sects, and cults, propagate their own different answers or definitions instead!! They are not that one true universal answer, and this is also a total distortion of the reality! The absence of the real inquiry, and relying adamantly on one's exclusive beliefs caused millions of innocent deaths!! Devil dances in the form of fanaticism all over the world all due to those different belief-definitions!!

Now, can anybody dare to say their God's abode is without universal Truth, Love, and Morality? No, they can't because they know very well that the place without above divine qualities is the Hell. Thus, this becomes that one answer we get, universally, from all religions and sects from all over the world. So, let us try to have a meaningful God and religion. If we stressed the real essence of the God and religion that is the quality of God and religion, then, even though we have different names for God and religion, their status would remain always pure and pious. Once everybody starts concentrating on the qualities of God and religion, then, even the Atheists demand that peaceful solace than anything! There, all the differences end because everybody got the same answer that is always true and great. The ancient sorcery system fails then to create bloodshed due to this powerful positive anti-dot against it!! Then, every religious book starts radiating the great and divine light of Love and Peace. The horror of wars ends, and the terror of fanaticism bends, everywhere we can see a great positive change, which is the way of blessed life of the sage, and we call it Golden age.

Religion-part and Spiritual part

Is religion a textbook, some beliefs, and rituals? Is religion God, heaven, or liberation? No, nothing said above is the religion. People mistake these spiritual factors for a religion!! That means, religion and spirituality are two different things and have been unfortunately mixed together. We can call everything is a religion, but then, what is the meaning of spirituality? In fact, our soul, God, and all types of religious practices for God's grace, heaven, salvation, etc., are only related to the spiritual part!! When we separate spiritual part totally from the religion, then the only one factor remains is 'the great rules' made for the betterment of the society. These social and individual rules which are meant for the better way of human life are called the religion-part of a religion!! Thus, we have the spiritual part and the religion-part in any religion. Some religions do not have a God in them still they have great rules for a better human society. Thus, one point is very clear that without the spiritual part there can be a religion-part, but without a religion-part there can be no spirituality at all. This is because spirituality needs great human quality and pure life for any kind of heaven and spiritual salvation!! We know that today we use the word 'religion' only for a religious text with a set of beliefs and rituals!

In the above context, what does the exclusive religion-part expect from the human beings? In fact, it expects 'selflessness' the only quality of human being, which is the source of broad mind! This is because only the selfish people, we see, are the anti-socials in every society. That means this selfless quality meant for the purpose of a smooth and peaceful life of every individual in the society. Again, if we try to see the brief and basic idea of this religion-part, then that idea implies "Let others live happily first, while you live happily in this world." This idea of religion is common to all the religions. So, in fact, we all really have only one 'essence' in all the religions, but only with different types of spiritual practices!! Thus, we can realize the fact that in every religion, the religion-part is the same and simply directs us to a greater social life. Again, this is also very simple and a child can understand it fully!! Unfortunately, people are deliberately making this religion-part a complex one for their own benefits!! When people need to convince others that they are greater than other caste

or religion, then they need to cover this real 'essence' of the religion first!! For this, again, they need many books and libraries with different roundabout confusing explanations as well!! We know all the religions and sects, which argue they are greater than others, are following this way!! In short, we have only one simple religious question. Unfortunately, instead of getting the similar answer from all corners, we get different and contradicting answers from different religions and sects on the basis of exclusive story-beliefs!! God and religion are not anybody's angle of perception, but they are the truths, and every religion stresses this point as well. Then, where is that expected 'one same answer' or ONE TRUTH? Please clear this doubt WHERE IS THAT TRUTH?

When we all realize and follow that common essence of every religion or common 'Religion-part', with independent and separate spirituality of their own, then the religions never miss their exclusive names. They never miss their beliefs and rituals as well. Besides, they get a vast freedom to worship and practice their respective Gods with their own spiritual methods. They can also have their Gods' graces, Heavens and Salvations according to their religious methods. Here, people do only one simple change, they give more stress to their religions' essential parts or religion-parts, where only universal truth, love, and morality practically work. Also, they consider all their different stories, beliefs, and rituals as mere choices. We must remember, though people can have respect on their stories and rituals, we should not go for any kind of argument against other religious stories and rituals. This is mainly because the ancient sorcery system has been working very fast to end the feeling kindness, morality, and also family life of human beings from this side of every religion!! The ancient sorcery system so far succeeded in its work only because it has got success in dividing the people in different ways. We know that the purpose of these different divisions was to create fight and bloodshed among the people. Again, this is only for increasing the 'cruel mind', slowly, generation after generation in the world population!! The specialty of the essential part or religion-part is in this part all the people can gather together under one roof that is 'the pure life'! This should bring THE WORLD PEACE which has been the dream of this wounded world. Besides, this 'unity' of human beings will surely dilute extensively the influence of that dangerous ancient sorcery system, which has been trying to disperse people with its different idea-weapons!! If we materialized this, then we also materialized each religion's main aim the so-called peace, in other words, the Golden age! Please realize the truth that this Golden age cannot be attained by swords of kings, it cannot be attained by any kind of separate religion or politics, it also cannot be attained by any science, but it can be attained only by the great hearts of the world people!

God, Satan, and the Great Soul

We know both God and Satan have power. Unfortunately, influence of devil is more on human beings than God! The best devotee of God also sometimes suffers horribly! With these practical proofs and experiences, we cannot argue logically that the God is an omnipotent being. Now, only difference we can see between God and Satan is in their qualities. God possesses always good qualities, but we know Satan possesses bad and horrible qualities. If anybody tries to impose some bad qualities to God, then and there he erased all the differences between God and Satan. This infers God must possess the great qualities like universal Truth, Love, compassion, etc.

Now, Great souls are the people, who practice those godly qualities in their life. They are the Truth observers with great compassion in their heart. Now, if we compare both belief-people and Great souls, who will attain salvation or heaven? No doubt, boldly we can argue that the pure- hearted Great souls deserve them. Unfortunately, those 'belief people' only follow some physical rituals, some posture prayers, and some other external physical observations and with these, they prepare for heaven or salvation!! Besides, with these silly notions, they also mesmerized others that they are the only people who could reach the abode of God after death. They also believe everybody outside their religion is for Hell!! This method of belief is really very easy to perform as well! Here, no stress is given for purification of one's mind. Thus, this easy belief-way produced millions of horrible souls in every religion. According to their belief, any Great soul outside their religion is also a Satan, but the worst soul inside their own religion, with some regular ritual practices, is a future heaven-dweller!! Even the Greatest soul like Sri Buddha has been believed a fallen Angel or Satan only because he was not a follower of their religion!!!!

Now, we should know one point and that will surely clear most of our confusions. The point is that the Satan cannot have the quality broad mind or the great universal Love. For example, Sun cannot produce the darkness, and in the same way, darkness

cannot produce the Light. If they produce, then they will lose their existence totally!! In the same way, Satan cannot live with the great qualities, but he can pretend to be a Great soul. Still, he cannot live a selfless life of a Great soul. If anybody tries to argue against this, then he forces Satan to lose his total existence!! So, if anybody calls those people, who lived a selfless life for humanity as Satan, then that is simply a terrible blasphemy!

Solution Adversaries

I have been trying to prove the fact that the people of this world are within the firm fist of that ancient sorcery system. To prove this, I always use the logic, which is just like the method used to convince the judge at the court. This again shows that the people can't take beliefs to the court only because they cannot help unveil any secret to the presiding judge. I tried only in that logic way. I have done my duty to convince about the existence of that ancient sorcery system to every judge who presides over every human conscience. On the other hand, believer's method is different. They believe other's statements are false!! There the questions are not allowed, and no admission to logic as well! There we can see the strong passion of those religious people, to make their idea only the right ones!! Their final sentence is "you will get heaven and salvation only in our religion, not elsewhere!" We know very well that they are speaking about that one creator God and His one heaven!!!! This is really a 'midnight-Sun' contradiction!!! In fact, the consequence of this contradicting approach is the universal Truth, the backbone of every religion, is thrown out brutally from the core of every religion!!

The next point I want to inform you is about the 'solution' for that ancient sorcery attack. By "stressing the essential part of all religions, sects, and also stressing the feeling humanity, we will attain an ever-shining world peace" is the brief idea of that solution. In this solution, nobody needs to discard his religion. Again, nobody needs to abandon his beliefs and rituals as well. The only thing people need to do is to give more stress on the essence-part (essential part) of their religions or sects. This is because, in this part of every religion, we get only similar ideas and no contradictions as well. Here, we can sit together and glorify the 'essential part' of all the religions. When the frequency of this glorification increases, then, the world naturally turns into a wonderland of the eternal divine peace!!

Nowadays, in all religions and sects, we can see the number of religious scholars who try to explain the essential part of the religion is increasing. I salute them all for their broad hearts. This is really a great step, and let them shoulder this great solution-mission as well.

There is also a group of human beings, which includes both men and women, who become a hurdle to this great movement! They are the people who addicted to the immoral life. We see a large number of such people in all religions and sects and they dislike the morality being glorified! They are always tempting those fresh young minds into immoral activities! The reason for the huge increase of immoral sex in any society directly connected with the same deliberate temptations created by this group!! Now, we must understand the approach of above solution towards those immorally addicted people. The above solution method never takes away anybody's freedom. That speaks only about the freedom of human beings and their ways of life. The only request here made to them is not to tempt others to follow their immoral ways. If this simple idea is followed, then the problem is solved!! The later parts of the lives of the immoral people always turn horrible and haunting! If they changed their mind and decided to have a great life, then they also can get an opportunity to become the great human beings on this planet!!

Regarding the vegetarianism, though it is not essential for above solution method, we can say that it is still one of the great ideals on this planet. Vegetarian people are not eating meats only out of their sympathy towards animals. Here, we can see a real and great sacrifice. In brief, at least try to respect every great ideal. When this great habit starts maturing everyone will get one's freedom of life, and at the same time, a divine light of great golden age will also get a little space to emerge from within this darkened world!!

Shree Omdeva Seva Trust

Can you explain your stand on God, belief, and ritual?

Answer- Yes. I have to express my stand clearly, and it's a need of me as well. I am not speaking against any belief, ritual, etc. I am only warning the people about the ancient sorcery system's hold and control on them. They are the creators of all hatred, violence, and bloodshed in the name of religion and God. Thus, I am only requesting the people to handle everything with much care and deliberation. My only concern is the dangers of ancient sorcery system, and for that I wish every religion is a great generator of peace. I don't intend at all to degrade any religion or God, like religions do one another.

After knowing the secrets of the ancient sorcery system, though I don't follow any ritual and belief, I feel more importance to God, religion, and spirituality, not in their ritual-form, but only in their quality-form. Now, as far as religions and sects are concerned, they don't agree one another! Here, you can see clearly the stands of all religions and sects. On the other hand, I accept all the religions and Gods, but only in their quality-forms without any mythical stories and the rituals connected to them.

Everywhere we can see the fight between the religions! The main reason for this is the unwanted misinterpretations of the religion and God with one dangerous idea. That idea is "ours", the idea of possession!! There is no such religion or God so-called "our religion" or "our God"! In fact, it must be taken as "the God of my worship" and "the religion that I follow" because God and religion have the universal truths, which cannot be confined by the walls of religions!

Let us ask ourselves, are those religion and God our own house or property? Making the religions and Gods 'our own,' is the real reason behind the killing fire of fanaticism! This one idea tempted all the religions and sects to slip away from their main target that is the world peace!! Besides when they say "ours," they drag their Gods to a very low level than that the greatest level a God should possess.

We need only God and not the Satan, isn't it? I want for sure only the God and of course not the Satan. If all are ready to agree with the above idea, why can't we sit together and pray Him? If anybody agrees this, then he really agrees with a universal God concept of God. If anybody disagrees, then he considers his God not as a universal one, but as one among the many smaller gods! We know that until this day we have seen only two types of Gods, one is smaller gods and the other one is 'smaller' creator Gods! We didn't see an absolute creator God so far!!! In fact, people silly the smaller gods and their worships, but they themselves separated the 'oneness' concept of creator God with their own separate belief and ritual systems. Thus, they have been in the same smaller gods' group from the beginning as well! All religions and sects claim oneness and brotherhood in different selfish ways, but actually these different selfish ways of brotherhood create the hatred and bloodshed everywhere! Thus, my stand is that we all should gather together to nullify the bad outcomes of these false methods of limited oneness or limited brotherhood to get away from hatred and bloodshed.

We have been scattered just like the rays of the Sun, which have no way back to its origin. This has been strategically done by that ancient sorcery system! When the condition is so, for an escape-solution, we need "one place" common for all people. If we gather in a certain way, then it is the easy solution against the 'separating strategy' of ancient sorcery system. If we think the only place we get is the 'essential

part' of the religions. Even the atheists are not against the moral idea that we should not steal anybody's property and etc. We get a set of such universal religious moral codes, and here we all can gather. We only consider Gods, rituals, beliefs, and different methods of 'spirituality-part' as mere individual choices, and there is no problem to reach heaven if anybody wishes in his own way as well. If we gather, no doubt, the ancient sorcery system will be fooled and defeated. This will fetch us a wonderful utopia the heaven of goodness in this world. This total oneness is beyond the idea of separations. If this total oneness is established, then the beliefs and rituals will become harmless.

My dear brothers and sisters, this is my absolute stand on beliefs, rituals, God and religion.

Some people argue that the things visible to our eyes only are true, and this is a wonder! Unfortunately, the people, who favour the invisible beings, argue in 'many different ways' and is more wonderful than the previous one!! In brief, everybody's different versions about invisible beings together make a total confusion!

We know that all invisible systems are surviving only because of the faith attached with it. If the feeling of faith misses, world misses the religions as well! This is not the greatness of the religions, but it shows mere story believing pathetic conditions of them!! Now, as far as the ancient sorcery system which I talk is concerned, there is no explanation based on any belief, but it is explained only in logical way. If there is no logical explanation, then people would ignore it totally!!! That will become a suicidal one I fear! Here, I ask one question to the fanatic people. If you only believe the words of your religion, among many religions how do you know your belief system alone is the absolute one? We know God is truth, at the same time, we know belief is not the truth. Then, which one we need, a true God of logic or a false God of belief? Within the belief there is no logic, and without logic we can't see an unknown thing. In the court 'belief' doesn't work, but logic works because logic is an instrument to reach the truth. In fact, I try to produce my all subtle experiences in front of you only on the basis of unbiased sincere-logical way.

I want to tell you only about the dangers of unknown ancient sorcery system in a sincere logical way, and more than that I have no work. I don't have my own religion and sect, etc. We can't put the fence and make a religion of our own!! This is because it contains universal truth and universal love, which are as vast as the sky!

When you read my words, you can see two things other than the one said above. Those are the solution for that imminent danger which demands oneness of the world or unity of humanity. The other one is about the process, which we need for attaining that unity. This process is not any ritual, but it is a mere "thinking" process based on universal values! Logical thinking is not at all a religion or a sect, but it is a purifier if we use it for that purpose! Any religion can use this purifier for its religious health sake. Finally, if you take every subtle idea which I spoke, then still there remains one idea that is 'unity of humanity'. Now, if you do the same in religions and sects, and take all subtle ideas from them, then still there also remains one idea, but that is "fight for our belief systems"!

I am the real follower of all religions, only because they claim that they are for [world] peace. Unfortunately, religions and sects speak loudly about the world peace, but increase cruelty in the society with ease! Again, they propagate peace, so, they must not propagate war or violence in any way in the name of God and religion. Today, I am speaking this point not only with the mere philosophical accent, but speaking with the perfect astral experience of that ancient sorcery system. My dear brothers

and sisters, I know for sure that both violence and hatred within the religion and sects, etc., are exactly the handiwork of them!

In this backdrop, I declare here that I want only peace not hatred and violence. So, if anybody speaks on behalf of me should create a calm and peaceful atmosphere at the time of speech and should not convert it to a heated discussion. Heat is anger and it is for hatred, and if it increases it will be converted into inner fight, further it changes into external fight! These hatred and fights should not happen even with my single word. So, if you like to join the human hearts with my words, you can call it by any name religion or yoga, you can do it. Please, never try to convert my words as the sword of Satan by separating the hearts. My heart speaks to me, "you speak straight away the truth, but only with love. If not possible, then stop everything and retire yourself." This is because causing any kind of problem to anybody is irreligious and blasphemous indeed.

Can anybody get a peaceful heaven by making this world a bloody hell? No, that is impossible. So, in a different way I can narrate my stand as to try to make this planet a land of divine love. My dear brothers and sisters, these are my sincere words of heart.

If people claim that the ancient sorcery system has not been mentioned in their religions, what will be your answer?

Answer- I have a short answer to this question. In fact, all religions agree the ancient sorcery system within their religions, without their own knowledge! That means they do not know its presence within the religions. In a few religions, we can see demons, and in some other religions we can see Satan and his demon group! We also know very well that all religious scholars, when they preach, warn the people of the dangers of the Satan's activities! We can hear their preaching about Satan's control over human beings! Now, the difference is, they explain from their religious mythical story, and I explain from my direct experience, which I got from secret spying in the astral world. Again, another major difference is, Satan is the creation of myths. On the other hand, the creators of the ancient sorcery system were very ancient human beings, lived before any broadminded spiritual human approach arose on this planet. Ancient sorcery system is a very ancient system, which alone got the technology of self-intelligence to develop and spread in very secret ways by themselves! This is the reason for their terrible power, and their control over all other sorcery systems as well as the positive subtle powers!! We can see that both religions' side and my side point at the same thing, but only with the different names. Now, if anybody argues that there is no ancient sorcery system, then he loses the Satan or devil from his own religion as well!!

Sometimes you speak about the deficiencies of different religions and sects. How it will help the world?

Answer- my dear brother, I have no hatred towards any God or religion because I have no religion or sect of my own. So, I need not go for any propagating debates, or for other conversion activities. This means I don't have such responsibility on me. Now, when I show the contradictions within those religions, there I have only one intention of exposing the secret existence of that ancient sorcery system. In fact, if I

speak without examples or without logical way, nobody can realize, and no doubt, then you will ask the logical explanation [proof] as well. The unknown truth can be found if we go through proper logical analysis. In the court, Judge observes the truthfulness and correctness of the logic of both sides without inclining to any side before his final judgement. In the same way, my logical analysis consists of impartiality and sincerity. I have been doing everything only for people. Unfortunately, even today, most of the religious people think that all the stories in their religious books are exactly true! This very narrow approach caused and developed hatred, violence, and bloodshed on this planet! When I know the 'secret' behind these hatred and bloodshed, it is my primary duty to inform it to my brothers and sisters. Thus, I am doing my duty with logical ways, and among them showing contradictions within the religions is one. The very important point I want to tell you is I respect all Gods and religions of this world, but not based on their rituals and beliefs, but based only on their great quality-essences.

All religions are for peace. Isn't it?

Answer- This world has seen so many thousands of religious and their sectarian founders. Besides, there are so many millions of preachers in every religion and sect as well. We know that each and every one of them speaks for peace. That means this peace making is not a new idea. It has been there in this world from the beginning! Now, the question is this, why everybody is giving stress to the peace? The reason is without the idea peace there cannot be any religion, sect, or words of God!!! These words of peace of every religion and sect are only within the walls of their own religion and sect!! This fenced peace of every religion or sect turned into intolerance, and finally into hatred and bloodshed. Ultimately, this fenced peace became the 'main' cause of hatred and bloodshed!!

The ancient sorcery system has been doing its work by using this fenced peace! Also, it always keeps humans in a fanatic mesmerized state even from the beginning! It will continue until the end if it is not interrupted anywhere on its way!!

Some people say that in India there has been no such thing called belief system, and everything we have as our culture is the inquiry path. What is your opinion on that?

Answer- In fact, we have the history of great bhakti yogis in India. Besides most of the Indian are devotee of one or other God! They all are following and believing different myths connected to their Gods and their respective ritual systems. Wherever you go, you see only these different beliefs and rituals! If we search inquiry systems like Upanishads, in India, we can find them only in some spiritual centers! This means around ninety five per cent of the people of this land believe in different belief systems. In fact, India's culture mainly contains four kinds of beliefs. They are mythical beliefs, ritual beliefs, spiritual and social beliefs. When we have such a heavy load of beliefs in this land, I can't any way agree that Indian culture has been only the inquiry system.

Can you explain the religion in straight words without any roundabout way?

Answer- My dear brother, I have given the explanation of religion in so many ways, which complements one another, and it is only for a better understanding. The core of all explanations is one and the same. Now, you have asked me the same point in very straight way, I will try in that way, but get it only with your broad-mind.

When we speak the Truth, it sounds sweet to only good people, but bitter to bad people. At first, we need to separate the spirituality from the religion because they are different in different religions and sects. Different Gods, different heavens, different salvations, and thousands of spiritual methods! All are at war, and try to grab humans whenever possible! So, it is better to see that side as mere competitive side for different heavens and salvations. Besides, we have separate word “spirituality” for that as well. Now, if you need definition for ‘religion’ in straight words, then it is clear that ‘impartiality’ is the religion. Naturally, biased attitude is a well-known anti-religious approach. Every religion stresses this point!! This is because Truth is the backbone of any religion, so ‘partiality’ naturally takes you away from the Truth, and then you bound to live in a hell of falsehood! If God and religion are universal Truths, then we have to be within “impartial approach.” This is all about the straight words regarding religion.

The broad-mind I demanded earlier from you is not for hearing above fact, but for the very reality we have been facing on this planet. Now, we can see one very important, but stunning point that you never get any religion or sect, etc., anywhere on this planet without partiality!! Everybody is saying his religion or sect is greater, and trying to glorify and convert others!! This partiality is basically not allowed in a religion because it loses the great and very essential ingredient ‘Truth’ from it!! The religion without Truth is not at all a religion. Now, we should remember here, the great words of a great soul that every religion is just like a frog in the well thinking that well is the vast sea. If Truth is neglected, then what remains in a religion? Oh, it is clear that we have been led by some mysterious powers, which toppled secretly the foundation of all the religions!!!

Everywhere people use the terms “our religion”, “our sect” etc., without caring the sanctity of their foundations! Can anybody put a fence around the sky? In the same way, nobody can put a fence around the universal Truth. If you are really speaking about any truth within your religion, then there is no scope for any kind of “our” fence at all. If anybody favours this type of fence, then that will be just like a Judge declares “theft” as the great deed, and it is a horrible contradiction!

All such things are happening only because of the ‘faith idea’ of every religion. Let us hope that people will consider the greater evolved religion than suffocating biased religions. To get this evolved religion, the only difference we need is a mere weakening of separating fences, not any change in their structures. Just convert the separating strong fences into mere marks, and that is all we need to counter the ancient sorcery system, and to attain the Golden age!!

You said that ancient sorcery system was a very ancient and the only self-developing sorcery system. Besides, you also claim that they have been secretly living and controlling within all other sorcery systems and religious systems from the beginning. Can you give some more concrete examples other than already explained?

Answer- I have already given so many logical proofs for this. So, if you ask again I bound to give one direct answer here. Now, I need not go for other explanations because I explained everything in my earlier messages. Again, you know that I already told the very important factors of this ancient sorcery system, which are essential for increasing its system's power, are the human feelings of cruelty and the immoral sex. To develop the density of common people's cruelty in the society, they use very basic method of separating human beings into opposing poles. Without separation, there is no chance of any hatred, violence, and bloodshed. Thus, they badly needed the separating techniques and they have been using them intelligently and strategically! They started dividing the people in different ways. They used kings, religions, and sects for that purpose. We are sure that at the beginning of any religion, there the God as well as the founder of that religion would not have meant that religion should be a disastrous fragmented future religion! If they did not mean, then who meant these hateful fragmented religions? In other words, who had this idea of breaking the religions into many pieces? Some people may try to answer as "through the natural human mind process." Now, only for clearing this point, I would like to point one distinct event-chain, which cannot be taken for any natural process or for coincidence.

Let us see that distinct event-chain. If we go to the very ancient period, we get the Vedas. The Vedic period is so ancient and there we could see two main divisions in the religion! One is Jnana path followers and another one is Karma path followers. They condemned each other. Later many divisions occurred that we need not mention here. In Judaism, they also got orthodox and reforms, In Christianity we know Catholic and Protestant, In Islam we know Sunni and Shia, In Buddhism we have Hinayana and Mahayana, and in Jainism, we have Shvethambara and Digambara. In any new and small religions if the division did not occur so far, then it will happen in the near future. Here these "major divisions" are exactly typical and not any way an accidental happening. Some kind of deliberation and strategy we can see clearly in such repetition. We cannot take these 'major divisions' for first split of a religion into two halves because some of these major divisions occurred after many smaller and earlier divisions! Now, this hidden influence, of course, is the handiwork of ancient sorcery system. If religions divide into many sects, no doubt, then it only warns the greater influence of this ancient sorcery system on those religions.

Please be aware of the point that we need religion and God or Gods, but we don't need the influence of ancient sorcery system. Again, we need not ban beliefs and rituals as well. To avoid the influence of ancient sorcery system, the only way is to unite the world people in the very name of God and religion!! This is the one and the only antidote to this terrible separation-epidemic of ancient sorcery system. This can be made possible only if we realize the real 'quality' of God and religion rather than

blindly asserting the greatness of different belief-stories and rituals. If we want an END time that will be performed by the ancient sorcery system with a smile. On the other hand, if we don't need the End time, then we need to trample the ancient sorcery system by gathering together. That will bring a new beginning to this hellish world with the godly Golden age!!!

You are saying that religions, sects, etc. have been disconnected from the universal Truth, Love, and Morality which are essential for their own existences. How is it?

Answer- In a different way I like to show this fact. Now, most of the places some fundamental rituals determine a religion! If those rituals are overlooked, then he is not considered a religious person of that religion. Here, no botheration, we can see, on those qualities, Universal Truth, Love and Morality at all. Every religion has given a particular area, inside the religion, for having its philosophies! Thus, religions allow anybody to enter into their religion without this quality-passport!

Please think that every religion wants a mere conversion to its religion, but no compulsion of any good qualities at all! Now, the question arises, whether it is possible such mechanical religions which pay no heed to the purity of heart.

You told there are so many secrets still remaining untold about ancient sorcery system. Can you please expose the truth behind your strict stand against religious conversion?

Answer- My dear brother, of course there are so many untold secrets still in my bosom, and those are not any way favouring human beings. As far as this question is concerned, it is not a big issue, so listen to the answer carefully. I already told, for ancient sorcery system, they have two major ideas. One is 'God idea' another is 'Satan idea'. Good and great behaviour of human beings are connected with God idea, and wicked qualities all connected with Satan idea. They want satanic quality in this world so that they get enough wicked tendencies especially 'cruelty and immoral sex' feelings! Thus, they get double benefit from religious hatred and fights! Wars of kings or countries only give secular cruelty, though they want it, still they need 'God concept killing feelings' from human being! When people divided in to different religions, they start hating and destroying 'God concepts' of other religions, in different possible ways!! Human beings do not know the secret behind these divisions. They, still, hate other religions and other Gods!! In fact, ancient sorcery system has made human beings as 'God murderers' by using religions, cults, and sects. This, naturally, should cause a quality disaster in the human life as far as sorcery system technique is concerned, and that happened as well. Though thousands of religions and sects appeared on this planet, still, the wicked quality of human beings raised on its own without becoming a great world. If burning bulbs increases, naturally total light must increase. Unfortunately, in the cases of religions and sects, the result is the opposite!

In other words, we can realize, when many religions and sects increased this world went to darker barbaric age!!

Now, in religious conversion the same thing happens, but only with powerful format!! We know that after conversion that person and his nearest people speak against the same God, which they had worshipped earlier!! This is ancient sorcery system's one of the most powerful 'God killing idea' formats. So, I stand always for unity of human beings 'in the name of religions and Gods', and speak against any kind of religious conversion. Unfortunately, in the name of worship, so far, religions destroyed millions of worship places, God idols, and sacred books etc., all these horrible deeds are nothing but ancient sorcery system's mere God killing techniques. In short, everybody is fooled, and everything is now out of control!! If you want an escape, awake, rethink, and defuse the meaningless belief bundles. Again, find very intelligent solutions to get rid of this incoming final disaster.

Can we combine the Tantra Yoga and Patanjali Yoga together?

Answer- The tantric Yoga and the Patanjali Yoga should not be mixed together. Patanjali Yoga speaks about Yama, Niyama or moral aspects of society. On the other hand, the tantric system contains immoral practices and it naturally influences the society negatively. So, they should not be mixed together. Yogis and Great souls warned about this danger and they requested Tantrics to remain aloof from the society as well. Unfortunately, this mixing gave rise to many spiritual cults, which are without strict rules of morality. People are waiting for such easy and entertaining practices, and finally, this open practice will lead to the total collapse of the society.

Can you explain the similarities and differences between Yoga and practice of Great life of great souls?

Answer- There are two main divisions in Yoga. One is about physical Yoga and another one is about spiritual Yoga. Physical Yoga is for physical improvement and spiritual Yoga is for salvation purpose. Here, we don't talk on the physical Yoga, but we talk only about the spiritual Yoga. The similarity between Yoga and 'great life' of great souls is that they both are aimed at only one idea "oneness." The differences we can see in yoga, they try to get the experience of oneness in the deep mindless state, but in the great life practice, they try to get the experience of "oneness" within both extrovert and introvert mind states! In yoga, they discard the mind to get oneness. On the other hand, in 'great life' practice they "use" the mind to get this "oneness." In Yoga, they practise hours together to go deep into the bottom of mind in meditation, but great souls find easy practices even when they are busy at their workplaces. And finally, religious books say, the liberation and Yoga can be attained one among millions of people, but here 'great life' of great souls can be attained by most of the people if they have sincerity and determination.

People say that Good and bad qualities are from the creator God himself. What is your opinion on that?

Answer- Every myth of every religion explains like this. This is because they claim one God for everything, and they cannot bring another creator for producing bad qualities. Thus, they are trapped within their own stories! Can we see hero and villain in the same actor? No, the history of literature answers that it is not possible. Can you imagine a father's love for his child, only for some time, and after that with his sudden cruelty cutting that child's hands? No, if anybody lives like that, then he must be a lunatic one. So, if anybody combines good qualities and bad qualities, then it is undermining God below a mad person. People always escape easily from such religious confusions by uttering one sentence! That is "It is for God's testing purpose." Unfortunately, it makes further horrible when we say God created wicked things for human testing sake!! Perverted sex, jealousy, hatred, exploitation, thieving, treachery, prostitution, etc., thousands of wicked feelings are there!! Now, how a pure God created all these nasty feelings? Again, when we compare the number of good and wicked ideas we can see wicked ideas are drastically more!! This again makes God more with Satan-quality than God quality. If so, no need of denouncing Satan because it affects the creator of Satan-quality as well!! This is indeed a horrible blasphemy. Can hell and heaven exist at a place? Is Satan derived from God? Can Moral and immoral activities coexist together within a religion-vessel? How then it is possible to give only religion to human beings without giving anti-religious ideas? These are the problems come if we consider God as the source of both good and bad qualities!!!

Great souls never mix 'bad qualities' with God. Instead, they always consider God as the universal truth, universal love, and universal morality!! This makes God to remain always in those great positive qualities, and motivate humans to remain only in the great qualities.

How can we believe your words?

Answer- My dear brother, you need not believe my words, but let me expose what I have found after a long spying in the astral spheres to the public. This is all I want and that is my duty. You also don't believe in other faiths other than your faith, isn't it? Then, this is your traditional profession and not your sincere thought decision. Every faith did the same so far. Everybody is in the belief boat, but by mistake, they claim the whole sea exclusively for their little boats!

You already explained the greatness of the truth, and lowliness of belief earlier. Can you explain it with one more example?

Answer- For example, in science, we see only universal truths, they work equally everywhere. Now, we can say that truth is the embodiment of 'explanations with logical reasons.' On the other hand, belief is the embodiment of 'explanations without any reason.' Knowledge always saves our life. If we know about the flood or earthquake in advance, it will save many lives. In the case of diseases also it saves. In fact, faith creates only delusions in human minds instead! Faith creates fanatic delusion based

on the differences of stories of those myths and creates hatred, violence, bloodshed, etc.

The increase of people of delusion will make this planet red with blood. If Great souls increased, it will make this planet pure with wisdom.

Can you give one more example for ancient sorcery system's misuse of beliefs and rituals?

Answer- I have given many instances for ancient sorcery system's influence on everything including every religion and sect. Here, I try to explain one major point, and that will clear your doubt as well. As far as the knowledge of a religious person is concerned, he assimilates every belief and ritual to his God. If so, the number of beliefs and rituals must end after the founding of any religion. Unfortunately, those rituals and beliefs appeared again and again and created so many sects and cults within a single religion!!! God never do such things, and then who did it? Without making a slight difference in beliefs and rituals a new sect or cult cannot appear at all. Now, it is so clear that the ancient sorcery has been using these beliefs and rituals for further separation of human beings in the name of new sect or cult for its system's power enhancement.

This is the only reason I have been telling people in most of my messages not to give more stress on these beliefs and rituals. Hatred, violence, bloodshed, etc., will increase 'in the name of differences of beliefs and rituals', and it will reach to its peak in the future! To escape from this ancient sorcery's human separating cheating strategy, the only solution we have is to gather in the very name of religions and Gods. For this purpose, we need to do only a slight adjustment, but it will save us from a disaster! The adjustment is very simple, and it is, 'seeing every God and religion on the basis of Universal truth, love, and morality.' If these divine qualities are missing in a God, then that power cannot be a God power. If these divine qualities are missing in a religion or sect, then that religion or sect cannot be a religion or sect as well. Thus, we got the essence of every God and religion. When we stress these great essences, we can join together in the name of God and religion. After getting this grand human total unity, we need not worry about the beliefs and rituals because this unity will prevent any negative outcome of them forever.

You say that everything in the subtle world is only connected with mind and psychology. In psychology they don't believe ghosts and gods, then how can you explain it?

Answer- Science does not agree with any kinds of beliefs, but it agrees with the logic. So speaking in scientific terms is easier than to convince a blind believer! If my words are logically correct, then this explanation gives an opportunity to think over that topic. At first, I expose here those secrets, and I would like to write them down as separate points.

1. All subtle existences in the subtle world are nothing but the human mind power.
2. They include Angels, Gods and Ghosts and every other subtle existence.

We know that humans didn't receive any 'unanimous' concept of soul and God so far from religions and sects. They are still arguing on those topics!! This shows nobody knows anything clearly, except their own mythical stories and some kinds of subtle experiences!! This simply shows some other possibilities as well.

The very important point I want to tell you is I have passed through all different God and ghost visions clearly for a long time, but I rejected them all only for a further inquiry in subtle world. There are two types of gods. One type of gods are claiming themselves as only gods, and the other type of gods are claiming themselves as creator Gods!!

Here, before a blind conclusion on any side, we should look at the reality of the creator God concept. We have seen so many creator Gods in different religions. When the creator is only one, how He became many in number. If they all are one and same, then why He came in different places with His different mythical stories and contradicting rituals? Even people are not yet sure about His name, they argue for His mere name! Human separation, hatred, violence, and bloodshed are the results of creator God concept practically on this planet. All these points support above explained claiming-creator gods.

When I saw all these clearly, and realized that they are made up of the human mind, how can I say something else other than psychology? This is the reason for that statement. I have already written on this same topic, in a lengthy message, which you will receive later. I request psychologists to go further to see the fact that mind can be separated with intelligence.

Now, let us see how these ghosts and human souls exist based on the reality. This is totally different from the traditionally known ideas.

As we know, by religions and other spiritual sources, the human soul is a single undivided existence!! In fact, in reality, it is not such a single undivided existence, but it is a composite of different individualities [souls,] which is the creation of this ancient sorcery system. This means, this was not in the earliest period of human life, but later, though it was very ancient, created by the ancient sorcery system!! They can both control and keep their system's secrecy permanently by following this technique!! Of course, they kept everything secret so far.

In this packet of different souls, it may include some dead and living souls of his house. Also, the possibility of having unfamiliar people's soul as well!! These all are done according to the necessity of ancient sorcery system. We should know, these packet-individualities are working from very deep subtle areas, and for humans' external interactions they have a "common individuality," which he always addresses with the terms "I and me." Don't be surprised to hear 'living souls' in others individuality-packets because anybody's soul energy can be partially taken by the sorcery method, at any time, and can be transferred and added to others packet-individuality, but only if this sorcery needs. Now, we see people sometimes behave like possessed by some spirits, and it is mostly due to one of the packet-individualities direct expression without touching the 'common individuality' of that person. If the expressing soul is unfamiliar soul energy, then at that time that person will speak some unfamiliar language as well. Psychology has spoken about the split personality. In fact, they do not know these personalities have been the collection of different individuals, and not one soul's different personality aspects. Again, other than these energies, still different soul energy can express through one individual, but the condition depends on the necessity of ancient sorcery system. They, of course, gain more power to their system with such ghost-possession cases, but if they do more, people will surely confirm the existence of evil spirits. Ancient sorcery system does

not like this because that would lead a total God-inclined society. They want everything in the format of DOUBT. Again, this is another technique for keeping their secrets away from human beings!!

Now, I finish this topic with one more point. When a person lives, throughout his life, this ancient sorcery system's negative powers, take his soul energy part by part, for increasing their system's power. After the separation of part soul energy, it is then converted to respective ghost of different ghost categories of that system. This is common to all people. Every day this is happening in very secret areas of the human mind. The dream is the playground of these beings. You cannot be in those three states, awaken, dream, and deep sleep at a time. Unfortunately, they can work even from the dream state when humans are in the awaken state. The main point is that the ghost-conversion is in such a way that the first enemy of that ghost is that person himself! The next enemies are his family members! This is the reason in most of the places, after the death, even the best fathers and mothers used to haunt their kin and kith!!

Now, one question arises, if these thousands of ghosts produced at the time of life, then among them who will go to heaven or get salvation? This means at the time of death a person is having only one small part individuality. All other thousands of his created part individuality ghosts by the time already started their work for that sorcery system accordingly.

We know, except some miraculous ancient sorcery system's meant incidences, when somebody is murdered, then that victim's ghost does not attack the murderer. This is because those all created ghosts of his lifetime stand always against that victim himself. Besides, victim's ghosts feel very happy at his death!!

My dear brothers and sisters, I have given the details of what I have found in the secret areas of subtle world. All these are only the psychology or mind powers. So, if we want any solution, there we need not the rituals, but psychic treatment. If we want to reduce the heat, we need fan or air conditioner. In the same way, if we want any getaway solutions from this ancient sorcery system's dangers, then, there only one idea helps us. That one idea is using counter qualities! This is why I always stress God and religion as Universal truth, love, and morality. This is the only possible counter psychic power we can have from positive side.

We can have one or many Gods, but we must narrate God as the great fund of Universal truth, love, and morality. Let this be a psycho-religious joint venture. No doubt, this will unify the world, and bring us a great golden age as well.

What are the different concepts of God in different religions and the God concept in the 'great life' of Great souls?

Answer- Excepting 'smaller Gods' type, we can see two major types of Gods. One is creator God, and another is the principle God. In both cases, God concept represents the 'oneness.' Creator God created human beings and everything, so there is an idea "all came from one." This oneness is there in creator God concept. And in the case of principle-God also "all came from one principle" and that oneness is present. In the great life of great souls there they consider God as Universal Truth, universal Love, and universal morality. Thus, here also we can see the oneness of God concept.

In creator God, we see oneness or Yoga, in the Creator-hood of creator God! In the principle-God, the oneness or yoga, we see in the subtlest area where there is only one consciousness! Now, the oneness or Yoga of Great life is in the “great values of God concept.” This is one of the major differences.

Creator God-yoga is so far misused by making the creator God in to many in number by many religions! Instead of the feeling of unity, they produced the feeling of hatred, and it led to violence and bloodshed. In the principle-yoga, it is in the state, where there is only consciousness! So, it is hard to attain these state of mind, and if not attained they behave like common people without the feeling of Yoga or unity!! Some great Acharyas also trapped in Caste delusions even in their greater Yoga level!! Fortunately, the great soul's Yoga is in the well aware state, and it is in the complete awaken-state as well. Here, they see the great values of life and finally attain the broad mind, which includes all the good people of this world. Thus, they are the practical Yogis of practical life. They develop great human qualities which are essential for every family and society. We can even expect ‘practical world peace’ from these Yogis! In short, all other Yogas are made for salvation and kept away from the social life or worldly life. Creator God restricted the Yoga to some beliefs and rituals. Others restricted Yoga to no-mind state, but in the Yoga of Great soul's great life, we see this Yoga gets an all-rounder role in human's daily life besides generating the great world peace.

In most of the religions we can see mythical gods behave in irrational and sometimes immoral ways. On the other hand, you are trying to impose greatest qualities on every god, now, how can you solve this contradiction?

Answer- We cannot withdraw morality from Gods, and we cannot accept immorality in Gods as well. The only way, we have, is to ignore the unwanted and immoral parts of mythical stories, and to stress more on the good and moral parts of them. Here, we are not doing anything with the beliefs and rituals. Here, we are only raising the level of God concept from the lower level belief to the higher level of universal truth, love, and morality.

Here, one question arises. The question is even though it is God's case, is it possible to make immoral as moral? In fact, here, we are not making the immoral as moral, but we are just ignoring the immoral parts of all gods. Moreover, we collect only good parts of Gods as well. We cannot say darkness as light, and we should not say as well. In the same way, the ultimate ideal of positive qualities the God cannot in any way explained in a lesser way. This means we cannot impose any bad qualities on God or Gods by any means even with stories. Look at the folly of Theists; they blame the bad qualities of other Gods!! Atheist blames the bad qualities of God, if any found in any god, without any partiality. In fact, these attitudes will not make any good to the society, but create hatred and bloodshed instead. So, let us live in the great [quality] essence of God and religion. When we live in these essences, there we find no hatred, no violence, no war, but we get only the great peace of the Golden age.

What is the essential part of all religions or essence-religion?

Answer- I have already explained about this many times. Still I explain here with minimum words. Essence is that part, without which existence of any item is not possible. Sugarcane juice is the essence of sugar cane and without that we get only a useless waste. In the same way, religion also has its essence part. The great qualities, the universal truth, universal love, and the universal morality are the essence part of the religion. This is because without these essential qualities a religion is not possible!

Can anybody claim his religion a religion without these three qualities? No, and that is impossible. Thus, the rules made for social well-being, based on these supreme qualities, are called the essence part of the religion or essence-religion. With a few differences, every religion has the same essence everywhere! For example, “don’t thieve”, “don’t speak lie” etc. rules we find many in number in each religion. These rules or moral codes are common to all religions as well. This is known as the essence of the religion because without these basic rules a religion cannot exist. God, grace of God, spirituality for heaven or liberation, etc., are individual choices for individual differences, and it can be practised accordingly without any change. Here, the speciality is that we are not changing anything in any religion. Still, we get a common ground for gathering together to escape from the horrible influences of that ancient sorcery system.

What is universal truth?

Answer- What is truth? If a person holds a vessel and says that he has a vessel in his hands, then his words are true. This is the common and commercial usage of the word truth. On the other hand, when we speak about the God and religion, there we see a different aspect of the truth. This is because the creator God and His respective religions should be meant for all human beings, including aliens if existed in this universe. He should not be meant for a group of people. So, there we must raise the truth to the higher level like the truth of Sun, which is for all. Unfortunately, every religion and sect, with its mythical stories and separate faith, builds fence around it. Besides they force that vast truth of God to contain within them!! In fact, in all the religions and sects, people use common commercial type of truth instead of vast type of truth or the universal truth. It is again unfortunate that the one creator God is being explained in many ways! We can’t explain a Sun as a blue Sun, a green Sun, etc., so, we should have explained the creator God as one and only one reality, but we didn’t!! Now, we can understand that the people of creator God have been following the same type of God concept as that of the smaller gods’ commercial truth concept. This devastated the essential quality, the universality of truth, in God and religions!! This directly helped that ancient sorcery in separating human beings and creating hatred, violence and bloodshed as well.

What is universal love?

Answer- Universal love represents the love of God. God’s heart contains every human being, but loves only those good people. If anybody argues against this point has to prove whether God loves Satan. Thus, this God’s divine angle of love, which pours only on the good people, is called universal love. Some spiritual people translate this universal love as the ‘equal love on all people without separating good and bad’

among them! Of course it sounds greater, but in fact it makes a lesser society where the wicked people torment the good people without getting any punishment!! It can be a single person's individual choice, but it cannot be in any way the practical social code. This approach supports wicked people in the society, so, that cannot be the religion as well. On the other hand, religions and sects of this world condense this universal love so that it cannot spill beyond their own religion-boundary! It is an utter surprise that a very good person who lives in other religion becomes worse than a nasty person of his own religion!! Some religious scholars say that they have two types of brothers, one type is close brothers within their own religion, and another type is distant brothers. Closeness is called brotherhood, if you keep distance there cannot be any love of brotherhood, but becomes the target of hatred and violence.

Every religion says the people in the other faiths are unbelievers. This creates confusion as well. The confusion is when every religion says others as nonbelievers, and when we see from the nonbeliever's side alone, we can see whole world filled with mere nonbelievers and nobody is there a real believer of God!! This is really the terrible blasphemy from the side of religious people!!!

Universal love is the divine love, which loves all good people in the world without any distinction. This is the reason this great quality has been one among those three major qualities of God and religion.

What is universal morality?

Answer- Morals have not been created for any individual, but they have been created for social well-being. Still, they are ultimately helping the individual life in a roundabout way. In other words, morals are like public property, where everybody has equal right to have it. When they are transgressed by the people, then they are equally degraded or punished by that society. Morals are in the form of social rules, so it can be considered the main part of any religion. Unfortunately, even the most inhuman and cruel codes of conduct were introduced as morals in the name of caste, ritual, and religion! The consequence was exploitation and killings! These inhuman moral codes cannot be in any way considered to be the moral codes at all. Thus, if moral codes agree with equality and humanity, those moral codes alone can be considered the essence of any religion. We know these are common to all the religions as well. Thus, those selective moral codes, which are common to all the religions, are called the universal morality.

If anybody argues rituals and beliefs are the main part of religion, then what is your answer to them?

Answer- In fact, they are not an essential part of any religion. The Great souls pleaded this to humanity from the beginning, but nobody heard their voice! Briefly, we can see the idea that every religion has got one important part, based on the universal love or selflessness. They are in the form of rules for better human life on this planet. Here, those rules which are based on universal love can be considered the basis of any religion. Moral codes are almost common to all the religions. Now, if a religion without these rules cannot be considered a religion at all, but without the God concept and God's grace religions exist in this world. Thus, for a religion, these uncontaminated righteous life-rules are the main part. All other different beliefs and rituals are the 'spirituality' and also the human's 'free will choice'. On the other hand, these moral rules are meant for a better peaceful society, and this is not at all any set

of rituals or beliefs!! All prophets came, according to Semitic religions, for the betterment of human ethical life. In Bhagavad Geetha, it has been said “supporting good people, and to annihilate the bad ones and thus establishing righteousness on the earth again and again” is the purpose of every divine incarnation. All religions speak the same idea of improving the ethical human life, and that is the main part of religion. Now, nowhere it is said without the quality improvement of human being one can attain heaven or any better life after death!! In other words, no religion has given more importance to the rituals than the ethical improvement of human quality.

Thus, we can conclude that rituals and so many other related beliefs are not an important part of any religion.

Most of the religious scholars say “No salvation for others” or “No heaven for others,” here I want to know which salvation or heaven they mean.

Answer- We can't see any logic behind it! No company can claim that their soaps alone have the cleaning quality. Religions claim that they are the words of their respective Gods, but not ready to agree with the idea that all religions are from God!! This seems like mere mockery.

In fact, this simply shows different gods in different religions. Thus, we have so many gods with their respective heavens. In reality, this differences of heavens caused hatred, violence, and bloodshed! If there are different heavens for different gods, we can have a very easy solution for that confusion. The solution is “let one go to one's god's heaven, and let others stop pulling that person to another heaven.” This is a very simple solution and this can create a great world within no time as well!! God and religion are for human life's betterment and don't use them for any human hunt. The most unfortunate thing is the religious scholars dare to say “they will go to hell after death” even to those great people who lived extremely pious life on this planet, only because they are in other religion!!! This is really a rarest but poorest advertisement of a religion! Here, it is clear that nobody at least tried to know the idea what is God and religion! If they had tried, they would have already converted this planet into a great heaven. Unfortunately, we can see everywhere only those beliefs and their blind repeated claims. What more we need to prove the ancient sorcery system's influence on human beings?

Can you give still more explanation on quality-god?

Answer- All religions and sects use the term logic. They try to explain even the beliefs logically, and this is really an unbelievable wonder! This is because beliefs get birth only in the place where there is no logic. Still, religions and sects try to assert their beliefs with logic!

There are so many numbers of Judges in this world. Though they are different individuals, still they belong to one category. The function of that category is giving justice or truth to the humankind. Now, when the term “Judge” comes, the meaning of that category comes in front of us. Here, we do not count the wealth, age, physical strength, etc. of any Judge. In the same way, though we have so many different gods in this world, still, when we speak about God, then, the meaning of God should come to us. That means God's quality the universal truth, love, and morality should come when we speak about the term God. These qualities are universal as well. If anybody

having a doubt, then he should prove by explaining one's God as 'God concept without those basic positive qualities.' Now, we can realize that the projecting of one's God is only possible by the way of explaining the meaning of the God, and it is not possible by the explanation of exclusive stories, rituals, beliefs, etc. When people project the greatness of their religion by projecting their mythologies, rituals, beliefs, etc., then instead of peace, we get hatred, violence, and bloodshed in the society. They destroy the peace, the aim of every religion as well!

The power of mesmerism of the ancient sorcery system is so huge that it even mesmerised religious and spiritual giants to bow down to their system's needs! Nobody cared for the ultimate dangers of religious and sectarian fences! Some philosophies spoke about the broad approach, still, they became another sect, and started condemning and debating with other sects and cults. In fact, they strengthened their own 'fences'. Thus, that sorcery won again!! So, let us expect a great awareness among human beings about the God concept, and hope they will save the world from the mouth of ancient sorcery system!!

We need one more example for 'quality-God concept.'

Answer- Just hear a very small story. There were five people sitting, and one person introduced them and explained everything about them except their financial area, and finally, he asked one question to the people gathered there. The question is "can you say now who is the richest person?"

Above story says that if at all we wrote a full book for a simple question asked, still, if it lacks the straight answer, then it becomes a worthless job. Religious interpretations always speak in roundabout way, leaving a vast ground for confusion and further different independent interpretations!

Now, in the above story, the financial conditions can alone answer his question, but he did not narrate that one! In the case of God concept also, the power, miracle, grace, words, etc., cannot tell about a God power because these all qualities are present in any astral being. Now, the only thing we need to know about the God concept is about God-quality. If it contains the basic ideal qualities universal truth, love, and morality, only then it becomes a God concept. If that power lacks those divine qualities, then, if at all it contains huge power, still, it becomes only an astral power. Satan has everything except God-quality!! God always for universal truth, love, and morality, without these God-qualities there cannot be any God concept in this universe. A rich person can be defined only by his richness, in the same way, God concept can be defined only with the God-qualities.

Practically, this quality-God concept means considering one's worshipping God as the embodiment of these three basic divine qualities. Also, taking all other rituals and beliefs as individual options for one's own salvation or attaining heaven. When everywhere the God qualities are being glorified, naturally, all claim of the greatness of one's individual God and religion subside, and this will make a way to a great heavenly Golden age.

If logic gets a place in religion, then wouldn't the belief get a lesser place in that same religion?

Answer- What is logic? Logic comes forth when people try to assert something blindly without any proof. There it tries to show the fallacy of such blind assertions. Again, it is also used to clear confusions around something unknown, and most of the time helps to find the truth! Now, you turn towards belief, there we can see the assertion of beliefs, "we are only right, not you," and "you get salvation or heaven only in our religion" etc.!! When they repeat those belief slogans, again their faith increases! And when they repeat again and again their faith slogans, the faith becomes stronger! When they repeat the same again for many times, there he becomes a faith-full believer!! This blind repetition grips him and shows some kinds of fantasies, and its name is fanaticism!! History provides us millions and millions of dead skeletons, which have been come out from the fanatic-womb of religions on our holy earth!! Moreover, another blind parallel belief also finds its zenith, and it says clearly "our religion is for peace"!! Oh, beliefs are totally blind!!

At the end, let us have a very simple logic and it is in the form of a question, "can peace produce millions and millions of murders?"

We can see the term devotion in all religions. What is the real concept of God-devotion?

Answer- As far as the concept of God-devotion is concerned it is connected to the emotional aspect of human being. We can divide God worship into three major parts. First is devotional part, second one is the meditative part, and the third one is the ritual part. The devotional part connected to emotional part of human nature, the meditative part connected to thought part of human nature. The ritual part is connected to activity part of human nature. Pure devotion is a kind of knowing the god's great qualities from the bottom of heart. In other words, pure devotion is a kind of emotional-sathyachintan, and there they glorify the same universal truth, love and morality with emotional touch!! This is a real purifier of mind as well. Pure devotees do only activities which glorifies the greatness of God. Those activities are not rituals. For example, if they wave the lamp with devotional song in their lips, then that is connected to glorification of God's great qualities, thus, it cannot be considered a ritual. If they do with some kinds of repetitive words and with some unavoidable formalities for god's worship or for grace, then it turns into a ritual. Prayers are not the devotion, but they are mere demand put forth to God for some grace-gratification. Common people use prayers and rituals together and think that they are the great devotees of God!! In fact, rituals are God's grace-oriented or God connected emotionless mere activities!

We don't respect a thief because we know that thief does not have any good quality. In the same way, God is also respected and considered God not because of His power, but because of His great qualities!! Unfortunately, in most of the religions these activities of mere rituals considered the great devotion!! This is quite impossible. This

is so horrible because then this idea forces to agree with a cruel-devotee, and a demon-devotee, etc. We can't consider Satan a devotee of God.

Where there is selflessness, there is pure devotion, and where there is a pure devotion there is self-purification. Ritual part of the religion has nothing to do with purification of one's heart that boosts the essence of any religion!

Some prominent spiritual people give less importance to morality. Can we become great soul without morality?

Answer- My dear brother, it is impossible to become a Great soul without moral background. For explanation, I mention some points below.

There is no God without morality. There is no religion without morality. There is no Yoga without morality because there is no real Yogi with immoral qualities. No real mahatma or great soul is immoral. Swami Vivekananda took oath to raise then society to a highest moral level. He said "I will inspire all sisters to become so chaste or pativrata like Sita mata even after my death." Unfortunately, it did not happen. Still, it speaks the need of morality in a religion.

Didn't spiritual teachers give peace to people who went to them?

Answer- Yes, of course, and I love that from bottom of my heart. Please, don't mistake my words with your false understandings. I did not intend about the peace people get when they go to their spiritual teachers. This way has been there from the beginning in all religions, and it has been increased as well. Besides this, we can also see a great increase in worship places, beliefs, and rituals, etc. Religious teachings multiplied with the increase of different media as well. Now, what I explain is only about the "reason" for such a drastic increase of cruelty and immorality in people, even after all such above-said factors' rapid increase in religions and spirituality. That means this world will reach to extremely cruel and immoral marriage-less society, while still having these religion and spirituality in its extreme forms! If you have any doubt please just compare fifty year back society and today's society, and that will answer you the nature of future society after hundreds of years!!

In short, what happened so far are mere different contradicting visions and revelations, without the knowledge of ancient sorcery system and its secrets! It will continue, in the same way, by complaining every negative or bad change to "End time" or "kali yuga," until reaching the real moral end time of all religions!!!

So, please understand that I have explained only about the ancient sorcery system's secret movements, which can destroy all religions permanently in the future, and about its related solutions.

What is your opinion about sex before marriage?

Answer- If anyone likes to keep one's married life melodious until one's death, then one has to say "no" to sex before marriage. Great souls want everybody's married life a successful and happy one. So, they always say "no" to sex before marriage.

For a successful married life, the hearty love between the pair is very essential. Thus, this is the main road for that. Wealth, intelligence, appearance, etc., are not any kind of happy road for that at all. Dowry is the path of thorns. On the other side, if

people are indulging in sex with many people before marriage, on the marriage day, would it not be the last wife or last husband? How can there be any kind of hearty love, which is the prime promoter of married life? If it did not break, still that married life would be only a pushing cart until the death.

Still, there is a hope for those worsened relationships. With proper mind-purification methods, they can achieve the hearty love between them and able to get the melody of married life! This desire and demand should come from both sides is the very important condition here.

What is your advice to those who follow the immoral path?

Answer- It is one's own right to select his path. I don't advise anyone, but try to speak the reality regarding that topic. If one finds any sense in my words, surely, it will reflect in his life as well. In fact, I have one request to those who have determined to go immoral ways. Please, do not project immorality as morality because it will become very dangerous to this earth! Don't think, including sex before marriage, as an ideal, and don't motivate your juniors or others to follow your path, this is all enough from you my dear brothers and sisters. If possible, though you cannot follow, respect the great ideals of great souls. Then, your next generation will get the power of morality to create a great Golden age of hearty love. It will stop even a single painful teardrop falling down to the tear-channel that exists today!!!

Based on your findings, which one you really feel to emphasize more among all your warnings?

Answer- Listen, 'Please, don't make my words as a separate religion, sect, cult, etc.' This is my most important warning among all my warnings! This is because I know for sure if there is a slight fence of separation, and that will be the ancient sorcery system's one of the onward consuming food! Just look behind this world's total approach on God and religion, and you can see nothing is left free from this fence-chain!

Regarding the above point, let me ask at least one question here that "Why even 'all' religions have been divided further into so many sects and cults, and is this commandment of any God or prophet?" A religious or spiritual teacher makes his own sect, a group of people make their own tradition, and it goes on. Oh, divisions and divisions and divisions and again divisions!!

We can see brotherhood only within each division, but it is used by ancient sorcery system as human power 'to face' other divisions!! Divisions only can create hatred, violence, and bloodshed, which are really the anti-God and anti-religious approach.

My dear brother, without considering this point as the primary need, all other activities will be in vain, like pushing a car from inside the car!

Some people say that there is creator God, and He is so powerful that no ancient sorcery system can work on Him. What is your answer to this statement?

Answer - I already answered this question earlier. Still, in a different and very short way now I am trying to answer this statement. Now, we go in a different route. All sincere religious scholars agree that their religious book contain a certain degree of unscientific explanations. This is true, but we also know some fanatic religious scholars are trying to make every statement in their religious text as scientific as modern science!! Now, as we know there are many instances of unscientific narrations, then how did these come from creator God? Creator God cannot make even a single mistake because He must know His creation. Thus, creator God concept becomes more uncertain, but local God concept becomes more certain. On the other hand, if fanatic people argue again for creator God, then another question comes, "who did, in every religious text, speak these untruths if not from creator God?" then they have to go for another source to explain these untrue narrations. There they have no answer, but we know that other source that is the ancient sorcery system's negative energies.

What is the purpose of animal sacrifice to God?

Answer - Animal sacrifice to God is absolutely a contradiction! God always intends peace to the people, and religions never speak that they are against peace. Peace can be derived from the divine feelings like sympathy and pity etc. It is always against the feeling of cruelty. Besides religions argue that God is all loving power!! Again love is the enemy of cruelty! Now, how dare human beings to inculcate cruelty on God in the form of animal sacrifice to Him? You get billions of astral visions and words if you are in that astral mental level. Unfortunately, people lost common sense and surrendered their reasoning in front of such visions!! Belief is a terrible thing that can mesmerize anybody! Nobody cared for a faithful reasoning, but believed everything uttered by those astral beings!!

Animal sacrifice is not for any God concept, it is only for blood thirsty-astral powers. All religions clearly speak about blood thirsty demons as well!! So, it is clear that the idea of blood sacrifice or animal sacrifice is strictly not for a God concept. We know if there is no universal truth, love, and morality then there cannot be any God. Still, if there are such great qualities, then there can be a God, but without a cruel heart. The difference between a subtle power and a God concept is subtle powers do not consider good people separately! They will help only to those who give more offering to them! On the other hand, God concept only counts the greatness of human being in the form of one's great life. He rejects wicked person's devotion totally because He is for 'Good people.' Unfortunately, every God-religion supports animal sacrifice and this is really astonishing!

People always try to coat their religious confusions with sweet philosophies, but they could not stop the hatred, violence, and bloodshed with their sweet philosophical coatings! Fact is fact. Millions and millions of innocent human beings have been killed in the name of God and religion. Still, everybody claims his religion for peace!!! God is truth. So, please, don't coat the facts with your sweet philosophies because it is the murder of God-truth.

Every religion has its own fence around it. They consider the strengthening of their fence is the religion!!! In fact, that did not develop any religion, but it developed the feeling of cruelty in every religion, which the ancient sorcery system needed from them!! Those great souls who lived in every religion did not care the fence of their religion. Instead, they kept that fence as a mere mark. This means they created a mere rounded mark of religion just for conventional belief sake! Again, this allowed them to pass the hearty feeling of love to all mankind without any barriers. Hail to those great souls, the real interpreters of religion and God.

Is there any difference between those predictions of religions and your predictions?

Answer- Yes. The difference is, religions predict from their mythical stories, and in their predictions, even though those predictions are God's own words, still God is helpless to stop it from happening!! Again, God is also helpless even to change at least its course! On the other hand, I told only about those social dangers, and they are only the extension of the present day's social trends! I have given some solutions, and they are all about social science.

Do you have doubt about any external control over that ancient sorcery system?

Answer- As far as my direct experience is concerned I had no such experience so far. In fact, subtle area is so vast and there we can find numerous things, but they are all in one common plane. Besides, there are so many mind techniques as well. In fact, my concern has been only on dangers of that ancient sorcery system, which is controlling everything from the total secret areas. Moreover, this system is an unexposed secret system, and the real destroyer of humanity.

If we imagine such possibilities, then I think the only possible control over ancient sorcery system, I guess, maybe Aliens!! I already said this ancient sorcery system is following all the sorcery ideas, and there they use only human mind and its faculties. Still, when we think one step further beyond, we can't ignore Alien's interference! The major reasons for these possibilities are listed separately below.

1. The possibility of the third type of civilization beings' using of 'mind power' as a source of power.

2. Including animals, mind power is abundant on this planet!

3. Ancient sorcery system has different methods for collecting excited or active minds especially cruelty and perverted sex. This gathering mind power technology can be doubted in many different ways.

4. As far as the transferring of this mind to another galaxy is concerned, we know they can use teleportation technology!

5. To start the teleportation, we know, it needs two similar devices. One is at sending place, and another is at receiving place. Unfortunately, we found so many scientific instruments "very ancient" on this planet in different places. It is said that they are anyhow not the inventions of humans. These very ancient scientific instruments and the many instances of the appearance of Aliens on our planet, together give a sound background for a sincere doubting!

6. We know that teleportation is possible in sub-atomic particles. The mind is very subtle, and it is subtler than sub-atomic particles. So, the teleportation is surely possible if such attempt occurred from Aliens!!

If someone says that he believes only in his God-given religious book. Then, what will be your opinion on this statement?

Answer- In above religious approach there are two main dangers obvious. Firstly, this approach will never bring the creator God's wish for unity of his children. This is due to the fight of his own children who are in different religions!! The maximum possibility of peace we can see in this approach is tolerance, but only until its bad break. Once it is broken, then the water flow from the Dam sweeps everything with its bloody colour. Thus, we can't dream anyway a world peace here.

The second danger is almost the same as above since it forces the dangerous idea on every religion that "growth of one religion only at the cost of destruction of other religions." This is just like growth of one creature is based on the destruction of many other creatures. This shows co-existing of religions is forever impossible due to their own opposing basic structures.

Let anybody believe in any religion, but let us live in one region that is our heart, which is the seat of great love that is the God.

Can you explain that a religion is essential for every human being?

Answer-Yes, religion is essential for every human being, but not its name! Religion is for peace, and it is also justice to human beings. If any religion misses these essentials, misses everything. God and rituals come under spirituality, and mere options, and left to once choice. Thus, the main essence, we see, in all religions is 'peace and justice.'

Now, we can test whether the religion is essential or not, by asking some easy questions to somebody! The questions are "do you want your house to be thieved?", "do you want your children are being tortured?", "do you want your son an anti-social?" If your answer is "No", then you need a religion. If your answer is "Yes", then you don't need a religion. A real religion works as a security person and saves one from all hazards. Unfortunately, the religions, instead of saving humans, became a threat to humanity!

Religion basically exists for peace and justice. All other parts of any religion are spiritual parts and are mere choice parts. We have Godless religions in this world, which proves the above stand. Moral codes, only in its pure form, stand for peace and justice. So, in short, it can also be called the religion. If atheists are highly moral and sincere, then they themselves become [unknowingly] the practitioners of the religion. Thus, we get one universal religion within all religions. If we try to stress and glorify that area within all religions, then, all including atheists surely will enjoy that great benefit!

Frankly, we ask you about the dangers that will befall on humanity in the future.

Answer- Centuries before today's ways were considered strictly sinful and anti-religious. Today every religion, though they claim no change in them, accepted different convenient modified ways, but all they occurred in a natural way. In the same way, every change will occur, in the future, to this world in the same natural way. One set of examples are today, divorces, homosexuality, sex before marriage, adultery, etc. they have become common!!! Earlier, there was no such a frequency at all. In the same way, people will reach one day there at 'no-marriage society' in the same natural way!! This updating technology of 'human mind atmosphere' is the basic technology of that ancient sorcery system, and 'bringing change in the society' is another connected technology which it follows. We call this in general term as the generation gap!! This way, in the future, we can see changes in all areas of human behaviour. Cruelty and immoral sex feelings are the two major feelings which will grip this world like the ghost in the future! These are the two major 'behavioural weapons' of that system. Nobody can stop this because it was meant by that ancient sorcery system even from the ancient-beginning! Religions were only very later origins, and everyone will take different period to get the same end and that has been meant by the ancient sorcery system. This is already hinted in every religion in the form of end-time human wicked behaviour. Surprisingly, nobody tried to get the answer to the question "what is the purpose of God, in bringing such a terrible situation only to the end-time people and not to the earlier period's human beings?"

Thus, in the far future, all human beings irrespective of religion and sect behave in the same way as wild animals only with lust and cruelty. All religions' preachings and teachings will go in vain. The one very important factor which kills the values of the religions, no doubt, is the base of every religion the so-called "belief." Unfortunately, the downward path of human society, with full of violence, divorces, etc., will cause an increasing and unending tears of sufferings to the humanity in the coming days!!

Beware of 'beliefs' and 'the ideas of separation of the people' in the name of caste, religion, and sect because these are the powerful two 'technical weapons' of that ancient sorcery system. If you feel need of a solution to this disaster, start respecting the Godly ideal the truthfulness. This only can make you free off the blindfold that was tied by your own many branched granted-beliefs.

Religions instruct many rules to be followed by everybody from birth to death. People try to glorify their religion's instructions and their greatness. Do you mean this as the essential religion or essence-part of every religion?

Answer- No. I never said anywhere those all religious instructions are the essential religion. Every religion basically looks at human well-being. It tells us to live better in this world with your one hand, but other hand is for others betterment. If you are a powerless and poor person, then it tells to keep the feeling of sympathy in the heart for suffering people, but of course not only within your own religion. This is all about the essential religion!! You don't need any big book for this teaching. You don't need

any scholar to unveil its meaning. This essential religion is absolutely perfect and pure without the scholarly residues. In fact, every religion has these great ideas and rules for this great-living. Unfortunately, they are well buried under the huge heap of rituals and beliefs! I said only to separate that buried important part from every religion and to give life just for practising in daily life. We can call a villain a Hero, but that will not change him to a Hero. In the same way, if we claim great words in any religion that will not make that religion a great one, unless its followers practice it in their daily life. Please, don't claim those great ideals in your religion because the great ideals of religions have been suffering without any outlet for sincere appearance and survival in the society from the beginning!!

Rituals, including God, come under spiritual part of any religion. Spiritual parts are many and they are mere choices of population. Anybody can go to any heaven with his own spirituality. The only question arises is whether anybody can go to any heaven with cruelty and hatred in one's heart. If the answer is "No", then it concludes by itself that the very essential factor we need to go to heaven is the broad-mind. We know this broad-mind is the product of the essential part of the religion! If you try to put a separating circle around your religion and God, using hard debates, to show their exclusive greatness, then unknowingly you make your God a smaller God than the creator God!

How logic, belief, and truth work within the religions?

Answer- We use logic as a weapon. Unfortunately, it is a double-edged weapon and with one side it tries to find the truth, with the other side it tries to confound the truth and establishes injustice. In the Court two Advocates arguing against each other. Two sides use their maximum logic to convince the judge. We know, here, one Advocate's logic is fighting for Truth and another's logic is fighting to defeat the truth.

Astonishingly, the well revered 'belief' is actually killing the logic with its unchanging stand. Logic is only possible in the absence of a stubborn approach. The Logic has the one great merit that if one Advocate of true-side lost a case, then, again he has another opportunity in upper court to prove his true-side with his better argument. Unfortunately, this possibility is not in any belief of any religion!! There, single blind-belief has the power to blindfold, whole of its religious people, until the end of this world!!! The baseless casteism and fanaticism are the products of such darkened ignorant belief based life system!!

Within religions, we can't have any logic since they are based on some beliefs! Some fundamental beliefs are the basis of any religion. Thus, within these belief-religions, there is no scope for any logic. Unfortunately, some modern religious scholars try to introduce the logic to give a scientific tone to them. Again, in some religions, in some parts, 'enquiry' is given more importance, but only to create different philosophies. Those philosophies after their birth start believing in their own words and fight against other belief-philosophies just like belief-based religions!! Since they are not ready to change a word or an idea afterward, even if the truth is found in the better way, they also fall just in the same category of believers.

Truth is used as the private property in religions and sects! They claim the ultimate truth the God and heaven to their own religions and sects!! God is anti-Satan, so God must possess great qualities like the universal truth, universal love, and the great moral behaviour, In fact, this is the simple way of defining truth within the religions. Separating the universal truth from God is really blasphemous. Thus, these quality-God and quality-religions will save us from that terrible blasphemy.

People are still within the system of beliefs, why didn't they realise that the realm of truth is really the kingdom of God?

Answer- Without great qualities, there is no God, no divine principle, no religion, etc. In fact, different beliefs and their respective rituals are only the cause of different religions and sects. Here is a small story. A village people had lived inside a tunnel without seeing the real Sun. While they were inside the tunnel, they fought for the Sun's colour. Some argued for blue Sun, some other argued for green Sun, and still some other argued for violet Sun! One day they found the tunnel mouth, came out and saw the real Sun. There their all arguments about the Sun stopped.

Unfortunately, all these religions and sects are doing the same types of arguments for that one God, like those people who lived inside the tunnel! In the story finally they got real Sun, and thus, the story became comedy, but in reality, different religions still didn't get that one creator God, thus, the real human life on this planet is nearing its disastrous tragedy!

When we didn't get the creator God unanimously, people should have tried at least for a universally accepted God concept. The ancient sorcery system's influence has been so powerful that instead of gathering for one God they fought bloody wars for Him!! People are responsible for converting loving God into a power which motivates bloody wars. People are responsible for devastating the 'kind-God concept' totally from the bottom. People are responsible for chaining the God unto their own religion! If Humans start to realise this a bit, then the world will rise from the suffocating painful pit.

What is "Sathyachintan" and what speciality it has?

Answer- Using logic, based on the universal truth, analyzing the facts is called "Sathyachintan." This is a scientific approach and only tries to see the facts which are absolutes. In fact, here one's hands should be clean without the dirt of any kind of belief. Belief cannot move from its stand then with that how can you move to different corners to get the right information? Belief prisoner cannot realize any truth for this reason. He can sing a permanent belief-rhyme till death and can debate for that one rhyme till death. He can sacrifice his valuable life for that one rhyme! Oh, how intelligent that ancient sorcery system is!!

Every religion, sect, cult, and philosophy including Atheism is following a 'Win' based Logic, but Sathyachintan follows not a win based logic like Advocates at the court, it uses only the 'Truth' based Logic. This is the speciality of Sathyachintan. If anybody is not ready to change, if it is in religion, there two things are possible, one is conversion and another is violence. We faced these two unwanted and anti-God things from the beginning only because of this nonsense belief method. Nobody can claim his religion for peace since he is adhering to this mother of violence. Here, the expectation of world peace is even away from the human dream world!! God is Truth and the religion is also Truth, since these are obvious, how dare the people say that they can contain these two great lights of TRUTHS within their 'exclusive' pitch dark belief-pot?

Why do you say the Sathyachintan as the active God?

Answer- I already told the universal truth, love, and morality are the essence or primary colours of God. Now, the Sathyachintan explains the same godly qualities needed to face different situations of human life, and also it tries to purify the minds of human beings! So, the same essence of God quality is running everywhere in the human life arteries to cleanse the impurities of minds. This is why Sathyachintan is called an active God. Prayer is an unfulfilled demand, but Sathyachintan is the satisfaction of the realization!! So, the greatest worship, as well as the grace of God is the one and only Sathyachintan!! Again, beliefs and rituals may produce hatred and violence in a society, but Sathyachintan never makes such sin in the name of God and religions. Thus, Sathyachintan is the God that we want to use and absorb. Nobody can blame this active God. A huge mountain of God's grace is lying in front of everybody in the form of Sathyachintan, the only thing that we should do is to grab it until the last stage of our great life. If there is will there is a way. Thus, if you will, you can have the grace of kinetic God called Sathyachintan.

Can you explain logically about the idea that a religion needs no belief and rituals basically?

Answer- Yes, that is possible because that is the truth! Let us see the main purpose of a house, and that is the shelter. There we don't need any explanation of its area or other conveniences. In the same way, when we speak about the religion, there we need only one idea the shelter from cruelty and immorality! All other ideas, beyond this shelter idea, are connected to mere spirituality, and it is only a free-will choice of the people. This essence is there in all religions and sects, and this essence of religion doesn't need any rituals or beliefs. Surprisingly, Atheists also need this religion! Besides, any government on this planet desperately needs this religion! Unfortunately, all religion forgets that important part, and projects all other thousands of beliefs and rituals which become the causes of hatred and bloodshed in the society. This virtually kills the same religion, and besides creates problems to every government on this planet as well!!

Religious scholars fight for number of religious books in a religion, some say, ten books are great, some other say, one book is great, some say god's old book is great, some others say god's revised book is great! Some claim some sentences for their religion's greatness, and others condemn the same for their religion's greatness, and so on. My god! Please save your religions by giving some kinds of sensible logic to those preachers of your religions.

We can see how pathetically the religions deviated from the greatness, and roll on the unwanted and dangerous muddy ground of baseless beliefs and rituals!

Is morality a religion?

Answer- We know the basic principle of any religion is "live a good and happy life, and let others live a good and happy life too." This means religion speaks about sacrifice, and all immoral activities virtually stop others' happy life! Now, if the structure of the morality of any society goes against this basic principle, then those moral codes are not the religion. We can have any God and any type of spirituality to get salvation or to get heaven, but we don't have any option for 'basic principle' of any religion, and that remains the same in all religions all the time!! In short, we can

say those moral codes which are going against humanity and equality cannot be considered a moral code at all. Now, excluding such impure moralities, all other pure moralities together can be considered a religion or essence of the religion.

How can we believe that there is such a thing called an ancient sorcery system?

Answer- I have never told anybody to believe in my words. I only told everybody to think and to get the logical conclusion on my words. Only for that purpose I have written many messages. You can refer to all of my messages before your final conclusion.

When almost all the world ardently following the beliefs of their religions, why do you speak against it?

Answer-For thousands of years, religions, sects, Gods, and even all the people of this world had believed that this earth was flat. My dear brother, I have no personal grudge on "belief," and also I have no hatred towards any religion or sect. Since I have seen the ancient sorcery system, the dark hands behind every religion, I try to show their dangerous traps sincerely with proper examples.

Every religion or sect has its existence in condemning other religions or sects! This is because no new religion or sect was born without condemning the existing religion. Every new religion developed itself by converting the people of other faiths. I ask you one question my dear brother, in the pursuit of these different types of conversions, where was that major idea of every religion "service unto the goodness of people"? If anybody follows his religion sincerely, then he will only try to better the behavioural quality of that population without looking at the horrible side of conversion. This is because any God [concept] doesn't care any crude population on this planet, but He wants the pure souls. The collecting of crude people with any conversion method is certainly a sin as far as the essence of any religion and God concept is concerned. In the same way, to get God, you need to absorb the great qualities of the God, but mere changing from one set of beliefs to another set of beliefs makes no difference. Again if you believe that your God's words alone are religion, there also you will get only a back position in the long queue of such claimers!! Every religion and sect believes that it is the perfect one!! Thus, we can see that belief is not the reality or truth but it is a mere claim. The real truth comes only in the logical conclusions. Scientific truths are not any scientist's personal belief, but it is the experimented and tested and successfully attained results of a logical conclusion. If you think many times, then, you may get the truth. Instead, if you believe in something in your whole lifetime, there you never get the truth, but only maintain your delusion.

We have only one truth, and the different religions and faiths pull that truth to their own courts!! The great 'Truth' has been suffocated by these dragging and pulling of religions and sects! Unfortunately, because of this pulling-game of belief-method, the Truth is still in no man's land!! The ancient sorcery system has been playing that sadists belief-game since the beginning, and caused so many bloody wars. It continues this cruel game, and my only duty is to inform you all about this.

Should we need ‘belief’ as an essential factor in social life?

Answer-Before answering this question, let us look at the idea of the word ‘belief’ in detail. In fact, the idea of the word belief does not represent any kind of existence of anything. That shows an inability in knowing ‘something’. When we say ‘truth’, there we see the knowledge of the existence of ‘something’, and in the same way, when we say ‘untruth’, there we see the knowledge of the existence of nothingness. But when we say ‘I believe’, there we can’t see either type of knowledge of existence. That means we experience truth, and untruth etc. are in the form of knowledge of the existence of ‘something’ or nothingness, but when we say ‘I believe’, it gives the idea of the absence of knowledge of either the existence of ‘something’ or of ‘nothingness’. Thus ‘belief’ comes not in the category of knowledge, but comes under ignorance. Again, we know, when there is knowledge, there is no doubt, and the absence of knowledge only, produces the feeling doubt. Thus we realise that the feeling of doubt is nothing but the ‘belief’ itself, and ‘belief’ is nothing but the blind emotional attachment with the uncertainty!! If we don’t know a man’s behaviour, then there is the chance of believing others rumours about him. In other words, there is a chance of doubting that person. This path is dangerous to society in any way. So if anybody argues these doubts are required for smooth running of a society, then it is unacceptable. So with all above points, we can conclude that a society requires only knowledge, but not the belief for its smooth functioning.

Did ‘belief’ work positively anywhere in the society?

Answer- No. It did not work positively. At the police station and in the court, nobody cares our belief, there, they demand proof. Thus, the major areas of social life are covered in this way. The unknown ideas can be considered probabilities, but no need of considering them in the form of beliefs. But the argument that the love in the society would get paralysed in the absence of ‘mutual beliefs’, is a mere foolish notion. This is because the base of the real love lies in the feeling of sacrifice, not in ‘belief’. Even in selfish-love, we can see, when one person becomes useless, naturally the ‘love’ decreases. We also see the ego conflicts cause a decrease in love. At the time of verbal fight, people use more logic than mutual belief!! In all these places we do not see any role of belief at all!! So we can confirm that the belief is nothing to do with the social life.

What is the role of ‘belief’ in a religion?

Answer- The function of ‘belief’ remains the same even if we speak about the religion. In general, this area much depends on ‘belief’. So we need again, some more explanation to clarify the point. We already know that the uncertainty is the mother of belief and not the knowledge. Doubt is its foundation as well. When ‘Truth’ comes, ‘doubt’ must vanish. So like when ‘Truth’ comes the ‘belief’ has to recede. So, when we say “I believe in God”, then naturally it gives the idea that ‘I doubt in God’!! But every religion says that ‘God is Truth’, then which one should we accept? God is Truth, or God is doubt? If we are with first one, we have to reject its opposite the belief. But the only option otherwise we have is to hold the belief firmly, rejecting the idea that God is Truth!! Is it possible? When such situation comes to anybody, to avoid one

among his two favourites, he looks for the sensible and a better one for him. In the same way, here, between these two, 'God is Truth' seems sensible and real.

When we realise both God and religion as universal truth, love and morality, with that we get, all-loving God, the sincere 'devotion' to God, and the perfect religion. Surprisingly, all are in their purified forms!! Naturally, we feel this as a complete explanation of God and Religion, without the touch of thousands of horribly contradicting beliefs. The religions of beliefs have been fighting one another, for thousands of years, only for their beliefs!! Unlike other wars, those fanatics' wrath consumed countless innocent people, including women and children. Oh, those fanatic 'belief wars' of religions raped many a chaste sisters and mothers!! Now, though beliefs are against science, but made compromise only with guns and bombs, acquired more strength, and they are on their way to their end-peak!! They drenched the world with blood for their belief. They cut the neck of human being for their so called great beliefs. Oh, Ocean of cruelty in the name of beliefs!! Those Great souls lived in every religion were inclined more to the wisdom, the fountain of truth and the source of universal love. They preached always God as 'all-loving'. Beliefs are born blind because they lack the eyes of truth. This is the reason for cruelty overtaking the all-loving nature in the belief-followers! Unfortunately, the people still say that the religion is the subject of beliefs, and it should be left free on its own!!

Had we followed the path of considering God and religion as universal truth, love and morality, by giving nominal importance to those beliefs, then we would have enjoyed the ocean of peace with the passion of hearty love! But still we have the last chance for selection. And let us hope that we all will select a bright life for ourselves and for our next generations, rejecting the horrible suffering.

If anybody says that all your spiritual experiences together is a kind of delusion, to them what answer you would give?

Answer- You all are believers and you have right to believe in that way as well. If you want my answer, then I need to give a few points to those brothers and sisters who believe so. First of all, we have two kinds of such people. One group is Atheists, and another one is total-blind religious believers.

To those Atheists, I remind them that millions of people experienced these astral beings in the past and even today some people are experiencing the same. What proof you have to refute all these human experiences as mere delusion? We had the greatest type of great souls who strictly observed the truth until their death without speaking a lie in their spiritual lifetime. Would they simply lie only for this one question? You always speak about weak mind, but we can see most of the great spiritual people with powerful brains as well. With that strong mind they experienced those astral beings!! You can't blame their mind simply because you people could not catch the subtle beings within your mind. Vast majority of common people also cannot experience such beings like you, but we can't stop you, if you believe it so. Some Atheists, no doubt, are far better than the fanatic religious scholars, and they sincerely try to bring forth the ugly faces of religions and blind beliefs. They are doing a great job in diluting the dangerous caste and fanatic feelings in the society. So, I appreciate their humanitarian social service from my heart.

Now, the second group is the blind religious believers. To them I remind another point that my case is not a new one, and every religion condemns other religions blindly out of their differences of beliefs!! Everybody is doing his religious duty only by condemning other faiths, and praising only their set of beliefs!! They just continue their condemning profession, and in their latest version they added me as well. Now, I request you to read the below points before your personal final-conclusion.

1. Every religion is based on the human astral experiences. This means, the experiences of spiritual teachers, saints, prophets etc., are mere human beings' astral experiences. This shows clearly that only those 'human astral experiences' created all these available religions!!

2. I am also human being, so you can't claim the astral experiences only to your own human spiritual teachers or prophets.

3. I also spoke with those different divine beings, and also saw some of them in their different divine forms!! After a very long time, due to my cross questioning nature, I got some solid proofs for doubting the whole visions. Later I started spying on these visions and finally realised that there must be some hidden power which should control those astral beings. Still later, I found those hidden real directors of this astral vision drama. Every vision is true as far as that sphere is concerned. Unfortunately, every vision is a kind of "directed play" from the totality view point!! All gods and creator Gods are true as far as such visible spheres are concerned. The ancient sorcery system hides and so cannot be seen in the astral spheres, but they are the exact directors of this uncertain and vague earthly as well as astral visions. Please think that my words are not the astral being's revelations, they are the derived words of the result of very dangerous and hard spying.

4. Instead of accepting everything said in the astral visions for true and real, had spiritualists spied in the astral world before many millennia, today we would have lived in this world better than any great heaven of human imagination!

One creator God is explained in different and contradicting ways! This is similar to the absurd explaining of Sun's colour as blue, green, yellow, etc. Thus, it shows that the people are still in the midst of delusion regarding the God concept.

What is your ultimate advice to world people on the basis of your subtle discoveries?

Answer- On the basis of my subtle findings, I can say clearly, and without any doubt that people should decrease the quantity of 'cruelty' and 'immoral sex' from the world by any means. This should be done with the total human effort.

What is religion and what is irreligion, can you explain with an example?

Answer- Now, here is one small story. In the beginning, the leader of demons tried so much to change then-society into wicked ways, but he could not do anything because people's understandings were so clear. Finally, he called all his demon disciples to find a solution for this. He also simply reminded nearing one opportunity, in which if anybody repeats God's name for a certain period like God devotees, will receive one boon which he wished. Then, one intelligent demon rose and he consoled his leader that he would solve his problem! Leader surprised, but allowed him to go. This intelligent demon sat with devotees for a boon. Finally, after so many months,

God appeared and sanctioned everybody one boon to ask. Every devotee asked different boons, but big boons, and God sanctioned them all. Finally, he came to this demon and asked “what do you want?”, then the intelligent demon answered, “My God, I don’t want any big boon, but I need only one small boon that “you just exchange the ‘Hell-written board’ and ‘Heaven-written board,’ which are now hung in front of respective places” that’s all I needed. God laughed and said, “Very silly boon,” and sanctioned!! The story says that earlier people used all humanistic, sympathetic, and kind deeds as the means for reaching Heaven, but after the exchange of ‘Boards,’ they started all demonic deeds as the means for reaching Heaven. The story ends with the joy of demon-leader and giving that intelligent demon a big position in his domain!!

Now, you can catch very easily what is religion and what is irreligion within a few words!

When you speak and do “good” for humanity, it is religion, but when you make casts, classes, biased and selfish morals under religious rules, then it is irreligion. When you speak and do “good” for humanity, then it is of course religion, but when you try to force on others your personal God, beliefs, and rituals, then those acts become irreligion. Unfortunately, every religion and sect tries this on others in different ways including violence method!! So far, we got the results of such irreligion, and they are very huge!! Can you think that hatred, violence, and bloodshed came out from the results of religious deeds? Can you imagine this contradiction? It shows clearly the final purpose of such religions and sects, etc. are “irreligion” itself, and that is the very basic technique of that ancient sorcery system and that has been used from the beginning.

Now the solution is also very easy! We need to ‘rearrange’ the exchanged ‘Boards’ to its original position with a universal method. That is all we need to do to re-establish the righteousness, and to achieve a maiden Golden age on this planet!!

Omdewa Quotes

- God is universal truth, love, and morality. Greater than this, there is no God quality, and lesser than this, it is not a God quality.
- Think many times, then, you may get the truth, but believe in something in your whole lifetime, there you never get the truth.
- War is considered a mountain of violence. On the other hand, religion is considered a mountain of peace, but religious war is mere a mountain of nonsense.
- Even the terrible war-cruelty of emperor Ashoka was ended totally one day when he realized the depth of human pain! But, the war-cruelty developed by the religions will never bring that realization at all! This means, even the God cannot stop that cruelty forever. When we all know, God is love and cruelty is Satan, the idea “religious war or cruelty for God” only sounds terribly blasphemous.
- Every Human being suffers more than animal because the human being has an invisible, huge ego-belly. When you don’t have “ego,” then you will suffer very less than animals.
- Try to introspect every day, and try to respect the greatness.
- Pardoning is a personal option. You can’t connect it with religious way. Religion, on the other hand, is personal as well as social in its structure. Religion tries to curb the number of wicked people in the society by punishing the wrongdoers. The big deficiency of ‘pardoning’ is, it doesn’t assure in the ‘pardoned’ a positive quality change! If a positive quality change comes in the ‘pardoned’, then only that ‘pardoning’ becomes a religious act. Suppose, it didn’t change his quality positively, then it would become an anti-religious act only because it supported the wicked in the society.
- The ‘thought’ is our preceptor who reasons and brings us the truth, but ‘belief’ is the defector who kills reason and brings us the intellectual death.
- The sacrifices within the religious books have made all those books sacred, but only the sacrifices within human hearts can make the humans sacred and pure.

- God is great, no doubt, this is because God has the greatest qualities, but the beliefs and rituals are the least because they impel the people to fight with blind stupidity.
- God is always the universal Truth, Love, and Morality, and so, we cannot see in God any brutality.
- Patience is natural to the Great souls, but it is a suffering to the common people. The benefit of patience is that it saves people from misjudgement, which is the cause of any collapse!!
- We like a cool breeze in the summer season, but not in the winter. This indicates, we only 'like' what actually we need! If one's liking is with Good qualities, one will become a God-like person. If one's liking is with wicked qualities, then one will become a Satan-like person. This knowledge alone is enough to judge every movement in any religion!
- Whatever the worldly people do, they only do as a preparation for future enjoyment! On the other hand, Great soul's life is not the preparation, but to him, it is only the consumption of joyful nectar of that great broad-mind.
- This human race is not produced by any other relationship except the husband-wife relationship. Moreover, they are the people who bring up the children, but in a different status called parents. If the parents are good, the possibility of their children following their parents' good qualities is also more. This would make the whole population 'good' as well. Because of all these factors, the husband-wife relationship is considered the most important one.
- Every religion, sect, and spirituality endeavoured for world people, but the world went worse than before! They endeavoured again, but the world still went worse than before! Again, they endeavoured, again the world went worse! In the future, they will endeavour again, will the trend change suddenly to good? When we ask the Atheists the reason for this disaster, they point at the Theists! When we ask Theists the reason, they claim that their Gods already informed about this disaster at the beginning itself!! Then, what is the use of all these endeavours?
- Misers always live harder than the blind!! This is because they unnaturally feel burns within their stomach whenever they depart with the money. This is similar in the case of religious misers as well. They are trying to take all the mercy of 'creator God of human beings' exclusively into their religions, and say that those are in other religions cannot have the God's mercy and His heaven!!

- Rich people deposit their richness somewhere in the banks and in some papers, but claim rich, sitting far away in their residences! In the ritual-religion, they follow some mechanical repetitions and claim they are fully religious as well!! The practices for great soul-life are not so, it is like a long treatment, in which he purifies his mind. He diagnoses the ego-virus first and gets 'introspection' treatment next. Finally, emerges out with only religious juice without any trouble-creator religious waste.
- In the forest, we can see millions of trees and plants, but they have neither any relationship among one another nor fight one another! Unfortunately, human beings have thousands of relationships, but they fight thousands of times with those same relationships! Relationships can take a human being to divinity, and the same relationships can take human to devilish acts as well! In the former, the basic thought is "world-family", but in the latter, the thought is "my family" or "I must be the first in the family"!
- In the society, generally, the idea "favour" decides the Good and bad qualities of humans, and not the human's good and bad behaviours!! Favour is one's kind act, and it cannot be the standard of concluding one's total behaviour.
- When life values become one's mental experience, there we can see the birth of a great soul.
- The difference between scientists and the great souls is that the scientists increase the happiness of convenience in human life, but the great souls increase the happiness of purity and contentment in human life. Unfortunately, in the absence of the latter happiness, the former cannot work by itself because a tortured mind demands nothing except the peace of mind!!
- We can see two types of Atheists in this world. Between these two types, one type does not believe in the existence of any god. The other type also does not believe in gods, but the only difference here is that the second type Atheists add an additional phrase, "except our God" with their sentences! In this way, we can see only Atheists in this world! Great souls worship the quality-God, and not any belief and ritual god. So, they can see god in every god. This makes great souls the real Theists. Now it is clear that the only Theists we can see on this planet are the Great souls!!
- There is a great difference between peace and happiness. Peace is a 'state' of mind. It is that mental state where the mind is without the past, present and future imaginations. On the other hand, happiness is the expression of feeling when one gets his desire fulfilled. Peace is a state of mind, so it is common and universal. It never depends on any reason or cause and effect. It won't vanish by itself unless humans ignore it. Also, it won't get different shape now and then! Now, happiness is a kind of disturbed state of mind, but

that brings that person the feeling of relief and joy. Happiness is not a common type and varies from man to man. This needs a certain reason for its creation and these reasons are innumerable in numbers as well. Happiness is not a constant one. That means the same happiness has the quality of fluctuations. The same happiness may seem in one's later years as sadness. It can occur both from subject and object sides. For example, when one's taste decreases on something, then the happiness decreases, and when the object becomes old, then also happiness decreases.

- Common people crave for happiness and lose their mental peace. On the other hand, Great souls live in a state of peace of mind, and handle the happiness with calculations and ease!
- The “ego” feeling of a person keeps him always the priority, and makes him blind to his own mistakes! This is why people see the mistakes in others as horrible though they do those mistakes themselves!! In fact, if one wants to blame other's mistakes, then he must be the person who does not commit such mistakes in his real life. In this perspective, we can guess the sincerity of all ‘allegations’ poured on others on this planet! Like one drunkard mocking another drunkard for his bad drinking habit, we can see in this world such cheats in disguise of truthful people!!
- Today human beings need only individual freedom. In fact, the sail of the boat of human life needs the wind of hearty love. We can't get this with individual freedom, but for attaining that we need the only freedom the so-called freedom for sacrifice! Have your individual freedom, but don't forget the freedom for sacrifice, lest you will lose your happy and safe life.
- When human being suffers, only then that person becomes introvert. The thoughts of life and death are very alien to common people. Surprisingly, without these minimum philosophical fragments, nobody becomes good at heart. In fact, common people enjoy their life in bits, but suffer painful hits from all sides! This is because they cannot advise themselves like the people who introspect themselves.
- If we err when we cook, its consumption will be a bitter event. In the same way, if we don't correct our today's actions, they will come back with bitter experiences.
- Parents should take care of their children not to mock or joke others. This is because the ancient sorcery system uses these children or ‘this stage’ for their extreme negative purposes. I already told that the ancient sorcery system uses every stage of human life and collecting different stage's negative energies from all!! Human beings are still ignorant of these secret

activities happening within them! Parents should give freedom to argue for truth and justice, but prevent their children from joking and mocking others.

- Restlessness reduces the skill. Those who are interested in improving their skill have to search for some means to get rid of this restlessness. Fanatic restlessness is the worst type of restlessness in this world, and that reduces one's thinking power totally!
- Speed is not a curse, but when one faces an accident then it becomes a curse. Slowness is not a curse, but when it fails to reach the goal then it becomes the curse. Thus, almost all things appear in these two forms. You always get the blessings and not the curses of events. For this, you need Sathyachintan!
- Universal love represents the way of God's love on people. God's heart contains every human being, but loves only those good people. If anybody argues against this point has to prove whether God loves Satan.
- There is no value-distance between two zeros, but the 'life' which starts from one zero and ends in another has got a great distance between them! Great souls see this distance as yet another zero, so they live with the bliss of contentment and peace. On the other hand, common people give billion-importance to those 'distances', but they travel without a penny of contentment and peace until the end! Now, we can clearly realize one point that to get profit in life-business, money and property are incapable, but Great soul's Sathyachintan alone is capable.
- Don't go for correcting anybody. You just provide all ideas to the people. If possible you can inspire by narrating the real merits of the great life. Correcting has one dangerous stage that is to see mistakes in others for that purpose! This can be possible only on those who determined and agreed for that method. This is very uncommon, so never go for correcting anybody. Instead, do mere service to those people who wish to have it from you. The method of correcting oneself is the best method and it is also called by the name introspection. Do this practice, and become a great soul at ease.
- Hearty love comes from the sacrifice, and this love of heart is absent in egoistic people. The reason is that the ego sense prevents the great feeling of sacrifice! When we speak about sacrifice, one need not remember the alms and donations one has given before. This is because this can be done by any wicked person as well. The real sacrifice is not considering oneself as the first. Its result is, only then his heart starts telling him others also human beings like him. Shun the mind's idea "I am the first" and go to the heart and see the tears of love there is the best. Love is an animal instinct, but hearty love is the human's evolved intent.

- If anybody in a car tries to give a free lift unknowingly to a person who is on his evening walking to decrease his big belly, will surely and sincerely reject that offer. Here, his 'purpose' rejected that offer. This means, at first desire creates the purpose, and later this purpose drags him to all kinds of works needed for that. Now, we should aware of one very important point, and that point is we should be very careful about our selection of purposes or aims in our life, lest we will lose our results. Great souls select peace, contentment, and bliss as their main aims of life, and only try to attain anything according to their merits. On the other hand, common people select money, wealth, position, joy, etc., as their main aims of life. In both cases, there are works and their respective results as well. In the former, it is like a 'boat with the self-controlling oars' on the sea, and in the latter, it is like the 'sailed boat without oars' on the sea. This sailed boat without oars bound to swing from one place to other, according to the exclusive wishes of the different winds!
- A cure is everything to a bedridden person. Daily food is everything to a healthy, but an empty-stomach person. A small house is everything to a stomach full, but a homeless person. A big house and a car is everything to a small house owner. Power and status is everything to a big house owner. To get further heights is everything to a rich and influential person. Stopping others 'rising to his level' is everything for a most powerful and rich person.
- In society, most people consider the lower level people as poor and behave accordingly with them. From such type of people, nobody can expect any real love. This is because if you fail and fall down, then you can see such person's earlier love getting slowly changed into a mild mockery! Money is the love producing machine here, and love is fluctuating like the stock market in these human minds!!
- We enjoy all the facilities of science only because science allowed the change. If not, maximum, we would have seen very costly bullock cart in front of every house today. In the same way, had religions allowed the change in them, we would have lived today in a heaven-like world that is with full of peace and hearty love. Unfortunately, just like avoiding modern vehicles and arguing firmly for bullock carts, religions and sects are still arguing only for their antiquities, with a firm stand against the change! The ancient sorcery system has been using "belief" as its weapon, and it worked as well! Hatred, violence, bloodshed, all such kinds of devilish feelings and actions they derived from this belief-weapon!! Truth is better than belief. In fact, they are poles to each other. Now, if we need an escape from this ancient sorcery, then we need to do only a small job. The only solution is to accept the great and

godly 'Truth' in the place of 'belief' that has been blindly accepted and followed so far.

- If you give many bags of sugar to a diabetic patient, it will not help him. In the same way, whatever wealth one possesses will not help that person who mentally suffers in his life. He cannot feel happiness, when his mind suffers in any form. Heaven is in the mind, still, Hell is not outside to find. Now, to enjoy the life, we know, the short way is to control our mind! Again, to control our mind nobody stands against it from outside, and there the villain is our own mind!! Finally, we can realize, successful introspection is a simple solution for this great job.
- Introspection is also called as an internal Sathyachintan. If we forget this practice, we can't correct ourselves, and then, naturally, the effect of the external Sathyachintan becomes very weak. Thus, the internal Sathyachintan or introspection is an essential factor for a blissful life of any individual who tries the path of great life.
- If anybody does the Sathyachintan and Introspection in favour of himself or for somebody's sake, then that favouring method is absolutely common people's method. If those practices are done without any kind of inclination, only to find permanent solutions, then that method becomes great souls' method. One very important point is that arguments based on 'favours' cannot stop the repetition of problems until the end! All those who are trying for a great life should remember this fact all the time. Unfortunately, people included their God and religion within this 'favours' type of argument. The result is, though they claimed their God and religion for peace, they hated and fought one another until this day. Where is the sincerity and also truthfulness when they destroy the peace of their own religions? All religions declare 'cheating' as a grave sin, but what may be the quantity of sin they might have procured when they cheated their own peace generating religious duty!
- Justice always goes with truth, but sometimes it goes beyond the considerations of heart. For example, after selling the house, a family, with buyer's permission, stays one more week in that house. Now, heartless-justice says "you can't say this 'sold house' now as 'my house'. On the other hand, hearty-justice says "whoever resides in a house can say "my house" until he leaves, and ownership is a different matter." Great souls stay with hearty-justice because it always brings love and peace. Hearty-justice and hearty-love are the two main factors which make a human a great soul.

My dear brothers and sisters, I have done my duty sincerely, and hope that you have realized the dangers of that ancient sorcery system. I am the one fortunately escaped goat from the herd that has been led to the slaughterhouse! Still, the threat is not over, but I am happy that I could manage to inform you what is actually happening in the name of religion and sect in those secret subtle spheres. I will try, with my own spiritual powers, which are created as the solutions against those discovered sorcery's secret dangers, to develop further and to do some good to humanity. I can't think a religion or sect of my own even in my dream because I know very well, without a speck of doubt, all they have become the very easy traps of that ancient sorcery system! Goodness is the God, and Good-living is the religion. Then, every God is only the goodness, and every religion is only the good-living, and I agree with every God and religion in this RIGHT AND DIVINE VIEW. Every type of salvation, whether conscious or super conscious, must need this state of mind otherwise salvation of any kind is not possible. I consider the exposing of the secrets of that ancient sorcery system to the world-society is my primary duty, and if my words influence anybody to reduce one's fanaticism, and also to control one's immoral activities, then that will be my happy fulfilment of life. - Omdeva

NB. We have revealed many of the messages of Omdeva unto you now. There are some more messages, and we will upload those messages after sometime. Sincere questions are welcome, and you will receive the answers after a few days in this same website, in the specified question and answer page. Omdeva is not willing to have any face-to-face interview with anybody. An interview is nothing but a mere questionnaire. So, we advise the people who are willing to interview Omdeva in-person can send that questionnaire and receive the answers in the above said method.

-Aware and make Aware-
